Re: Fuel Surcharge mechanism, Docket A-04209

Dear Chairman Goltz:

- It seems unnecessary to rescind the fuel surcharge mechanism as it is in place if needed in the future.
- A major rate case would create more expense to be passed on to our customers when fuel would be our only increased expense-
- So it would be less of an increase to our customers to not have a general rate case.
- Note- We did not receive a notification (September 12)
- I echo others comments encouraging you to leave the fuel surcharge ability in place

Sincerely

*Evelyn N. Nicholson (G-82)*
