Subject: FW: OCC BDI Rejects Dumpsters

Hi Charlie and Kris,
Got the word about container delivery.
Please review the below. Would like to start getting the containers on February 10th.

Skyler Rachford will be your point of contact to position the containers and what not. His contact info is at the bottom of the email.

Thanks.

Subject: OCC BDI Rejects Dumpsters

All,

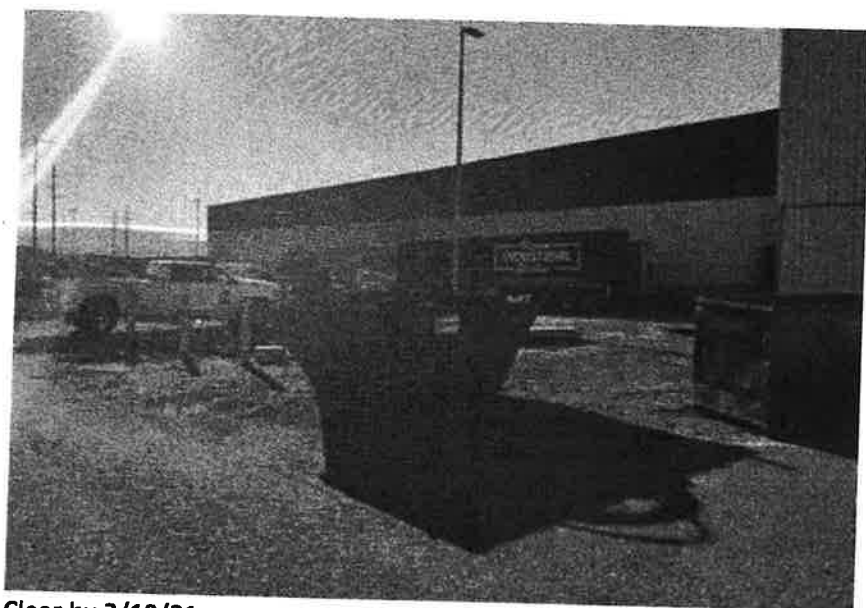

I would like to start receiving the BDI dumpsters next week so we have enough on-site for start-up on the 21st.

Sam: Lets have BDI start bring dumpsters on-site starting Wednesday 2/10/21 and have them stage the dumpsters in the areas shown in the first 3 pictures below.

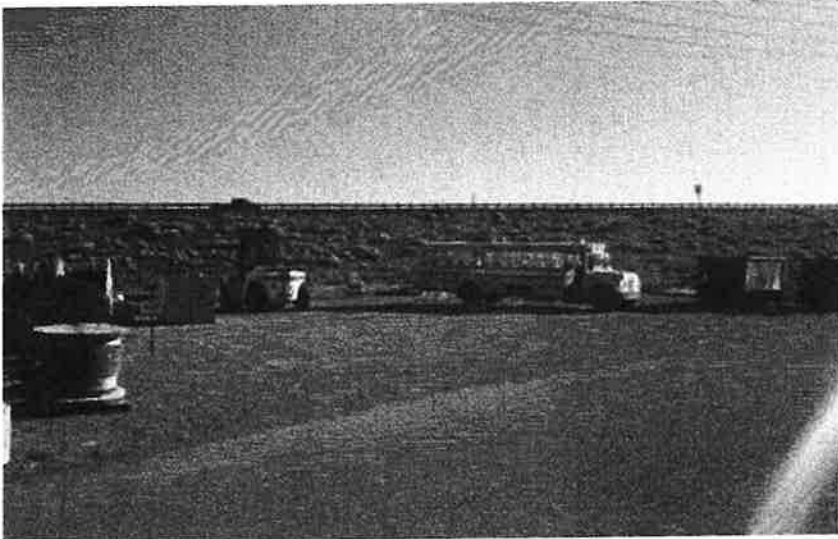

I need these areas cleared around the OCC site so the dumpsters can be staged:

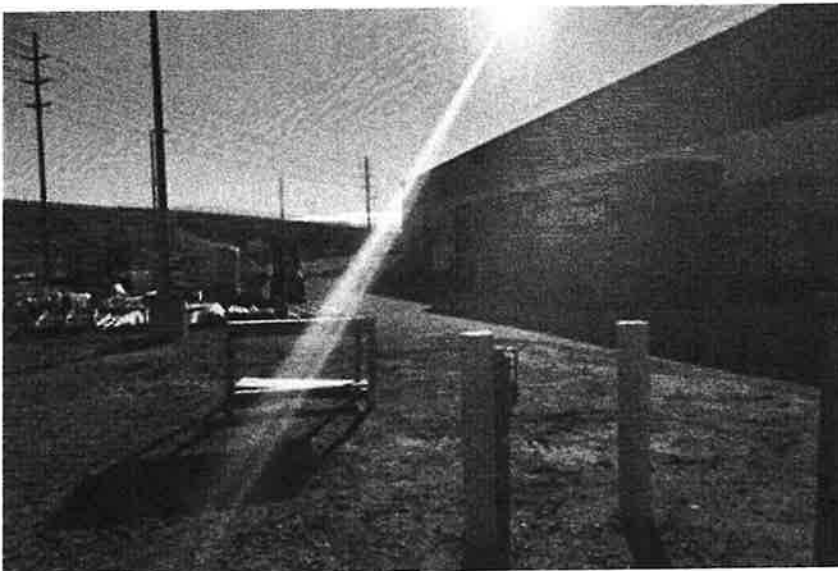

This pad needs to be cleared ASAP. This will be the primary staging location for the BDI dumpsters. We will need to find an alternate storage location for the transformers.

Clear by 2/10/21

Clear by 2/10/21

Olsson's area will need to be cleared eventually. They are still actively working in the plant so we will find alternate staging areas for dumpsters until this area is clear.

Thank you,

Skyler Rachford

Hi Sam,

Just to keep you in the loop, we pulled three trucks off of route to accommodate the extra hauls. However, when they arrived only 4 of the 14 containers were full.

I think it would be helpful to get my Route Manager and Dispatch connected with a specific contact on site so that the information does not have to flow through too many channels. We attempted to reach out to Skyler but did not receive any call back.

Thanks,
Charlie

Subject: [EXTERNAL] Weights

Hi Skyler,

Thanks again for allowing to meet with you and your team.

Would I be able to get the weights that we gathered doing the test on Friday with the compactor boxes?

Thanks,

Charlie Dietrich

Subject: RE: Weights

Sebright roll off box was 65% full after 6.17 hours. We were running slightly lower rates during this time so normally this box would fill up slightly faster. I'd say 5 hours would be a good change out frequency to start with.

9.74 tons of rejects were in the roll off box when weighed. Roll off box is 5.6 tons empty so total load was 15.3 tons. I'm guessing if we filled up the box all the way we'd get around 15 tons of rejects into it for a total load of about 20 tons.

Hi Paul,

Sorry for missing your call earlier, I just got out of a meeting.

I also want to apologize, it sounds like I misunderstood exactly which dumpsters you needed hauled from your call yesterday. It sounds like Shane got things straightened out for tomorrow.

Thanks,

Charlie Dietrich

Subject: [EXTERNAL] Rejects Disposal

Good morning,

Paul, thank you for your message last night.

I wanted to provide an update on the process and information we discussed the last time we met.

I am actively working with the WUTC (Washington Utilities and Transportation Commission) to get a rate approved for the trucking/bunker proposal. Being the regulated hauler for the area, we have to go through the approval process and vetting in order to start a new type of haul (equipment and material specific). As I have stated before, we are the only hauler allowed to dispose of the rejects which in turn means that our rate has to be analyzed and approved as reasonable by the commission. As soon as the rate is approved I will reach out with the proposal.

In regards to the compactors, I have reviewed the tests we have done with you guys (filling up the compactor and then weighing/dumping) and have a few open questions that we can discuss. My original plan was to present my findings for both scenarios in one packet so that we could come to a final conclusion.

Thanks,

Charlie Dietrich

All,

I have completed the proposal for OCC reject disposal.

Please suggest a few times next week that we can get together and go over it.

I look forward to hearing from you guys,
Charlie

Subject: Rejects Disposal

Good morning,

Paul, thank you for your message last night.

I wanted to provide an update on the process and information we discussed the last time we met.

I am actively working with the WUTC (Washington Utilities and Transportation Commission) to get a rate approved for the trucking/bunker proposal. Being the regulated hauler for the area, we have to go through the approval process and vetting in order to start a new type of haul (equipment and material specific). As I have stated before, we are the only hauler allowed to dispose of the rejects which in turn means that our rate has to be analyzed and approved as reasonable by the commission. As soon as the rate is approved I will reach out with the proposal.

In regards to the compactors, I have reviewed the tests we have done with you guys (filling up the compactor and then weighing/dumping) and have a few open questions that we can discuss. My original plan was to present my findings for both scenarios in one packet so that we could come to a final conclusion.

Thanks,

Charlie Dietrich

Hi Paul,

I appreciate the opportunity to meet last week and further discuss this plan. As I have said from the beginning, we are here to service you in the best and more efficient way possible.

After our discussion, I have the following idea:

Compactor

- The compactor will require 24/7 service, this will take time to procure equipment, labor, and discussions with the transfer station. However, we can start hauling the compactor during regular operating hours. These hours would start around 6:00a and end around 9:00p.
- With the weight of the compactor, for the time being, we will make up for the lighter loads by increasing the frequency that we will haul the container. I anticipate a haul every 3 hours. This would put the hauls for the day around 5.
- Fifteen hours of work would mean the compactor would contain around 24 tons of material. The remaining 45-55 tons would then be put into the drop boxes under the current system.

Drop Box/Semi

- I would like to discuss the possibility of hauling the remaining 45-55 tons with a semi and belt trailer (like discussed in the proposal). I think this would increase the flexibility and efficiency of the disposal process, as well as save costs (see below).

	80 Tot
	24 Tot
	<hr/>
	56 Tot
	5 con
	8 adc
	or
	2 adc
Compactor + Drop Box [Daily]	\$
Compactor + Semi [Daily]	\$

Because 100% of the material will be captured in one of these two methods, Jammie's environmental will need to stop hauling the rejects to the landfill immediately. As discussed, under the UTC tariff, we are the only authorized handler.

Give me a call and we can discuss.

Thanks,

Charlie Dietrich

Subject: [EXTERNAL] FW: OCC Rejects BDI Dumpsters

Good afternoon Kurt,

I just wanted to touch base with you in response to Skylar's email.

I looked at the total number of hauls from April 1st through the 24th and we averaged 8 hauls a day. We average 10-11 hauls on Saturday's, (these numbers do not reflect the containers we could have hauled if they weren't too wet).

As Charlie mentioned, we have hired a couple drivers and they are currently in training. One of which will be dedicated to this project. We have added additional drivers to our Saturday rotation to assist with the current volume.

I'm sure you understand that we had to see what this project was going to entail before adding an additional driver to our headcount. As soon as we saw the volume, we began recruiting for this project.

We are dedicated to our partnership with you.

Thank you,
 Andy

Sam,

Thank you for your email. I will review with my folks and we will reach out.

As a reminder, there have continued to be instances where dumpsters are not able to be hauled because of their water content.

We have hired additional labor and are working to train them and move other labor around with the goal of having one truck and driver completely dedicated to this haul every evening, along with support during the day. We have also been adding additional labor on Saturday as needed.

We continue to adjust as necessary.

Thanks,
Charlie

Charlie and Kris,
Things are moving faster here at the OCC plant and we need your support to keep things running smoothly.

Please read the comments below and review the photo attached.

We need to have a solid plan from you around dumpster management. Skyler is asking to have more dumpsters emptied as a result of increased production.

Can you provide service to empty / replace 7-8 dumpsters per day and ensure that we have 10 empty dumpsters on site before going into Sunday.

Please review this request and information today and then let's plan on talking it through.

Sam

Subject: OCC Rejects BDI Dumpsters

Sam/Mitch/Brian,

We've been running into some issues lately with BDI not keeping up with emptying the rejects dumpsters at OCC. There has been a few occasions where we have had to start dumping rejects on the ground on the south side of the OCC building and just let the rejects pile up against the building because we have no empty dumpsters to deposit the rejects.

This last weekend BDI did not empty enough dumpsters to get us through Sunday when BDI does not operate. At the start of day shift on Sunday (6:30 AM) we had already run out of dumpsters and had to spend the entire day piling the rejects in front of the south side of the building until this morning when BDI resumed hauling the dumpsters away (see the picture attached showing the resulting rejects pile).

We need to push BDI to stay on top of emptying these rejects dumpsters so this doesn't happen again on the future. I think right now they are scheduled to haul 5-6 dumpsters per day. We may need to increase that to 7-8 dumpster per day now that we are up and running at higher production rates. They also need them to ensure that at least 10 dumpsters are empty before going into Sunday so that we can get through the ~36 hour period when they are not servicing the area.

I appreciate your help on this and let me know if there's anything you need from me!

Thanks,

Skyler Rachford

Good afternoon Kurt,

I just wanted to touch base with you in response to Skylar's email.

I looked at the total number of hauls from April 1st through the 24th and we averaged 8 hauls a day. We average 10-11 hauls on Saturday's, (these numbers do not reflect the containers we could have hauled if they weren't too wet).

As Charlie mentioned, we have hired a couple drivers and they are currently in training. One of which will be dedicated to this project. We have added additional drivers to our Saturday rotation to assist with the current volume.

I'm sure you understand that we had to see what this project was going to entail before adding an additional driver to our headcount. As soon as we saw the volume, we began recruiting for this project.

We are dedicated to our partnership with you.

Thank you,
Andy

Sam,

Thank you for your email. I will review with my folks and we will reach out.

As a reminder, there have continued to be instances where dumpsters are not able to be hauled because of their water content.

We have hired additional labor and are working to train them and move other labor around with the goal of having one truck and driver completely dedicated to this haul every evening, along with support during the day. We have also been adding additional labor on Saturday as needed.

We continue to adjust as necessary.

Thanks,
Charlie

Charlie and Kris,
Things are moving faster here at the OCC plant and we need your support to keep things running smoothly.

Please read the comments below and review the photo attached.

We need to have a solid plan from you around dumpster management. Skyler is asking to have more dumpsters emptied as a result of increased production.

Can you provide service to empty / replace 7-8 dumpsters per day and ensure that we have 10 empty dumpsters on site before going into Sunday.

Please review this request and information today and then let's plan on talking it through.

Sam

Subject: OCC Rejects BDI Dumpsters

Sam/Mitch/Brian,

We've been running into some issues lately with BDI not keeping up with emptying the rejects dumpsters at OCC. There has been a few occasions where we have had to start dumping rejects on the ground on the south side of the OCC building and just let the rejects pile up against the building because we have no empty dumpsters to deposit the rejects.

This last weekend BDI did not empty enough dumpsters to get us through Sunday when BDI does not operate. At the start of day shift on Sunday (6:30 AM) we had already run out of dumpsters and had to spend the entire day piling the rejects in front of the south side of the building until this morning when BDI resumed hauling the dumpsters away (see the picture attached showing the resulting rejects pile).

We need to push BDI to stay on top of emptying these rejects dumpsters so this doesn't happen again on the future. I think right now they are scheduled to haul 5-6 dumpsters per day. We may need to increase that to 7-8 dumpster per day now that we are up and running at higher production rates. They also need them to ensure that at least 10 dumpsters are empty before going into Sunday so that we can get through the ~36 hour period when they are not servicing the area.

I appreciate your help on this and let me know if there's anything you need from me!

Thanks,

All,

I hope all is well with you and your team as we head into summer.

Now that we have a few months of operation under our belts, I think now would be a good time to get together and talk about what is working with our service and what is not. I want to make sure the service we are providing is meeting current needs as well as the future. We are committed to our partnership together and are willing to do what it takes to have everything operate smoothly on the disposal side for years to come. Now that we know the volume and the process, there are a few potential ideas we can discuss as to how we can be as efficient as possible while also making the most sense for your bottom line.

Let me know a few times that work for you in the coming weeks and we can meet onsite.

Thanks,

Charlie Dietrich

Subject: [EXTERNAL] Plan - Open Questions

Hi skyler,

I wanted to keep you up to date on the proposal process. I am putting the final touches on a few plans, both for the short term and for the long term, to help solve our problem. Through this, two questions have popped up that I was wondering if I could get some help on?

1. What is the lead time and process to get a designated area onsite to be approved as a bunker/holding area?
2. What is the process/lead time to get onsite approval to bring in a loader and have one of our employees operate it?

Thanks,
Charlie

Hi Charlie,

Please see my responses below:

1. What is the lead time and process to get a designated area onsite to be approved as a bunker/holding area?

should be pretty quick, we already had a contractor come out and look at the area and they are working on an estimate to install a bunker. After we get costs it should be approved pretty quickly if that the route we decide to go.

2. What is the process/lead time to get onsite approval to bring in a loader and have one of our employees operate it?

This should be pretty quick as well. Not sure of the total process but have seen this happen pretty quickly in the past. I think just a liability agreement needs to be signed and we should be good to proceed.

BDI would like to get together to discuss a rejects handling proposal. Seems like they are proposing a very similar set-up to Jammies. Maybe would hurt to get a competitive quote?

Should I set-up a meeting for next week?

Subject: FW: Plan - Open Questions

BDI would like to get together to discuss a rejects handling proposal. Seems like they are proposing a very similar set-up to Jammies. Maybe would hurt to get a competitive quote?
Should I set-up a meeting for next week?

Skyler,

Thanks for the quick response and the information! Is there a time next week we can get together onsite (along with whomever on your side should be involved) to go over potential plans and steps forward? I am generally open and am willing to make whatever is convenient for you all, work.

Thanks!
Charlie

Subject: RE: Plan - Open Questions

As much as I do not want to use BDI, it makes sense to at least hear what they are proposing.

Subject: FW: [EXTERNAL] MARCH BILLING
Attachments: 20210413_123258_1924900.html

Original

Quoting from BDI

Delivery \$0.00

20YD Haul \$110.28

Disposal pass through / TON \$53.25 / TON

Mileage \$3.21 / mile after 5 miles.

Total Per Haul Cost \$660.24

I counted 140 hauls during the month of march. Based on original quote of \$660.24 this comes out to \$92,433 which only suggests that on average we were shipping less than 9 tons per haul.

Total of attached invoice for March 2021 OCC \$87,414.79

Samuel Holm

Subject: FW: [EXTERNAL] MARCH BILLING

Original
Quoting from BDI

Delivery \$0.00
20YD Haul \$110.28
Disposal pass through / TON \$53.25 / TON
Mileage \$3.21 / mile after 5 miles.
Total Per Haul Cost \$660.24

I counted 140 hauls during the month of march. Based on original quote of \$660.24 this comes out to \$92,433 which only suggests that on average we were shipping less than 9 tons per haul.

Total of attached invoice for March 2021 OCC \$87,414.79

Paul,

I apologize for the delay, Monday is a very hectic day. I have listed the pricing below:

Delivery	\$56.50
20yd Haul	\$110.00
Weight	\$51.96 per ton

Mileage \$3.20 per mile after 5 miles

The pricing is per each container. Please let me know if you have any questions.

Thank you,

Kris May

Subject: BDI Dumpster Capacity

Kris,

I had a couple questions about the dumpster load capacity for our OCC Plant:

1. Does the 10 ton load capacity include the weight of the dumpster, or had this been compensated for already and we can put up to 10 tons of waste into the dumpster?
2. The special dumpster for the seabright press is a structurally reinforced, enclosed, 35 yd dumpster. BDI has installed their custom undercarriage so they can be hauled on your trucks. These dumpsters weigh close to 6 tons. Does this mean that we can only put 4 tons into these dumpsters for them to get hauled?
3. How much do the 20 and 30 yd dumpsters weigh?

Thanks,

Subject: BDI Dumpster Capacity

Kris,

I had a couple questions about the dumpster load capacity for our OCC Plant:

1. Does the 10 ton load capacity include the weight of the dumpster, or had this been compensated for already and we can put up to 10 tons of waste into the dumpster? The 10 ton load capacity is what our trucks can carry, so it does include the weight of the dumpster.
2. The special dumpster for the seabright press is a structurally reinforced, enclosed, 35 yd dumpster. BDI has installed their custom undercarriage so they can be hauled on your trucks. These dumpsters weigh close to 6 tons. Does this mean that we can only put 4 tons into these dumpsters for them to get hauled? That is correct, it would have to be 10 ton, subtract the weight of the dumpster = weight of waste we can haul.
3. How much do the 20 and 30 yd dumpsters weigh? The dumpsters we provide weigh less than 1 ton.

Thanks,

Subject: [EXTERNAL] CONTAINER DELIVERIES

Skylar,

Per our phone conversation, I have 2 open top 20yd containers scheduled for delivery for tomorrow. This will give you a total of 7 of the 20yd containers for your March 1st start date. Once we get a couple of hauls going we will have a better idea of the weight of the loads and at that time will have more containers in our inventory to send your way as needed.

Please let us know if you have any questions and have a great evening!

Thank you,

Subject: OCC Plant Dumpsters

Kris,

Can we get another delivery set-up for dumpsters at the OCC Plant?

I would like to have 17 dumpsters on site before our Plant Start-Up on March 1st. We currently have 7 that have been delivered, so will need 10 more delivered to be allocated for process rejects. If you do not have any 20 yd dumpsters available, 30 yd will be acceptable.

Thanks,

Skyler Rachford

Subject: OCC Rejects

Richard,

If my memory serves me right, you mentioned that BDI would be able to haul PCA OCC rejects in a similar manner as Jammies (big truck straight to the landfill). Could you give us a quote for this type of service and BDI handling all of our rejects. I am guessing you will have questions – please direct them to Kasey Markland, she is copied on this email.

Thank you.

Kurt

Kris,

The plant start-up has been pushed back to tomorrow or possibly Wednesday due to a few road blocks that needed to be addressed.

I appreciate you checking in. I will keep you updated on the plant start up date and our waste disposal needs.

Have a great day!

Skyler

Subject: dumpsters hauling

Charlie / Kris

Wanted to let you know that Kasey has communicated they are filling dumpsters so I would like for BDI to start making runs to haul the filled dumpsters. As you recall during our conversations, we expect to be filling anywhere from 6 – 8 dumpsters per day so we need you guys to remove those and bring empties. Now would be a good time to start that process.

Let me know your thinking and when we can expect to start seeing a flow of dumpsters.

Thanks.

BASIN
disposal

January 17th, 2022

Kurt Thorne
Kasey Markland

Re: OCC Rejects - Disposal

To whom it may concern:

Thank you for the continued opportunity to discuss the various options of disposal for the material produced at the PCA processing plant. The partnership Basin Disposal has with PCA has been a rewarding one.

We have assembled a quote to haul the OCC rejects from your site in Wallula to the Finley Buttes Regional landfill in Boardman, Oregon. This haul will be regulated and fall under the jurisdiction of the UTC under the Basin Disposal Tariff. While this stipulation requires that Basin Disposal performs the haul and disposes of the waste, it is also required to only charge a vetted and analyzed price based on the service and the reasonableness of the charge.

Upon acceptance of this proposal, we will work to establish applicable target dates and begin procuring equipment.

Sincerely,

Basin Disposal, Inc.

PCA

OCC Rejects - Disposal

January 17th, 2022

Table of Contents

SERVICE OPTION.....	2
TARIFF PAGES	3
CONCLUSION	6

SERVICE OPTION

We are proposing the usage of a tractor and refuse trailer combination to more efficiently haul the OCC rejects produced by the PCA mill. Below you will find the detailed equipment we are looking to purchase and the pricing for each haul.

Tractor and Refuse Trailer

Equipment and Personnel

- Tractor Semis
- 53 ft. Refuse Trailers
- Bunker to store the material
- Loader
- Basin Disposal personnel to fill and shuttle trailers

Service

- 2-3 hauls to the landfill
 - Ability to increase capacity as needed
- Bunker maintained and managed by Basin Disposal
- Trailers loaded by Basin Disposal using a loader and Tink bucket
 - Trailers will be loaded on the weekends to minimize exposed product.

Pricing (subject to tariff adjustments)

- \$527.81 per haul
 - 5 hr. maximum, \$117.29 for each additional hr.
- Item 230 disposal (see tariff)
- \$84.74 hourly labor rate for onsite personnel

TARIFF PAGES

Below are portions of the Tariff the UTC of Washington has with Basin Disposal, Inc. that show the applicable rates to this haul. These rates are subject to CPI adjustments.

RECEIVED NOV 16, 2020 WA. UT. & TRANS. COMM. ORIGINAL TG-200931

Tariff No. <u>94</u>	2. Original Page No. <u>25</u>
