Subject: Thank you for protecting WA's Clean Energy Future
Date: Monday, December 2, 2019 11:22:53 PM

Dear Washington UTC,

Energy generation and management will someday have to become sustainable. The time for those steps is past but now is better than later with much infrastructure that isn't designed to best serve sustainably generated energy. I believe if the utilities are left untethered that they will chose systems that best serve short term profits. They; We need long term vision, planning and action that is transparent to the voting public and not left to the board rooms of for-profit corporations. Let's learn from the fires of California where infrastructure was left in the hidden hands of profiteers.

This is a comment for Docket # UE 190698.

As a Washington State ratepayer, I am strongly in support of effective public accountability and engagement for investor-owned utilities. I am excited for Washington's Clean Energy Transformation Act (CETA) to take effect, and appreciate your role in making sure that the implementation of this law delivers on its intended vision of a state powered by 100% clean energy.

With that in mind, I would like to make a comment on the importance of public participation in energy planning. Integrated Resource Plans have been a powerful tool for public input here in Washington State, and it has allowed customers to advocate for clean, transparent, and equitable energy decisions. These planning sessions are one of the few oversight and watchdog opportunities we get. Please keep the requirement that they happen every two years rather than every four, as proposed.

As a ratepayer and concerned resident, I thank you for representing my interests and making sure utilities are accountable to the public.

Sincerely,

Casey McCarty
