Fixed Broadband Subscription – Interactive Data Entry

For each census tract in which you have fixed broadband subscribers in service and for each service offering you sell, enter the total number of connections and the number of connections you provide to consumers. Rows must be unique by census tract and service offering (the State, County and Tract **together** uniquely define a particular census tract and the Technology, Downstream Bandwidth and Upstream Bandwidth **together** uniquely define a service offering).

Technology categories: Report any Ethernet over fiber connections as "Optical Carrier" and any Ethernet over copper connections as "Other Wireline." Do not report these connections in the "All Other" category.
