

## COMPARISON OF PAC-WEST'S FX SERVICE TO QWEST'S FX SERVICE

	<b>Characteristic</b>	<b>Pac-West Service</b>	<b>Qwest Service</b>
1	Does the service include a transport connection between the customer's location and the carrier's network (that is, the carrier providing the FX service)?	YES – but it can be unbundled and purchased by the customer from a 3d party if the customer desires.	YES
2	Does the customer pay its carrier for the transport?	YES – if the customer obtains its transport from Pac-West	YES
3	Can the customer make “locally-dialed” calls to other customers?	YES	YES
4	Can the customer make “toll-dialed” calls to other customers?	YES	YES
5	Are toll-dialed calls subject to equal access requirements	YES	YES
6	Are locally-dialed calls subject to equal access requirements	NO	NO
7	Is 8YY dialing required to call the customer	NO <sup>1</sup>	NO
8	Is the vendor's switch located in the same physical rate center as the NPA-NXX served by that switch?	Not necessarily	?
9	Are locally-dialed FX calls exchanged over the same interconnection facilities as locally-dialed non-FX calls?	YES	YES
10	Are the interconnection costs different for locally-dialed FX calls compared to locally-dialed non-FX calls	NO	NO

<sup>1</sup> The customer may optionally purchase 8YY service from a carrier and direct the calls to the FX number, but the 8YY service is separate from the FX service. Pac-West assumes the same is true for Qwest's 8YY service.
