

Comments on Puget Sound Energy's Integrated Resource Plan  
By Louis P. Richard  
August 24, 2013

Please eliminate coal as a source of electric power generation. Coal is a very dirty resource, and produced more than its share of carbon dioxide, which ends up in the atmosphere and is a major cause of global warming. Our family has done everything we can to limit our own carbon footprint including the following: 40 solar panels on our roof, heat pump, drive a Prius, planted over 200 trees on our property. Thank you for your efforts to eliminate coal from our power sources.
