

## Bellevue College supports a Coal-Free PSE

We, the undersigned, as students and staff of Bellevue College, and as customers of Puget Sound Energy, formally request that PSE divests and abandon the operation of coal-fired power plants. Nearly one-third of the energy provided to PSE's clients originates from coal-fired power plants, such as the PSE-owned Colstrip Generating Station; emitting toxins that injure public health and the environment. As signatories, we petition for Puget Sound Energy to relinquish its relationship with all coal-fired power plants.

# Bellevue College supports a Coal-Free PSE

We, the undersigned, as students and staff of Bellevue College and as customers of Puget Sound Energy, formally request that PSE divests and abandon the operation of coal-fired power plants. Nearly one-third of the energy provided to PSE's clients originates from coal-fired power plants, such as the PSE-owned Colstrip Generating Station; emitting toxins that injure public health and the environment. As signatories, we petition for Puget Sound Energy to relinquish its relationship with all coal-fired power plants.

# Bellevue College supports a Coal-Free PSE

We, the undersigned, as students and staff of Bellevue College and as customers of Puget Sound Energy, formally request that PSE divest and abandon the operation of coal-fired power plants. Nearly one-third of the energy provided to PSE's clients originates from coal-fired power plants, such as the PSE-owned Colstrip Generating Station; emitting toxins that injure public health and the environment. As signatories, we petition for Puget Sound Energy to relinquish its relationship with all coal-fired power plants.
