Carole Washburn
Executive Secretary
WUTC

        SBC Telecom is coordinating a business arrangement with a customer (City
of Kirkland) that requires a NEW block of 1000 consecutive DID numbers, out
of the Kirkland rate center, as they install a new PBX and new dialing plan
with a service date of August 2004.

Although SBCT has an assigned "0" thousand block, out of NPA/NXX 425-587, in
the Kirkland rate center, LATA 674, this block does not meet the customer's
requirements.   The City of Kirkland cannot use numbers starting with "0" for
their PBX extensions.

SBCT wishes to serve this customer and can only do so by requesting a NEW
growth block in a block range that satisfies the customer's needs.   Since
SBCT does not meet the 75% utilization and Months to Exhaust requirements out
of our "0" block our only alternative is to ask state regulatory to grant
SBCT permission to use the State Waiver Option to request a growth block for
this customer. SBCT has determined that we cannot return or exchange our
existing "0" block for an acceptable block since we have customers working
out of this block.

I have reviewed the Available Blocks Report for this rate center and as of
today Neustar's system shows available blocks out of this rate center to meet
this customer's request. Either the assignment of the "2" or "3" thousand
block out of our existing NPA/NXX code 425-587 will work for this customer.

SBCT's potential plan is to have the customer's numbers available to meet a
requested August service date.

My plans are to submit the Growth Block request forms (Part 1A & 1B)
through PAS to Neustar on Friday, July 9, 2004. I understand Neustar will
need from the WUTC written approval before working this request.

I am available to answer any questions you may have regarding this matter.
Your time and information given thus far is appreciated.

We look forward to your response and your submission to Neustar granting
approval for this request.

Thank you.
