SECTION 5.0 - COMPLEX VOICE SERVICES, (CONT'D.)

5.1 General, (Cont'd.)

5.1.11 As an alternative to local channels provided by the Company, the Customer may provide its own local channels or obtain such channels from an alternative access vendor (i.e. "Customer Provided Access"). Such interconnection of Company provided services with Customer Provided Access facilities is described in Section 7.1 of this price list. (N)

WA Price List No. 2
2nd Revised Page No. 54
Cancels 1st Revised Page No. 54**SECTION 6.0 - PRIVATE LINE SERVICE****6.1 Service Description**

BellSouth[®] Long Distance Private Line service provides Customers with dedicated circuits connecting distant locations on the Company's network. Service is offered on a non-switched, dedicated basis. A given circuit is provided to a single Customer for the Customer's exclusive use twenty-four hours per day, seven days per week. Private Line service is offered between Company Points of Presence (POPs) subject to the availability of services and facilities and available network capacity.

Local access channels and related facilities that may be required in conjunction with Private Line service are not included herein. Service descriptions, rates and charges for local access channels and related facilities offered by the Company may be found in Section 7 of this price list. As an alternative to local channels provided by the Company, the Customer may provide its own local channels or obtain such channels from an alternative access vendor (i.e. "Customer Provided Access"). Such interconnection of Company provided services with Customer Provided Access facilities is described in Section 7.1 of this price list.

Private Line service includes DS-0, DS-1, Fractional DS-1, DS-3 and OC-n capacity digital transmission services and may be used to transmit both voice and data communications. These services utilize dedicated access arrangements on both the Originating and Terminating ends of each circuit. Charges are billed in advance. Service is subject to the availability of facilities.

6.1.1 The Company offers the following Private Line services:

- (A) **DS-0 service** - a digital transmission service operating at speeds of 56 or 64 Kilobits per second (Kbps). Service can be delivered via analog or digital access (local loop) facilities
- (B) **DS-1 service** - a digital transmission service operating at 1.544 Megabits per second (Mbps).
- (C) **DS-3 service** - a digital transmission service operating at speeds of 44.736 Mbps.
- (D) **OC-n service** - a broadband digital transmission service.
- (E) **Fractional DS-1 service:** provides point-to-point (Customer premises to Customer premises) connectivity at speeds of 2 to 23 DS-0 circuits. The service is supported in 56/64 kbps increments. The Fractional DS-1 service can be delivered via DS-1, DS-3 or OC-n access.

BELLSOUTH LONG DISTANCE, INC.

WA Price List No. 2
1st Revised Page No. 70
Cancels Original Page No. 70**SECTION 7.0 - DEDICATED ACCESS SERVICE, (CONT'D.)****7.1 Service Description, (Cont'd.)**

As an alternative, the Customer may provide its own Dedicated Access service from another access vendor, ("Customer Provided Access"). Customer Provided Access allows the Customer to provide its own local access (local channel) via a local exchange carrier (LEC) or other vendor provided the vendor has entrance facilities into the BellSouth Long Distance Network Access Point of Presence ("NAP"). BellSouth Long Distance is responsible for all network components with the exception of the Customer provided local channel.

If the Customer chooses to provide its own access facility in conjunction with BellSouth Long Distance services, the Customer has the sole responsibility to acquire, coordinate the delivery, and maintain the access facility. The BellSouth Long Distance Customer Resource Center ("CRC") will provide the Customer with a "Letter of Authorization" ("LOA") and a "Channel Facility Assignment" ("CFA") to facilitate the delivery of the local channel by the Customer's Access vendor.

Rates and charges for Customer Provided Access are contained in Section 7.5.

Customers can order a basic channel and select, from a list of available transmission parameters and channel interfaces, those that they desire to meet specific communications requirements. For purposes of ordering channels, each is identified by type of service. However, such identification is not intended to limit a Customer's use of the channel nor to imply that the channel is limited to a particular use. Following is a brief description of each type of channel offered by the Company:

DS-0 Analog - a voice grade channel which provides voice frequency transmission capability in the nominal frequency range of 300 to 3000 Hz and may terminate as a two-wire or four-wire facility. Analog DS0 access service is provided between the Customer premises and the Company Point of Presence.

Digital Data Service Access - a channel for duplex four-wire transmission of synchronous serial data at the rate of 56.0 or 64.0 kbps. Transmission speeds of 56.0 and 64.0 kbps are referred to as high speed Digital Data Service (DDS) options. The actual bit rate is a function of the channel interface selected by the Customer.

DS-1 - a channel for the transmission of nominal 1.544 Mbps isochronous serial data. The actual bit rate is a function of the channel interface selected by the Customer.

DS-3 - a channel for the transmission of nominal 44.736 Mbps isochronous serial data. A DS-3 channel has capacity for 28 DS-1 channels.
