

**NOTICE  
PACIFIC POWER**

Pursuant to Washington Law (including without limitation RCW 80.28.050 and –060) and the Washington Utilities and Transportation Commission's ("Commission") Rules & Regulations (including without limitation WAC 480-80-121), Pacific Power has filed with the Commission an original tariff schedule for electric service in the State of Washington.

**Overview**

The purpose of this filing is to propose the cancellation of Tariff Schedule No. 108, Energy Star New Homes Incentive Program. In late 2007, the Company issued a request for proposals seeking input on how to improve the Company's energy efficiency measures offered for new homes. Upon receipt of the proposals, the Company analyzed the responses and developed a proposal which was communicated to the Washington Demand Side Management Advisory Group (DSM Advisory Group) at their October 7, 2008 meeting. The proposal included the following:

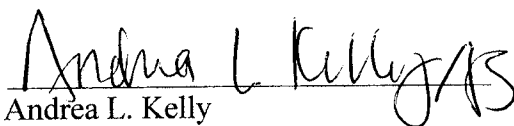

- Add energy efficiency measures for new homes to the existing Home Energy Savings program, Tariff Schedule No. 118.
- Cancel the Energy Star New Homes program offered under Tariff Schedule No. 108 after the measures for new homes are made available through the Home Energy Savings program.

On February 25, 2009, the Company emailed the DSM Advisory Group to review the proposed changes previously discussed at the October 2008 meeting and request comments. As no comments opposing the proposed changes were received, the energy efficiency measures for new homes were added to the existing Home Energy Savings program on April 1, 2009. The new homes measures added to the Home Energy Savings program include both a whole home package which meets Energy Star certification requirements and individual measures. Further details on the new homes measures offered through the Home Energy Savings program can be found at: <http://www.homeenergysavingspp.net/washington/homes.html>. The Company is now requesting the cancellation of the Energy Star New Homes program, offered through Schedule 108.

The Company respectfully requests approval by June 17, 2009

DATED: May 15, 2009

PACIFIC POWER
