

**REPORTS AS SPECIFIED IN WAC 480-123-070
AND WAC 480-123-080**

Inland Cellular Telephone Company, as general partner of and on behalf of Eastern Sub-RSA Limited Partnership (d/b/a Inland Cellular)(the "Company") hereby submits the following reports in accordance with WAC 480-123-070 and WAC 480-123-080, with respect to its operations within the State of Washington.

Report 1 - WAC 480-123-070(1)(a): For the period January 1 through December 31, 2008, the Company upgraded 2 cellular sites with equipment to increase capacity and efficiency at an approximate cost of \$388,000. Operating expenses, excluding the cost of handsets, roaming and toll expenses, for the same time period were approximately \$3,480,000.

Report 2 - WAC 480-123-070(1)(b): These investments and expenses should enable the Company to provide increasingly better service quality, coverage, capacity and clearer signals throughout the Company's service area, thereby decreasing the potential for dropped calls or no service. Expenses directly associated with regulatory compliances for E911, plant operations, switching, maintenance, engineering and obtaining facilities from local exchange carriers and depreciation expenses comprise approximately \$2,074,000 of the expense figure set forth in Report 1 above.

Report 3 - WAC 480-123-070(2): For the period January 1 through December 31, 2008, the Company reports that it experienced the following local service outages:

- 1) On January 16, the Company experienced a microwave failure at its Reiman site. The outage was for approximately three (3) hours and primarily affected mobile customers; site is along I-90 between Moses Lake and Ritzville. Any customers that may have been affected were then defaulted to roam on wireless competitors during the outage.
- 2) On January 16, the Company experienced a microwave failure at its Davenport site. The outage was for approximately three (3) hours and may have affected approximately 147 customers in the Davenport area; these customers also receive service from the over-lapping the Teal Hill and Reardon sites. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 3) On January 28, the Company experienced a control channel failure at its Teal Hill site. The outage was for approximately two (2) hours and the Company is uncertain of the customers affected since the control channel was for analog service only. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 4) On February 4, the Company experienced a control channel failure at its Teal Hill site. The outage was for approximately two (2) hours and the Company is uncertain of the customers affected since the control channel was for analog service only. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.

- 5) On March 21, the Company experienced a control module failure at its Moses Lake West site. The outage was for approximately three (3) hours and may have affected approximately 1,574 customers in the Moses Lake area. This area has over-lapping coverage from the Wheeler site. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 6) On March 25, the Company experienced a control module failure at its Moses Lake West site. The outage was for approximately three (3) hours and may have affected approximately 1,574 customers in the Moses Lake area. This area has over-lapping coverage from the Wheeler site. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 7) On April 1, the Company experienced a control module failure at its Hartline site. The outage was for approximately four (4) hours and it may have affected 152 customers; the site has over-lapping coverage from the Jackwood site. Any customers that may have been affected were then defaulted to roam on wireless competitors during the outage.
- 8) On April 7, the Company experienced a control module failure at its Wheeler site. The outage was for approximately three (3) hours and it is unknown how many customers were affected. The site is between Moses Lake and Ritzville along I-90. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 9) On August 19, the Company experienced a power outage at its Washtucna site. The outage was for approximately five (5) hours and affected approximately 53 customers. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 10) On September 24, the Company experienced a control channel failure at its Sprague site. The outage was for approximately two (2) hours and the Company is uncertain of the customers affected since the control channel was for analog service only. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.

Report 4 - WAC 480-123-070(3): For the period January 1 through December 31, 2008, the Company reports zero (0) instances where it failed to provide service within its designated service area.

Report 5 - WAC 480-123-070(4): For the period January 1 through December 31, 2008, the Company did not receive from the Federal Communications Commission or the Consumer Protection Division of the Attorney General of the State of Washington any complaints against the Company made by the Company's customers concerning the services provided to its customers.

Report 6 - WAC 480-123-080(1)(a): As it is known to the Company at the date of this Report, the following is the planned use of federal support related to Washington state that is anticipated to be received from any category in the federal high-cost fund by the Company during the period October 1, 2009 through September 30, 2010:

The Company is budgeted to add 6 new cellular sites that include microwave back-bone facilities and upgrade approximately 10 additional cellular sites at an estimated cost of \$2,940,000. Since the Company makes additions from operating revenue generation, some of these additions are carry-overs from the previous year. The Company estimates that operating expenses, excluding cost of handsets, roaming and toll expenses, will be approximately \$4,008,000.

Report 7 – WAC 480-123-080(2): The budgeted investments and expenses should enable the Company to provide increasingly better service quality, coverage, capacity and clearer signals throughout the Company's service area, thereby decreasing the potential for dropped calls. Expenses directly associated with regulatory compliances for E911, plant operations, switching, maintenance, engineering and obtaining facilities from local exchange carriers and depreciation expenses comprise approximately \$2,468,000 of the expense figure set forth in Report 6 above.
