Re: Inland Telephone Company d/b/a Inland Networks

Dear Mr. Danner:

Enclosed you will find the original and three copies of new tariff WN U-7. This tariff combines and supersedes in their entirety the prior local service tariffs filed as Inland Telephone Company WN U-5 and Prescott Telephone & Telegraph Company WN U-5.

The primary purpose of this filing is to combine the preexisting tariffs into one modern tariff and recognize the business name of Inland Networks. This tariff replaces the masculine pronoun with gender-neutral language; removes definitions that were no longer used; and clarifies some language in Definitions and Conditions and Rules.

It should be noted that in Schedule 5, Nonrecurring charges have been adjusted. The NSF check charge has been increased from \$10.00 to \$30.00. Some of the other nonrecurring charges have been reduced. The net effect on the Company is no additional increase in revenue. A customer notice will be provided to customers informing them of the changes in the NSF check charges and other nonrecurring charges if this tariff is approved. The customer notice will be provided before any customer is assessed a revised nonrecurring charge.

This filing also expands Message Rate Service offering to the Company's areas that did not have that service before.
