## 5. Exchange Services

### 5.4 Premium Exchange Services

#### 5.4.3 Custom Calling Services

##### B. Definitions (Cont'd)

##### Scheduled Forwarding

A function which allows all incoming calls to be forwarded to another telephone number. It allows a customer to remotely change the termination of their incoming calls and base the termination upon a time schedule. From any tone signaling telephone, the customer can activate, deactivate, or change the times, days and destination numbers.

##### Speed Call

A function that allows a customer to assign and dial abbreviated codes to frequently called numbers. The customer has the option of a list of 8 or 30 numbers.

##### 3-Way Calling

A feature providing the capability to add a third party to an existing conversation.

##### Warm Line Service

Allows a customer to establish a switched connection to a predetermined number if the customer does not dial a number within a specified length of time after going off-hook. When the customer's telephone goes off-hook and dialing begins within a specified time delay period, the call will proceed normally as dialed. If dialing has not started before the end of the predefined time delay period, a predetermined stored number is automatically dialed by the central office switching equipment.

##### Outbound Call Block Feature

**Blocks all outbound dialing with the exception of abbreviated dialing for 911 (Emergency Reporting Services) and 711 (Service for Telecommunications Relay Services). In addition, all pay-per-use features are blocked. All other Custom Calling Service features and Custom Calling II Services features are prohibited with the use of this feature and lines equipped with this feature will not have a directory listing. This feature is subject to the availability of facilities and is only available to flat rate business and residence One-Party Access Line customers.**
