

**REPORTS AS SPECIFIED IN WAC 480-123-070
AND WAC 480-123-080**

Inland Cellular Telephone Company, as general partner of and on behalf of Eastern Sub-RSA Limited Partnership (d/b/a Inland Cellular)(the “Company”) hereby submits the following reports in accordance with WAC 480-123-070 and WAC 480-123-080, with respect to its operations within the State of Washington.

Report 1 - WAC 480-123-070(1)(a): For the period January 1 through December 31, 2009, the Company made no capital improvements. Operating expenses, excluding the cost of handsets, roaming and toll expenses, for the same time period were approximately \$3,570,000.

Report 2 - WAC 480-123-070(1)(b): These investments and expenses should enable the Company to provide increasingly better service quality, coverage, capacity and clearer signals throughout the Company’s service area, thereby decreasing the potential for dropped calls or no service. Expenses directly associated with regulatory compliances for E911, plant operations, switching, maintenance, engineering and obtaining facilities from local exchange carriers and depreciation expenses comprise approximately \$2,016,000 of the expense figure set forth in Report 1 above.

Report 3 - WAC 480-123-070(2): For the period January 1 through December 31, 2009, the Company reports that it experienced the following local service outages:

- 1) On March 16, the Company experienced a core failure at its Odessa site. The outage was for approximately two (2) hours and may have affected approximately 145 customers in the Odessa area; these customers also receive service from the overlapping the Wilson Creek, Reiman and Harrington sites. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage. primarily affected mobile customers; site is along I-90 between Moses Lake and Ritzville. Any customers that may have been affected were then defaulted to roam on wireless competitors during the outage.
- 2) On March 18, the Company experienced a control module failure at its Lind site. The outage was for approximately four (4) hours and may have affected approximately 41 customers in the Lind area; these customers also receive service from the over-lapping the Lind East, Reiman , Woodward and Cunningham sites. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 3) On March 20, the Company experienced a core failure at its Moses Lake West site. The outage was for approximately one (1) hour and may have affected approximately 1,785 customers in the Moses Lake area. This area has over-lapping coverage from the Wheeler site. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.

- 4) On May 21, the Company experienced a control module failure at its Moses Lake West site. The outage was for approximately four (4) hours and may have affected approximately 1,785 customers in the Moses Lake area. This area has over-lapping coverage from the Wheeler site. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 5) On May 28, the Company experienced T1 failure on the Qwest T1 at its Coulee City site (the T1 links the site to the back-bone). The outage was for approximately twelve (12) hours and affected approximately 261 customers. All customers that were affected were then defaulted to roam on wireless competitors during the outage.
- 6) On June 10, the Company experienced a core failure at its Stratford site. The outage was for approximately five (5) hours and it may have affected approximately 49 customers; the site has over-lapping coverage from Coulee City and Wilson Creek sites. Any customers that may have been affected were then defaulted to roam on wireless competitors during the outage.
- 7) On July 17, the Company experienced a control module failure at its Harrington site. The outage was for approximately two (2) hours and may have affected approximately 214 customers in the Harrington area; these customers also receive service from the over-lapping the Odessa, Davenport and Sprague sites. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.
- 8) On December 29, the Company experienced a control module failure at its Ritzville site. The outage was for approximately four (4) hours and may have affected approximately 140 customers in the Ritzville area; these customers also receive service from the over-lapping the Reiman, Lind East and Sprague sites. For those customers that were without service from the Company, these customers were then defaulted to roam on wireless competitors during the outage.

Report 4 - WAC 480-123-070(3): For the period January 1 through December 31, 2009, the Company reports zero (0) instances where it failed to provide service within its designated service area.

Report 5 - WAC 480-123-070(4): For the period January 1 through December 31, 2009, the Company did not receive from the Federal Communications Commission or the Consumer Protection Division of the Attorney General of the State of Washington any complaints against the Company made by the Company's customers concerning the services provided to its customers.

Report 6 – WAC 480-123-080(1)(a): As it is known to the Company at the date of this Report, the following is the planned use of federal support related to Washington state that is anticipated to be received from any category in the federal high-cost fund by the Company during the period October 1, 2010 through September 30, 2011:
The Company is budgeted to add 5 new cellular sites that include microwave back-bone facilities and upgrade approximately 10 additional cellular sites at an estimated cost of \$2,940,000. Since the Company makes additions from operating revenue generation, some of these additions are carry-overs from the previous year. The Company estimates

that operating expenses, excluding cost of handsets, roaming and toll expenses, will be approximately \$3,871,000.

Report 7 – WAC 480-123-080(2): The budgeted investments and expenses should enable the Company to provide increasingly better service quality, coverage, capacity and clearer signals throughout the Company's service area, thereby decreasing the potential for dropped calls. Expenses directly associated with regulatory compliances for E911, plant operations, switching, maintenance, engineering and obtaining facilities from local exchange carriers and depreciation expenses comprise approximately \$2,252,000 of the expense figure set forth in Report 6 above.

Dated: July 30, 2010
