RATES FOR PURCHASE OF ENERGY – For the term of the power purchase agreement, the monthly rate per kWh which the Company will pay for energy supplied to the Company by the Customer-Generator, at Customer-Generator's one-time choice, will be (1) a) the Production Proxy Price or, b) the Market Price, whichever is lower, less 5.0% for balancing costs or (2) the Fixed Price per MWh as specified below which reflects a 5% reduction for balancing costs.

The Production Proxy Price is the Heat Rate of a combustion turbine times the Forward Gas Price divided by 1000, where the Heat Rate is equal to 10.2, and the Forward Gas Price is equal to the "first of the month" index price for Northwest Pipeline – Sumas as reported in Inside FERC Gas Market Report.

The Market Price is the hour-weighted average of the "Non-Firm On-Peak", "Non-Firm Off-Peak" and "Sunday and NERC Holidays" of the Dow Jones Mid-Columbia Electricity Price Index for each day of the relevant billing Month divided by 1000.
