6. SWITCHED ACCESS SERVICE

6.7 RATE REGULATIONS

6.7.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES (Cont'd)

D. Application of Rates

1. Tandem Switched Transport and Local Switching usage rates are applied per access minute of use.
2. The terminating Local Switching rate applies to all terminating access minutes of use.
3. The originating Local Switching rate applies to all originating access minutes of use.

5. The Telephone Company will provide written notification to all access customers of record within a particular local calling area that an end office in that local calling area is scheduled to be converted to an equal access end office. This notification will be sent, via certified U.S. Mail, to each customer of record in the local calling area where the conversion is scheduled to occur, at least six months in advance of the conversion date.

The customer will have the choice of converting existing services to equal access (i.e., originating and terminating Feature Group D) at no charge pursuant to the conditions set forth in 6.7.4., following, or retaining the existing services.

B. End Office Shared Port

- Originating 0.000590
- Terminating 0.000428

(T)

**MONTHLY
RATES**

C. End Office Dedicated Trunk Port[1]

- Per DS0 \$ 4.83
- Per DS1 100.00

(T)

[1] The End Office Dedicated Trunk Port rate was calculated assuming a 50/50 split of the originating and terminating traffic using this flat-rated port. The FCC in their FCC 11-161 ICC Transformation order in section 51.907(d)(1) allowed Price Cap Carriers to use an equal split to divide the charge between originating and terminating elements. When the terminating portion of the rate is reduced and then combined with the originating portion of the rate a single flat rate is generated for billing purposes. The Originating portion of the DS0 charge is \$2.42 and the Originating portion of the DS1 charge is \$50.00.
