COMMISSION

Dear Mark Johnson:

Cedar Grove Composting is proposing an increase to contamination fees for yard waste disposal effective February 1, 2019. Sound Disposal Inc received a letter from Cedar Grove informing them of the upcoming fee increase to the regulatory/sorting to \$14.06 per ton due to high level of contamination. We are asking to pass this on to all our yard/food waste customers. The company's usual consultant was unable to file on behalf of the company, and the company put the filing together with help from staff. The increase affects only yard waste customers and is not a general rate increase under WAC 480-07-505(3).

Sincerely,

Norman Nicholson

Operations Manager
