Cliff, just a heads up as an excavator you are required to mark the boundary in white paint. I know some utilities refuse to do locates without "White Paint" and they are well within their rights to do so. And for us being a High pressure jet fuel line we need to know where you plan on doing your work even if it just for a real estate sign. I have attached the RCW below.

RCWs > Title 19 > Chapter 19.122 > Section 19.122.030

19.122.027 << 19.122.030 >> 19.122.031

RCW 19.122.030

Excavator and facility operator duties before excavation

(1)(a) Unless exempted under RCW 19.122.031, before commencing excavation of an excavation area with white paint applied on the ground of the worksite to all facility operators through a one-number locator service.

(b) If boundary marking required by (a) of this subsection is infeasible, the excavator shall advise facility operators to ensure that the boundary of the excavation area is accurately marked.

(2) An excavator must provide the notice required by subsection (1) not less than ten business days and not more than ten business days before the scheduled start of the excavation by the excavator and facility operators. If an excavator intends to work in an excavation area, the excavator shall take reasonable steps to confer with facility operators to enable them to excavate the excavation area for each phase of the work.

(3) Upon receipt of the notice provided for in subsection (1) of this section, the facility operator shall:

(a) The facility operator's locatable underground facilities, provide information as to their location;

(b) The facility operator's unlocatable or identified but unlocatable underground facilities, provide information as to their location; and

(c) Service laterals, designate their presence or location, if the laterals are not locatable.

(i) Connect end users to the facility operator's main utility line

(ii) Are within a public right-of-way or utility easement and the excavator shall excavate the excavation area in accordance with this section.

(4)(a) A facility operator must provide information to an excavator not less than ten business days after the receipt of the notice provided for in subsection (1) of this section, unless otherwise agreed by the parties.

(b) A facility operator complying with subsection (3)(b) and (c) shall use the following methods:

(i) Placing within a proposed excavation area a triangular marker, indicating the presence of an unlocatable or identified but unlocatable underground facility;

(ii) Arranging to meet an excavator at a worksite to provide available information;

(iii) Providing copies of the best reasonably available records to the excavator;

(c) A facility operator's good faith attempt to comply with subsection (3)(b) and (c) shall constitute full compliance with the requirements of this section.

(i) Constitutes full compliance with the requirements of this section, unless the excavator can demonstrate that the excavator may result from such compliance, apart from liability for arranging for the excavation of the excavation area.
