SCHEDULE NO. 3
WATER SYSTEM FACILITIES CHARGE
EQUIVALENT RESIDENTIAL CUSTOMER

Available

Within the limits of all Water Service Areas except those listed on Sheet No. 27 and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

Applies to all new applicants for properties not currently served, only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity, arrangements satisfactory to the Utility are made for construction of additional facilities for connection to an existing main or for wholesale applicants, when surplus source capacity is available.

Conditions

1. The Utility will own and maintain all materials and facilities involved in the construction for water service.
2. The Water System Facilities Charge will be in addition to any line extension, service connection, or any other charges that may be provided elsewhere in this tariff.
3. If further subdivision of the property is made at a later date, each newly created lot will be subject to an additional facilities charge upon application for water service. If service is greater than residential equivalent, then multiple equivalents may be charged.
4. Exemptions:
 - a) Any end use customer covered by an existing written contract, which specifies that, no charge or a lower charge will be paid.
 - b) Any end use customer connecting to a water system which was contributed to the Utility or for which the Utility paid a nominal amount. However, the developer of such system may be subject to the charge.

Charge

Water System

Region SW – Various Systems

\$1500 + federal income tax gross-up

 Washington Water Service Company

For Commission's Receipt Stamp

SCHEDULE NO. 3.1
GENERAL FACILITIES CHARGE

Available

Within the limits of all Water Service Areas listed on Sheet No. 27 and at Utility's option and capability to maintain Department of Health standards of quantity and quality. Available only upon closing of the purchase of assets from Rainier View Water Company. Available only upon closing of the purchase of assets from Rainier View Water Company.

Applicable

Applies to all new applicants for properties not currently served, only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity, arrangements satisfactory to the Utility are made for construction of additional facilities for connection to an existing main or for wholesale applicants, when surplus source capacity is available.

Rate

\$1,549 plus Federal Income Tax gross-up per ERU (Beginning in 2018, the Tax Cuts and Jobs Act of 2017 has made contributions in aid of construction taxable as part of the gross income of a corporation.)

(T)

Conditions

1. ERU is defined as equivalent residential unit. One ERU generally equates to a ¾" of smaller connection. This means that ERUs are related to meter size. The number of ERUs for any project is associated with the nature of the project and type of connection. For example, for a development that is approved for ninety single family houses and has two irrigation connections, the project would be assessed at 92 ERUs. Other projects are generally assessed by the size of the meter, although it can vary depending on fire protection requirements. The utility shall determine the number of ERUs for a project based upon the greater of water use demands, fire flow requirements and other project considerations or meter size; provided that if the project considerations support use of a 1" or 1 ½" meter, the utility may require the use of a 2" compound meter to capture low water flows that a 1" or 1 ½" meter may not measure accurately. In the case where the utility requires use of a 2" compound meter to capture low water flows in lieu of a 1" or 1 ½" meter, that 2" meter will not be used as the basis of calculating the number of ERUs for the project. Where meter size is used to determine ERUs, the meter size to ERU relationships, as developed by the American Water Works Association (AWWA) are set out on the Table in Condition 6.
2. Any owner, owner's agent, developer, purchaser or purchaser's agent who is a "water service applicant" shall pay the charge set for on this schedule at the time a water availability letter is provided by the Utility; provided that in the case of a development requiring preliminary plat approval, the developer shall pay the charge set forth in this Schedule at the time a final water availability letter is provided by the utility. A "water service applicant" is a person or entity who has requested water service but has not yet become a "customer"

**SCHEDULE NO. 7
 FIRE HYDRANT INSTALLATION**

Availability

This schedule is available to customers taking service under Schedules 1, 1.1, 2, or 2.1 of this tariff. This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality. **(T)**

Applicable

To the installation of fire hydrants, where requested by customer(s).

Conditions

Fire hydrants will be constructed only after a customer has made a deposit equal to one-half (1/2) of the estimated cost of installation of the hydrant and then only where the Utility can provide fire flow, which meets minimum standards for state and county or, if applicable, city ordinance.

Installation of a fire hydrant by the Utility shall not constitute a warranty or guaranty by the Utility that a fire will be extinguished. The customer is advised at all times to maintain adequate fire insurance to cover the customer's expected loss from a fire, which may occur.

The Utility will deny a customer request for a hydrant if the system serving the customer cannot provide the level of service required for fire flow under state and county or, if applicable, city ordinance or if the request is for an area that is not capable of service from an existing main without a main extension.

Installation Charge	Rate	
Each fire hydrant	\$9,200 + federal income tax gross-up	(T) (D) (D)

**SCHEDULE NO. 8
 SERVICE CONNECTION CHARGE**

Available

Within the limits of all Water Service Areas and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

Applies to all new applicants for properties not currently served and within the Commission Service Area (as defined in the tariff) for the Utility only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity.

Conditions

1. A charge will be made the first time a customer's service pipe is connected to the Utility's main. The charge for a larger connection will be the cost of labor and materials. A meter will be furnished, installed and maintained by the Utility without direct cost to the customer.
2. The Utility owns and maintains all materials involved in making a service connection.
3. The service connection charge must be paid before installation.
4. In addition, when it is necessary to bore under or trench through an existing road beyond what is required of a tap and push, the cost of boring or trenching will be in addition to the Service Connection Charge.
5. Meter will be placed in a suitable meter box located at the customer's property line, except when this is not practicable. The meter will be installed upon the customer's premises in some convenient location approved by the Utility where the meter will at all times be accessible for reading, inspection and testing. (See Rules 7, 8 & 9)
6. Service Connections will be installed within 30 days from payment, unless prior arrangements in writing are agreed upon by both the customer and the Utility. (T)

<u>Size of Service Connection</u>	<u>Service Connection Charge</u>	
For lots requiring new service connection		
5/8 x 3/4 inch meter service setting	\$3,950 + federal income tax gross-up	(T)
		(D)
For lots with a service line and angle stop only		(T)
3/4 inch meter service setting	\$515 + federal income tax gross-up	(T)
		(D)
1 inch meter service setting (new or existing service)	\$6,100 + federal income tax gross-up	(N)
Larger than 1 inch meter service setting (new or existing service)	Labor, Materials, and Taxes	(T)
