SCHEDULE NO. 2
METERED RATE SERVICE

Available

Within the limits of all Washington Water Service Company Water Service Areas except those listed on Sheet No. 27 and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

Applicable to customers served by the Utility on a metered basis.

Conditions

The charge for this service is not subject to cancelation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service. For multiple unit residential customers served through one meter, see Rule 17. Usage rates for each block below are shown per 100 cubic foot of water. Billing for any block shall be calculated on a per 100 cubic foot amount used and based on the usage rate charge of that block.

Monthly Rates

Each connection or customer

Each connection	Meter Size Factor	Base Rate	1st Block (cubic feet)	1st Usage Rate	2nd Block (cubic feet)	2nd Usage Rate	3rd Block (cubic feet)	3rd Usage Rate

For Commission's Receipt Stamp

**SCHEDULE NO. 3.1
GENERAL FACILITIES CHARGE**

Available

Within the limits of all Washington Water Service Company Water Service Areas listed on Sheet No. 27 and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

(D)

Applicable

Applies to all new applicants for properties not currently served, only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity, arrangements satisfactory to the Utility are made for construction of additional facilities for connection to an existing main or for wholesale applicants, when surplus source capacity is available.

Rate

\$1,549 per ERU plus \$412 for Federal Income Tax Effect per ERU (Beginning in 2018, the Tax Cuts and Jobs Act of 2017 has made contributions in aid of construction taxable as part of the gross income of a corporation.)

Conditions

1. ERU is defined as equivalent residential unit. One ERU generally equates to a ¾" or smaller connection. This means that ERUs are related to meter size. The number of ERUs for any project is associated with the nature of the project and type of connection For example, for a development that is approved for ninety single family house and two irrigation connections, the project would be assessed at 92 ERUs. Other projects are generally assessed by the size of meter, although it can vary depending on fire protection requirements. The utility shall determine the number of ERUs for a project based upon the greater of water use demands, fire flow requirements and other project considerations or meter size; provided that if the project considerations support use of a 1" or 1 ½" meter, the utility may require the use of a 2" compound meter to capture low water flows that a 1" or 1 ½" meter may not measure accurately. In the case where the utility requires use of a 2" compound meter to capture low water flows in lieu of a 1" or 1 ½" meter, that 2" meter will not be used as the basis of calculating the number of ERUs for the project. Where meter size is used to determine ERUs, the meter size to ERU relationships, as developed by the American Water Works Association (AWWA) are set out on the Tale in Condition 6.
2. Any owner, owner's agent, developer, purchaser or purchaser's agent who is a "water service applicant" shall pay the charge set for on this schedule at the time a water availability letter is provided by the Utility; provided that in the case of a development requiring preliminary plat approval, the developer shall pay the charge set forth in this Schedule at the time a final water availability letter is provided by the utility. A "water service applicant" is a person or entity who has requested water service but has not yet become a "customer".
