**Subject:** RE: Euclid Road Bridge Replacement USDOT #058633D

Mike,

I have some questions as I draft the UTC order for this project. Looking at our records for the existing structure, and the design drawings provided, it appears that:

- Roadway width is increasing from 21' to 33' 7 ¼".
- Shoulders 4' 9 5/8" wide will be added to Euclid Road in each direction.
- Vertical clearance from the top of rail to bottom of the structure will increase from 21'-0" to 23'-10". (please provide).
- Wooden structure will be replaced by pre-stressed concrete construction.
- Wooden bridge railings will be replaced by concrete barrier with chain link fencing.

Thank you,  
Mike T - UTC

Mike,

Please find the attached Construct-Reconstruct Grade Separation documents signed by Spokane County and its attachments.

Let me know if there are any questions
