19 <sup>3</sup> “25/3” refers to the minimum, nominal download and upload speeds, respectively, of the broadband service offering to  
20 which the customer subscribes, and the counts of service connections that are provided in the sentences to which this  
21 footnote is attached include service connections for which the nominal download and upload speeds are at least 25/3 or  
22 higher. As used in the principal text, the term “broadband service” is understood to refer to “broadband service,” as  
23 defined in WAC 480-123-020, which, in turn, incorporates minimum download and upload speed standards established  
24 by Commission rule or order. For the Commission’s most recent establishment of minimum download and upload  
25 speed standards, see Paragraph 15 of the Commission’s order, dated May 27, 2020, in Docket No. UT-190437. (See  
26 also Note 5 at Paragraph 3 of the Commission’s order, dated November 24, 2020, in Docket No. UT-200704.) The total  
number of broadband service connections served by the Company or its affiliate, including nominal speed tiers not only  
at or above “25/3,” but also below “25/3,” as of December 31, 2022, and December 31, 2021, was 928 and 944,  
respectively. All of the broadband service connections served by the Company or its affiliate for customers who choose  
to subscribe to broadband service offerings that are less robust than “25/3” are capable of providing “25/3” broadband  
service or better if the customer were to so choose.

1 8. WAC 480-123-110(1)(h)(i): A sworn statement by a Company officer certifying that the  
2 Company is in compliance with the Federal Communications Commission's obligation for  
3 deployment of broadband at speeds specified by the Federal Communications Commission  
4 applicable to the Company and that the Company meets one of the eligibility criteria set out  
5 in WAC 480-123-110(1)(j)(ii), (iii)) or (iv) is attached hereto as Exhibit 7.

6  
7 9. All exhibits attached hereto are incorporated into this Petition as though fully set forth.

8 Respectfully submitted this \_\_\_\_ day of July, 2023.

CORPORATE ORGANIZATION CHART

**Western Wahkiakum County Telephone Company  
Corporate Structure**

## EXHIBIT 2

### AFFILIATED TRANSACTIONS

Western Wahkiakum County Telephone Company (“Wahkiakum West Telephone”), doing business as Wahkiakum West Telephone and as WWEST Communications, is affiliated with Wahkiakum West Long Distance, Inc. (“WWLD”) and Wahkiakum West Television, Inc. (“WWTV”). All three companies are wholly-owned subsidiaries of Wahkiakum West, Inc. Wahkiakum West Telephone currently has transactions with each of WWLD, WWTV and Wahkiakum West, Inc. that are recorded on Wahkiakum West Telephone’s books of account.<sup>1</sup>

#### **Wahkiakum West Long Distance, Inc. (WWLD)**

WWLD is a switchless toll reseller, which purchases toll from various interexchange carriers and resells it to Wahkiakum West Telephone and its end user customers. The toll appears on the monthly telephone statements of end user customers who have chosen WWLD as their toll provider. Wahkiakum West Telephone provides billing and collection services for WWLD, for which Wahkiakum West Telephone charges WWLD the same tariffed (intrastate service) or contracted (Interstate service) rates that Wahkiakum West Telephone charges any other carrier who uses Wahkiakum West Telephone to do their toll billing and collection. Wahkiakum West Telephone purchases the toll billing receivables from WWLD. The billing and collection charges are collected each month by being netted against the purchase of accounts receivable. Wahkiakum West Telephone also charges Wahkiakum West Long Distance a fully loaded labor rate for any employee time spent on WWLDI’s behalf above and beyond what is included in the billing and collection function, such as providing customer service or marketing. The employee time, if any, is tracked via daily time sheets and reimbursed quarterly so that all applicable benefits and payroll taxes are included in the reimbursement. The billing and collection charges are booked by Wahkiakum West Telephone as interstate or intrastate regulated access revenue, as applicable. The reimbursement for loaded labor charges is booked by Wahkiakum West Telephone as a reduction to regulated customer operations expense.

As noted above, WWLD also provides toll service to Wahkiakum West Telephone. Wahkiakum West Telephone pays WWLD WWLD’s price listed rates for such toll service, and books the amounts so incurred to the applicable expense account.

---

<sup>1</sup> Wahkiakum West Telephone also pays per-meeting director’s fees to the members of its board of directors for their attendance at board meetings.

**Wahkiakum West Television, Inc. (WWTV)**

WWTV is a retail Internet service provider with the DBAs of Wahkiakum West Internet, Wahkiakum West, and wwest.net, and retails deregulated services such as VoIP and streaming television. WWTV also retails Viasat/Exede/WildBlue Satellite internet services. Wired broadband services are purchased by WWTV from Wahkiakum West Telephone at the NECA tariffed wholesale rates and sold by WWTV to end users under the above Wahkiakum West Television, Inc. DBAs. Wahkiakum West Television purchases its satellite services and equipment directly from an independent third-party vendor. WWTV pays Wahkiakum West Telephone a monthly billing and collection fee based on the number of customers billed each month. WWTV also pays Wahkiakum West Telephone a fully loaded hourly rate for all other employee time spent on behalf of Wahkiakum West Television and any of its services. Employee time, if any, is tracked via daily time sheets and reimbursed quarterly so that all related employee benefits and taxes are included in the reimbursement. The reimbursement for loaded labor charges is booked by Wahkiakum West Telephone as a reduction to regulated customer operations expense.

**Wahkiakum West, Inc.**

Wahkiakum West, Inc. files a consolidated Federal income tax return that includes Wahkiakum West Telephone. Quarterly income tax payments are made by Wahkiakum West Telephone. Wahkiakum West Inc. and each affiliate reimburse Wahkiakum West Telephone for their respective allocated share of any Federal income tax liability.

From time to time, Wahkiakum West Telephone pays dividends with respect to its issued and outstanding common stock, with such payments being made to Wahkiakum West, Inc.

EXHIBIT 3  
BROADBAND PLAN

On July 30, 2020, **Western Wahkiakum County Telephone Company** (“Company”<sup>1</sup>) adopted a Broadband Plan, as contemplated by RCW 80.36.650(3)(a)(ii) and WAC 480-123-110(1)(d). That plan was submitted to the Washington Utilities and Transportation Commission (“Commission”) as Exhibit 3 to a petition by the Company for support from the state Universal Communications Services Program established by RCW 80.36.650 (“Program”) for the Program year 2021, which petition was assigned by the Commission Docket No. UT-200704 (“July 2020 Petition”). The Company’s broadband plan for Program year 2024 is a continuation of the Company’s broadband plan that was included in the July 2022 Petition and revised in November of 2022, with the following modifications:

(1) As previously adopted, the Company’s Broadband Plan made reference to the Company’s understanding that school classrooms were closed due to the then-pending pandemic; at present, school classrooms in its service area are open for the coming academic year; notwithstanding, the Company is continuing to maintain the publicly accessible hotspots that were mentioned in its Broadband Plan; and

(2) The Federal Communications Commission (“FCC”) adopted the Affordable Connectivity Program and Lifeline Program, which both provide discounts towards broadband service for eligible households. The Company is participating in these programs.

---

<sup>1</sup> As used in this Exhibit 3, the term “Company” includes, to the extent applicable, the Company’s affiliate that is an internet service provider.

Set forth below is a revised description of the Company's Broadband Plan, reflecting the above-mentioned modifications.

Pursuant to RCW 80.36.650(3), a recipient of support from the Program is to have adopted a plan to provide, enhance, or maintain broadband services in its service area. As set out in WAC 480-123-110(1)(d), the broadband plan is to include specific elements, but only to the extent applicable to that particular broadband plan. The broadband plan does not have to include all elements, but potential elements include the following: (1) a multi-year investment plan; (2) specific project(s) that are projected to provide or enhance broadband services at speeds required by the Commission or the Federal Communications Commission; (3) a plan for maintenance of broadband services in the provider's service area; (4) a description of how the provider will enhance broadband services in its service area; and (5) any other information that the Commission may request to assist in the Commission's review and analysis of the provider's broadband plan. Where there are specific projects, the project information is to include an estimated timeline, geographic location, number of locations passed, and upload and download speeds that are projected to be produced by the project.

The Company has already constructed facilities sufficient for it to satisfy either criterion three or criterion four of WAC 480-123-110 and, as a result, has placed into service robust broadband infrastructure throughout all populated portions of its service area. Consequently, the Company intends to apply for Program support to allow it to continue to provide telecommunications services and broadband services at the levels that it is providing today, with enhancements where and when appropriate. Accordingly, the Company's plan includes the following elements:

**Broadband Plan:**

The Company has already built broadband-capable, optical fiber to all existing homes and businesses in its service area, and in the last year, completed the process of converting all customers to the new fiber-optic network service with broadband tiers available up to 1Gbps/1Gbps. All customers requesting new broadband services are also connected to the fiber-optic network facilities for the delivery of broadband service. The new fiber-optic network facilities enhance the Company's ability to deliver higher broadband speeds for all current and future broadband customers.

As of March 1, 2023, all broadband customers were transitioned to the new fiber-optic service. All requests for new broadband services are provisioned on the fiber-optic network.

The installations for newly constructed homes requires investment in both equipment and labor. Although all homes in the Company's service area have access to robust internet speeds up to 1Gbps/1Gbps, some families either have chosen not to subscribe or cannot afford to subscribe to broadband service at home. To help address these circumstances, the Company is maintaining hotspots at locations spread out over its service area. These include the parking lots of the Rosburg Community Hall, the Company's principal business office, and the Appelo Archives Center. These are designed to complement the Company's existing broadband services in its serving area.

The Company has been enabled to do all this largely through its borrowing from the Rural Utilities Service of the United States Department of Agriculture ("RUS"), which has funded the construction of the Company's fiber-to-the-home network, the procurement of the necessary fiber optic cable and associated cable-plant components, as well as the replacements and upgrades to the Company's switching and transport electronics. In turn, such borrowing

has been facilitated by the support that the Company has received from Federal universal service programs and the state Universal Communications Services Program.

In addition to the foregoing, the Company's broadband plan includes continued investment by the Company in the maintenance and enhancement of its telecommunications and broadband network through support contracts with its primary equipment vendors, including Calix, Ribbon, ESRI, and Fujitsu. Such support contracts generally provide for both maintenance of existing platforms, and enhancement of the capabilities those platforms offer as such enhancements become available.

The annual Calix support, maintenance, monitoring, and software update contract expense is \$29,868.70 for Fiber-to-the-Home network elements.

The annual Ribbon Communications support, maintenance, and software update contract expense is \$27,285.08 to maintain the company's Class 5 voice telephone switch.

The annual Fujitsu SONET support, maintenance, and software update contract expense is \$13,925.59 to maintain the company's SONET interconnection network with other voice service providers and the public-switched telephone network.

Moreover, as part of the Company's broadband plan, the Company participates in the FCC's Lifeline Program and Affordable Connectivity Program, and the Company expects to continue to do so for so long as the FCC offers those programs.

The Company anticipates that, if its application for support from the Program during the coming Program year is granted, its expenditures during that period in providing, enhancing, and maintaining broadband services in its service area, including payments in support of the above-mentioned RUS financing, will exceed the funding that it expects to receive from the Program for that period. This expectation reflects the Company's belief that it will continue to

be guided by its goal of providing robust broadband capability wherever such capability is needed within the Company's service area.

Expenses anticipated in 2023 include: \$264,000.00 for principal and interest on the RUS broadband construction loans; \$7,500.00 for quarterly maintenance, testing, and repair of the company's standby power generator; \$30,000.00 to repair facility damage due to acts of God and other causes; \$35,000.00 for extending existing facilities to new service locations; \$50,000.00 for line extensions to new roads within the service area; \$3,500.00 for GIS software licensing to comply with Federal broadband reporting requirements and FCC mandated broadband speed testing.
