GENERAL RULES AND REGULATIONS

A. APPLICATION OR REGULATIONS

1. The regulations set forth herein apply to interstate services and facilities furnished within the State of Washington by Mashell Telecom, Inc., hereinafter referred to as the Company, subject to the jurisdiction of the Washington Utilities and Transportation Commission.
2. No officer, employee or agent of the Company has authority to change, amend or waive any rate or regulation approved or prescribed by the Commission. Rates and regulations may be changed or cancelled only with the consent or approval of the Commission.
3. The Company furnishes exchange, toll, and private line service throughout the territory it serves, as shown by its filed rates, regulation and maps. The Company also furnishes inter-exchange toll service to the territory served by connecting companies, subject to their rates and regulations.

B. APPLICATION FOR SERVICE

1. Anyone desiring service may be required to make application in writing on forms prescribed by Mashell Telecom, Inc., and in accordance with this filed tariff. An application shall be deemed to be a notice to Mashell Telecom, Inc., that the willingness to conform to such rules and regulations as are in effect and on file with the Washington Utilities and Transportation Commission. Such application shall clearly state the character of service for which applied.
2. Shared use of service is generally prohibited.

GENERAL RULES AND REGULATIONS

C. ESTABLISHMENT AND FURNISHING OF SERVICES

1. Provision of Equipment

- a. All equipment necessary for the provision of a given service will be furnished and owned by the Company except as provided elsewhere in this tariff.
- b. Customer-owned terminal equipment and communications systems may be connected with the facilities furnished by the Company in accordance with Part 68 of the Federal Communications Commission (FCC) rules and regulations. The Company will take all reasonable precautions to assure that the telecommunications network is not exposed to harmful or hazardous voltages as a result of interconnection with customer-owned equipment.

2. Customer Billing

- a. The Customer is responsible for all proper rates and charges in conjunction with the services furnished, including calls originating and accepted received collect at the Customer's access line.
- b. Monthly recurring charges are billed in advance and toll charges are billed in arrears. Special billing arrangements may be established for service provided to governmental agencies.

GENERAL RULES AND REGULATIONS

E. OBLIGATION OF COMPANY

1. Furnishing of Service

- a. The Company's obligation to furnish service is dependent upon its ability to secure and retain without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary circuits and equipment.
- b. Where facilities beyond those normally required are provided to satisfy Customer requests, charges based on the additional costs incurred will apply.
- c. When a Customer orders installations, moves or changes which cannot be completed during scheduled working hours, Customer may be required to pay overtime charges. Such overtime charges will be the difference between straight time and overtime, and will be in addition to the normal installation, move or change charge. The Customer must agree to this provision before such overtime work will be performed.
- d. When the construction of certain facilities is necessary for the furnishing of a service, the ownership of such facilities will be vested in the Company, even though all or a part of the cost of construction is borne by the Customer.
- e. The Company will determine the type of outside plant facilities to be provided for the furnishing of a service.
- f. The Company will be reimbursed for the costs associated with Customer requests for relocation or rearrangement of facilities.
- g. Where the drop facilities are installed without a support structure through direct bury, the drop wire will be provided by Company at no cost and the Customer is responsible for the cost of burying the drop.

2. Maintenance and Repair

- a. All costs associated with the maintenance and repair of services furnished by the Company will be borne by the Company except as specified elsewhere in this tariff.
- b. The Company will be reimbursed for any loss or damage to its facilities on the Customer's premise resulting from intentional destruction or any other cause except from fire or unavoidable accidents.
- c. Access to Customer's premises, at any reasonable hour, will be given to representatives of the Company's facilities.

3. Local Service Guarantee Program

The Company will provide a (1) month local service guarantee credit, which includes all recurring items of local service billed on the Customer's current bill when the Company fails to provide specified levels of customer service. This program provides for credits to all residential and single line business customers bills when the Company does not meet the service standards outlined below:

- a. Missed Service Commitment: The Customer will be given a one (1) month local service credit if the Company fails to meet a commitment and has not notified the Customer 24 hours prior to the agreed time and date. This would apply to such services as installations, changes to custom calling features, provision of optional calling plans and other similar request.

E. OBLIGATION OF COMPANY (Continued)

3. Local Service Guarantee Program (Continued)

The credit will not apply if the Customer could not be reached by telephone and a notice was left in a conspicuous place 24 hours prior to the commitment date and time, the Customer did not make the meeting, or "out of service" conditions exist resulting from natural disasters, or circumstances beyond the control and knowledge of the Company.

(T)

- b. Service Outages of More than 24 Hours: A one (1) month local service credit will be applied to the Customer's telephone bill if the Company fails to restore basic exchange telephone service within 24 hours after the interruption was reported to or discovered by the Company.

The credit will not apply if premise access is required and neither the Customer nor a representative was available at the Customer premise and the Company left a notice in a conspicuous place, or the Customer has been disconnected for non-payment of a bill or request for a cash deposit, or "out of service" conditions exist resulting from natural disasters, or circumstances beyond the control and knowledge of the Company.

- c. Repeat Customer Requests: A one (1) month local service credit will be applied to the Customer's telephone bill if the Company fails to accommodate the Customer's request the first time and this causes the Customer to make a second request within thirty (30) days. Examples of requests which may require multiple business office

contacts for a customer include those for billing name and address changes, directory listing changes, requests for adjustments, repeat reports of service problems, and moves of cable or drop wires.

This credit will not apply to requests beyond the control of the Company and when the Company has notified the customer.

d. Credit is NOT applicable to:

Claims for credit by customers who have been temporarily disconnected for nonpayment or are requesting reconnection from a temporary disconnect for nonpayment.

Misuse or abuse of the Company owned facilities, or if the problem is found to be associated with the customer's inside wiring or the customer's premises equipment.

Outages of more than 24 hours that are a result of natural disasters or circumstances beyond the control and knowledge of the Company, that occur within 24 hours of the due date where the Company could not obviously notify the customer nor perform the necessary service. Such example is where there has been a storm or other catastrophe that has caused a large number of customers to lose telecommunications services and/or other similar utility type services.

MASHELL TELECOM, INC. d/b/a Lightcurve

GENERAL RULES AND REGULATIONS

E. OBLIGATION OF COMPANY (Continued)

8. Liability (T)
- a. The liability of the Company for damages arising out of mistakes, omissions, interruptions, delays, or errors or defects in transmission occurring in the course of furnishing a service and not caused by the negligence of the Customer, shall, in no event, exceed an amount equivalent to the proportionate charge to the Customer for the period of service during which such mistake, omission, interruption, delay, or error or defect in transmission occurs.
 - b. When the facilities of other companies are used in establishing connections to points not reached by the Company's facilities, the Company is not liable for any act or omission of the other company or companies.
 - c. The Company is not liable for any unavoidable damage to the Customer's premises resulting from the attachment of its equipment and associated wiring on such premises, or from the installation or removal thereof.
 - d. Overcharges by the Company shall be refunded to the subscriber in compliance with WAC 480-120-163.
 - e. The Company is not liable for any accident, injury or death occasioned by its equipment or facilities when such is not due to negligence of the Company.
 - f. The Company is not liable for any of the following:
 - (1) Claims for libel, slander or infringement of copyright from the material transmitted or recorded over its facilities;

GENERAL RULES AND REGULATIONS

E. OBLIGATION OF COMPANY (Continued)

8. Liability (Continued) (T)
- f. (2) Claim for infringement of patents arising from combining with or using in connection with facilities of the Company;
- (3) Apparatus and systems owned by the customer; or
- (4) All other claims arising out of any act or omission of the customer in connection with facilities provided by the Company.
- (5) The Company shall not be liable for any incidental or consequential damages, including but not limited to loss, damage, or expense directly or indirectly arising from wiring located beyond the Company's standard network interface facilities.

F. OBLIGATION OF CUSTOMER

The customer agrees not to move, alter or molest the wiring, protection or any Company owned telephone equipment on the customer's premises in any manner whatsoever, and agrees to pay all charges arising from such molestations or alterations or schedule charges of the Company for changing the location of the telephone apparatus under contract.

G. SPECIAL ASSEMBLIES OF EQUIPMENT OR SPECULATIVE PROJECTS

Special assemblies of equipment or speculative projects for which provision is not otherwise made in this tariff may be provided where practicable, if not detrimental to any of the services furnished by the Company.

DEFINITIONS

ACCESS LINE

A circuit between a switching center and a customer premises which includes a network interface (jack).

ACCESSORIES

Devices which are mechanically attached to, or used with, the facilities and equipment furnished by Mashell Telecom, Inc. d/b/a Lightcurve and which are independent of, and not electrically acoustically or inductively connected to, the communications path of the telecommunications systems. These devices may not be injurious to the telecommunications network.

(T)

ADDITIONAL LISTING

Any listing of a name or other authorized information in connection with a customer's telephone number in addition to that to which he is entitled in connection with the regular service.

AIR LINE MEASUREMENT

See "Mileage".

APPLICANT

Any person, firm, partnership, corporation, municipality, cooperative organization, governmental agency, etc., applying to discontinued service. Mashell Telecom, Inc. d/b/a Lightcurve for new service or re-connection of discontinued service.

(T)

APPLICATION

A request made verbally or in writing for telephone service or a request for a change in existing service.

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

AUTHORIZED USER

A person, firm or corporation (other than the customer) on whose premise the Access Line, Private Line Service or Channel is terminated and who may communicate over such facilities in accordance with the terms of this tariff.

BASE RATE

The area or areas within an exchange area wherein mileage charges for primary exchange service do not apply.

BASE RATE AREA

A specific area within which urban grades of exchange service, as determined from time to time, are furnished at rates quoted in the Local Exchange Service Tariffs without extra exchange line mileage charges.

BUILDING

The term "same building" or "building" is to be interpreted to mean a structure under one roof or two or more structures which are connected by an enclosed passageway in which the wires or cable of Mashell Telecom, Inc. d/b/a Lightcurve may be placed without exposure to outside electrical circuits or the weather. In no case can pipes and conduit be considered as an enclosed passageway.

BUSINESS SERVICE

Business service is exchange service furnished to customers whose actual or obvious use of the service is for conducting a business, trade, or profession or whose use of the service is obviously not confined to domestic use. Use of a telephone number on business cards, billboard and vehicle signs, or in newspaper and magazine advertising in conjunction with the continuing provision of goods or services, shall constitute business service.

THIRD REVISED SHEET NO. 43

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

CALL FORWARDING

Permits a subscriber to have incoming calls transferred to another telephone number by dialing a code and then dialing a number to which the calls are to be forwarded. Calls are forwarded immediately. Dialing a deactivation code returns subsequent incoming calls to the primary telephone number. Customer is solely responsible for any and all charges incurred when call is forwarded outside of the local calling area.

CALL FORWARDING BUSY

Allows a customer to have incoming calls forwarded to another predetermined number when the called number is busy. Customer is solely responsible for any and all charges incurred when a call is forwarded outside of the local calling area.

CALL FORWARDING DON'T ANSWER

Allows a customer to have incoming calls forwarded to another predetermined number if the customer does not answer after a preset number of rings. Customer is solely responsible for any and all charges incurred when a call is forwarded outside of the local calling area.

CALL WAITING

Permits a subscriber with a call in progress to place that call on "hold" and receive ea second call. The subscriber is alerted to the second call by a short signal tone.

CANCEL CALL WAITING

Permits the subscriber to deactivate Call Waiting for the duration of a single call by dialing an appropriate code.

Cancel Call Waiting is part of the Call Waiting package.

DEFINITIONS

CLASS OF SERVICE

A description of Exchange Access Line service furnished a customer in terms of:

1. For Exchange Service:
 - a. Grade of Line: Individual line (see also "Primary Class of Service").
 - b. Type of Rate: Flat Rate or Message Rate.
 - c. Character of Use: Business or Residence.
 - d. Dialing Method: Touch Calling or Rotary
2. For Long Distance Telecommunications Service:
 - a. Type of Call: Station-to-station or person-to-person

COIN BOX TELEPHONE SERVICE

A telephone station set, either public or semi-public, equipped with a device for collecting money in payment of telephone message and used in connection with either public or semi-public telephone service.

COLLECT CALL

The procedure by which certain messages, upon request, may be reversed (charged to the called station) upon acceptance of the call at the called station.

COMMISSION

The Washington Utilities and Transportation Commission.

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

COMMUNICATIONS SYSTEMS

Denotes channels or other facilities and equipment which are capable, when not connected to long distance message telecommunications service, of 2-way communications between customer-provided terminal equipment or Mashell Telecom, Inc. access lines.

The term "Communications Systems" when used in connection with communications systems provided by an Other Common Carrier (OCC), denotes channels and other facilities furnished by the OCC for Communications Commission or Washington Utilities and Transportation Commission to provide.

COMPANY

A corporation, association, partnership or individual engaged in the business of furnishing telephone and other telecommunications services to the public, under the jurisdiction of the Washington Utilities and Transportation Commission. Whenever used in this tariff, "Company" refers to the Mashell Telecom, Inc. unless the context clearly indicates otherwise.

COMPLETE DISCONNECT

A discontinuance of service where a customer cannot receive incoming calls or place outgoing calls.

CONFERENCING (3 Way Calling)

Permits a subscriber, while holding an existing call, to call a third number, thereby extending the call to include that number.

CONNECTING ARRANGEMENT

The equipment provided by the Company to accomplish the direct electrical connection of customer-provided facilities with the facilities of the Company or of facilities of the Company with other facilities of the Company.

DEFINITIONS

CONNECTION

The term "Connection" denotes the establishment of telephone service. A move of existing service to a different premises requires a "connection".

CONNECTING DEVICE

The term "Connecting Device" denotes the terminal block or standard network interface to which the single line station or terminal equipment may be connected.

CONNECTION CHARGE

See "Service Connection Charge".

CONSTRUCTION CHARGE

A separate non-recurring charge made for the construction of facilities in excess of those contemplated under the rates quoted in the Service Connection Charges Section.

CONTIGUOUS EXCHANGES

Two exchanges whose boundaries adjoin.

CONTINUOUS PROPERTY

The plot of ground, together with any building thereon, occupied by the customer, which is not divided by public highways or separated by property occupied by others. Where a customer occupies property on both sides of a street, alley, highway, body of water, railroad right-of-way, etc., and the properties would otherwise be continuous, such properties are treated as continuous property provided local wire or cable facilities are used and the customer furnishes all local distribution pole line facilities or underground conduit required in connection therewith.

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

CONTRACT

The agreement between a customer and the Company under which service and/or facilities are furnished in accordance with the applicable provisions of the tariff.

COST

The cost of labor and materials, which includes appropriate amounts to cover the Company's general operating and administrative expenses, and return requirement.

CUSTOM RINGING (Distinctive Ringing to Second Number)

Custom Ringing is an additional feature to basic service offering one additional number which will be billed to the primary exchange access line number.

A directory listing is provided with Custom Ringing.

When the customer's exchange access line is equipped with Call Waiting and the line is busy, incoming calls will generate distinctive Call Waiting tone at no additional charge.

CUSTOMER

Any person, firm, partnership, corporation, municipality, cooperative organization, governmental agency, etc., supplied with service by the Company.

CUSTOMER-PROVIDED TERMINAL EQUIPMENT (CPE)

Devices or apparatus and their associated wiring, provided by a customer, which do not constitute a communications system and which, when connected to the communications path of the telephone system, are so connected either electrically, acoustically or inductively.

DEFINITIONS

DEPOSIT

A cash payment made by the customer in aid of establishing or reestablishing credit with Mashell Telecom, Inc. d/b/a Lightcurve. Such payment, or alternatives to such payments, which may be required before or during the period of service offsets the risk that the customer may make the inadequate payment following a period of service. Interest is payable on all deposited amounts.

DIAL SWITCHING EQUIPMENT

A unit of electro-mechanical or electronic switching equipment used in a central office or in connection with a Private Branch Exchange System.

DIRECT ELECTRICAL CONNECTION

Connection of terminal equipment to the telephone network by means other than acoustic and/or inductive coupling, i.e., connected by electrically conductive metallic paths.

DIRECTORY ASSISTANCE

A service provided to assist customers in obtaining telephone numbers which are, or are not, listed in the directory.

DIRECTORY LISTING

A publication in the Company's alphabetical directory of information relative to a customer's name or other identification and telephone number.

DIRECTORY NUMBER HUNTING

Allows a customer with multiple lines to have a single listed directory number that hunts for a vacant line in a predetermined group of lines.

DISCONNECT NOTICE

The written notice sent to a customer following billing, notifying him that his service will be discontinued if charges are not satisfied by the date specified on the notice.

DROP WIRE

That portion of a circuit between the pole line or cable terminal or distributing box and the point of entrance to the building in which the customer's telephone service is located.

DUE NOTICES

See "Disconnect Notice".

ENTRANCE FACILITIES

Facilities extending from the point of entrance on private property not the premises on which service is furnished.

EXCHANGE

A unit established by the Company for communication service in a specific geographic area, which unit usually embraces a city, town, village or unincorporated community and environs. It may consist of one or more central offices, together with the associated plant used in furnishing communication service to the general public within that area.

When an exchange includes only one central office, it is termed a single office exchange, but when it includes more than one central office, the exchange is termed a multi-office exchange.

A natural person or any partnership, corporation, agency of government, association, trust or other legal entity.

POINT OF CONNECTION

Denotes the location of a customer premise where facilities, provided by Mashell Telecom, Inc., terminate, at which point transmitting or receiving terminal equipment or switching equipment used for communications with terminal equipment on the premises may be connected.

PREASSIGNED TELEPHONE NUMBER

A telephone number preassigned in the "Telephone Number" space of the service order with a specific (predetermined) in-service date.

PREMISES

The buildings, portion or portions of a building on continuous property used and/or occupied at one time by the customer in the conduct of his business or as a residence. Where the roof in both buildings is considered as the same premises insofar as the customer who uses and occupies such continuous floor space is concerned, the two buildings otherwise being considered as separate buildings.

PRIVATE BRANCH EXCHANGE (PBX)

A communication system provided by a customer and consisting of various stations, equipment and facilities to connect these stations to central office lines or to other stations in the system either manually or automatically.

PRIVATE LINE

A non-switched circuit provided to furnish communications between two or more points.

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

PUBLIC TELEPHONE SERVICE

An individual line service equipped with a coin collection telephone installed for use of the general public in locations where the general public has access to these telephones.

1. Coin Box Public Telephone: A public telephone equipped with a coin collecting device into which all payments for the use of the telephone are deposited prior to (prepayment) or at (post-payment) the time the desired connection is established.
2. Coinless Public Telephone: A public telephone connected directly to the long distance switchboard for the placing of collect, credit card and third-number billed long distance calls only.

REGISTRATION

A program whereby the FCC grants a Registration Number to a particular terminal device which meets particular criteria prescribed by the FCC. Registration may be granted for terminal equipment or protective circuitry. A registration number will appear on all equipment so certified.

REGISTERED PROTECTIVE CIRCUITRY

Separate, identifiable and discrete electrical circuitry designed to protect the telephone network from harm, which is registered in accordance with Part 68 of FCC Rules and Regulations.

(T)

REGRADE

An application for a different class and/or grade of service.

REMOTE ACCESS CALL FORWARDING

Allows a subscriber to activate or deactivate Call Forwarding from a remote location.

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

REMOTE CALL FORWARDING

An arrangement to automatically forward all incoming calls placed to the remote call forwarding number, to another telephone number in a distant exchange.

RESALE OF SERVICE

An activity wherein one entity subscribes to the communications services and facilities of another entity and then re-offers communications service and facilities to the public (with or without adding value) for profit.

RESERVED TELEPHONE NUMBER

A telephone number reserved for use by the Customer at some undetermined future date. Usually so noted in the "Remarks" space of the service order.

RESIDENCE SERVICE

Telephone service furnished to Customers when the actual or obvious use is for domestic purposes.

ROUTE MILEAGE

The distance measured along the route of the circuit between any two or more given points on that circuit.

RURAL LINE SERVICE

A type of service furnished the Customers in certain sections outside the Base Rate Area, but within the exchange area, with the addition of rural or extra exchange mileage, if applicable. The facilities are owned and maintained by Mashell Telecom, Inc., d/b/a Lightcurve except that in some cases the Customer may be required to bear a part of the excess construction costs of providing the service.

DEFINITIONS

SERVICE CONNECTION CHARGE

The nonrecurring charges intended to cover, in part, the expense incurred by Mashell Telecom, Inc. for work performed at the customer's request associated with a Service Order, Central Office Work, Line Connection and/or Time and Material Charges.

SERVICE STATION

Service Station service is exchange service furnished to customers beyond the Base Rate Area by means of lines and stations which are owned and maintained beyond a designated junction by organized associations of customers.

SPEED CALLING

Allows the subscriber to program up to either eight (8) or thirty (30) one- or two-digit codes in association with up to eight or thirty full-length numbers as they normally would have been dialed. Dialing only the one-or two-digit code associated with a particular number will cause the Utility's equipment to recognize and process the call as if the called number had been dialed in full. The (#) button usually found at the lower right corner of standard push button dials always should be used right after the one- or two-digit abbreviated number to signal the Utility's central office equipment not to wait for further digits that might be dialed.

(T)

STANDARD NETWORK INTERFACE

- 1. The Standard Network Interface is a standard FCC approval jack which serves as the point of demarcation between those facilities owned by Mashell Telecom, Inc. d/b/a Lightcurve and those facilities which may or may not be owned by the customer in the provision of exchange access, WATS or Private Line Services.
- 2. The Standard Network Interface may be located inside or outside the customer premises, as determined by the Company, but within close proximity to the protector or equivalent.

DEFINITIONS

SUPERSEDURE

A supersedure of a service means the transfer of toll service, including the telephone number, from one party to another.

SUSPENSION OF SERVICE

A temporary discontinuance of service without terminating the contract. Suspension of service may be divided into two general classifications as follows:

1. At customer's Request: Temporary suspension of service at customer's request. (Vacation Rate Service)
2. Initiated by Company: Partial suspension denial for nonpayment of service charges, either local and/or toll.

TARIFE

A schedule of recurring and nonrecurring charges together with general regulations, properly filed with and approved by the Washington Utilities and Transportation Commission, applicable to the customers of the Company for services furnished.

TELEPHONE COMPANY

See "Company".

TELEPHONE NETWORK

The public switched telephone network.

TELEPHONE SERVICE

A service including both exchange, toll service, or private line.

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

TELEPHONE STATION SET

A telephone instrument, consisting of a transmitter, receiver and associated apparatus, connected so as to permit transmission and receiving of telephone messages.

TELETYPEWRITER

A teletypewriter consists of apparatus designed for the sending and receiving, or receiving only, of typewritten messages transmitted electrically.

TEMPORARY SERVICE

Local service definitely known to be required for a short period, such as service provided for contractors for use during the construction of a building, sales campaign, athletic contests, conventions, fairs, circus's, etc.

TERMINAL EQUIPMENT

Customer-provided devices utilized for transmission or reception of communications when attached to the telecommunications network facilities at a point on the customer's side of the station protector, network interface or other point of demarcation. And includes but not limited to telephone station sets, speaker phones, answering devices, dialers, data sets, computer terminals, paging systems, alarm systems, key systems, PBX's, etc.

(T)

TERMINAL LOOP

The wire facility used in providing an off-premises extension of a customer access line.

TERMINATION CHARGE

A charge made to a customer upon termination of contract for service before the expiration of the contract period.

WNU-3

MASHELL TELECOM, INC. d/b/a Lightcurve

DEFINITIONS

TIE LINE

A circuit connecting two PBX systems for the purpose of intercommunicating between the stations connected with such PBX switching apparatus, without the use of trunk lines to a company central office.

(T)

TIE LINE MILEAGE

See "Mileage".

TOLL CENTER

A telephone switching center at which the operations function (message timing, switching and recording) takes place in connection with the provision of toll message service.

TOLL ACCESS LINE

A circuit used exclusively for the transmission of messages between points located in different exchange areas where specific charges for each such message are applicable.

TOLL MESSAGE

A completed telephone call between stations in different exchanges for which message toll charges are applicable.

1. Person-to-Person Toll Message: A toll message in which the user stipulates a desire for communication with a specified person or station at a specified location.
2. Station-to-Station Toll Message: A toll message in which the user stipulates a desire for communication only with a specified telephone number or switchboard.
3. Collect Message: A toll message in which the user stipulates that the called party accept and pay all charges associated with the message.

DEFINITIONS

TOLL MESSAGE (Continued)

4. Third Number Message: A toll message in which associated charges are billed neither to the calling station nor to the called station but rather to a station not involved in the message.
5. Credit Card Messages: A toll message in which associated charges are billed to a credit card number assigned by a telephone company and issued to either the called or calling party.

TOLL RATE

The initial period charge prescribed for a toll message usually based upon a minimum initial period and distance between exchanges.

TOLL SERVICE

Toll service (long-distance service) is that part of the total telephone service rendered by the Company which is furnished between customers and different exchange areas in accordance with the rates and regulations specified in the Company's Toll Tariff.

TOLL STATION

A telephone instrument connected for toll service only and to which message telephone toll rates apply for each call made therefrom.

TOUCH CALLING SERVICE

A service arrangement permitting use of telephone instruments equipped with keys/button, each of which generates a distinctive tone, for the origination of calls. Touch Calling Service is offered for use with customer lines served from a central office equipped to furnish the service.

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

BASIC LOCAL EXCHANGE ACCESS LINE SERVICE

LOCAL EXCHANGE ACCESS LINE SERVICE

A. GENERAL

1. Basic local exchange access line service is provided by means of a circuit directly connecting the central office switching equipment with the customer's premises to enable the establishment of telephone communications between stations in the same or different exchange at the monthly rates contained in this tariff. The facilities used to furnish local exchange access line service are also used to furnish toll telephone service at rates for such services.

2. Conditions

a. The following rates are based on Extended Area Service which provides telecommunications service between the following exchanges: Eatonville to, Graham, Ashford and Tacoma.

b. Unless facilities or operating conditions limit the availability of the service, each customer must subscribe to either Option A or Option B. Those customers with 2 or more lines must use Option A except for those customers who are receiving Option B on two lines prior to April 4, 1995.

For any change of option subsequent to March 1, 1994 the non-recurring charge for a Record Only Charge will apply.

LATE PAYMENT CHARGES

- A. A late payment charge will be applied, subject to the following conditions:
1. A late payment charge of 1% will be applied to any amount on a customer's bill carried over to the next month's bill. A credit will be applied against the late payment charge to recognize the advance billing of local service.
 2. The late payment charge will be uniformly applied to all exchange customers.
 3. For those billing amounts purchased from other carriers, the late payment charge will be applied by the billing company. Duplication of late payment charges for billing amounts done on behalf of others is prohibited.
 4. The Company will accommodate customers who have a medical emergency as provided for by WAC 480-120-172 (6). In the case of certified medical emergency under these rules, the Company will waive the late payment charges for the length of time provided for in WAC 480-120-172 (6).
 5. The Company will waive late payment charges for customers who establish a preferred payment date, and whose payment is made by the scheduled date, as provided by WAC 480-12-161. If payment is not made by the scheduled date, late payment charges shall apply.

C. FEATURE PACKAGES

- 1. 2 Features - \$.25 per feature discount applicable to features with a monthly recurring charge (does not include Call Trace, Continuous Redial, Last Call Return and Call Blocking).
- 2. 3 or more features - \$.50 per feature discount applicable to features with a monthly recurring charge (does not include Call Trace, Continuous Redial, Last Call Return and Call Blocking).
- 3. Feature discounts only applicable to existing customers who subscribe to discount as of April 1, 2003.

D. CONDITIONS

- 1. Each access line is required to be Touch Tone Calling equipped for all CLASS Features.
- 2. A non-recurring Service Order Charge and non-recurring Central Office Charge as set forth under the Service Connection Charges section of this tariff shall not apply to the addition of Advanced Custom Calling Features.
- 3. CLASS services are available to customers having technically compatible features and customer premise equipment. The Company is not responsible for the compatibility of products and services of outside vendors.
- 4. Initial installation of Call Blocking, per line is at no charge to the customer. Subsequent orders for this feature, on the same line, will include non-recurring Service Order and Central office Charges; provided that no such charge shall apply to law enforcement, domestic-violence and crisis-intervention agencies and, upon certification by a domestic-violence or crisis-intervention agency, to volunteers working for those agencies. Caller Identification - Blocking Per Call is always provided at no charge.

ADVANCED CUSTOM CALLING (CLASS) (Cont.)

D. CONDITIONS (Cont.)

- 5. CLASS services will only be provided where technically and/or economically feasible.
- 6. Customers of Calling Number Delivery (Caller ID) or Calling Name and Number Delivery (Caller ID Name and Number) may not, without permission of the calling party, publicize or disclose to third parties telephone number information obtained through use of these services. Failure to comply with this condition may subject the customer to termination of these services.
- 7. The Company cannot guarantee that Call Blocking will be successful. Except for gross negligence, or wanton or willful misconduct, the Company shall not be liable for any direct damages, and in no case shall the Company be liable for consequential, incidental or special damages. The sole liability of the Company due to errors, omissions or mistakes shall be to refund the non-recurring charge, if any was assessed.
- 8. The charges and rate CLASS Service are in addition to the charge for the station of the class, type and grade of service furnished.
- 9. Non-recurring charges for class features may be waived for specified periods of time as part of a promotional campaign by the Company.
- 10. Customers who sign up for Caller ID (Calling Name Delivery), Caller ID Name & Number (Calling Name & Number Delivery) or Caller ID on Call Waiting will receive the first two full months of service free of charge. If the customer does not request that these features be disconnected prior to the end of the free trial period, service for the features will continue and will be billed at the rates shown in this Tariff.

MASHELL TELECOM, INC. d/b/a Lightcurve

MISCELLANEOUS SERVICE ARRANGEMENTS

ADVANCED CUSTOM CALLING (CLASS) (Cont.)

E. DESCRIPTIONS (Cont.)

- 3. Calling Name and Number Delivery (Caller ID Name and Number) - Allows a customer to view the directory name associated with a telephone number of an incoming call before answering. If the calling party has designated a call as private (pursuant to Call Blocking) or if the incoming call is handled by an operator, the calling name and number will not be displayed.

Calling Name and Number Delivery requires a telephone set or separate display unit capable of displaying the name and number information sent by the Central Office.

The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, in its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable for any party for errors, omissions or mistakes. The Company's sole and only obligation shall be to reasonably correct errors in names when notified of such errors.

(T)

- 4. Call Blocking - Per Call - Enables the calling party to control the delivery of his/her telephone number and/or name to the called party by temporarily changing the public/private status indicator of the telephone number. A customer must dial *67 before each call to change the indicator from public to private. "Public Status" allows delivery of the telephone number/name. "Private Status" delivers a private indicator only.

MISCELLANEOUS SERVICE ARRANGEMENTS

ADVANCED CUSTOM CALLING (CLASS) (Cont.)

E. DESCRIPTIONS (Cont.)

5. Call Blocking - Per Line - Provides a customer blocking of the delivery of the Customers directory number and name to the called party on a continuous basis. ANI service not effected: E911, operator, etc.
6. Call Trace - Allows a called party to initiate an automatic trace of the last call received. Call trace is billed on a per usage basis only when an attempt to trace and record the calling number is successful. After receiving the call which is to be traced, the customer dials *57 and the traced telephone number is automatically sent to the Company for action. The customer originating the trace will not receive the traced telephone number. The results of the trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them.
7. Continuous Redial - Allows a customer to dial a code that will cause the feature to automatically redial the last number the customer dialed. If the called number is busy, the feature will redial the called number for a limited period of time. A distinctive ring alerts the customer when the called number becomes available. When the customer lifts the handset, the call will be automatically dialed. The customer can continue to originate and receive calls without affecting the redial request. The continuous redial request can be cancelled by dialing the repeat dial deactivation code.

MISCELLANEOUS SERVICE ARRANGEMENTS

ADVANCED CUSTOM CALLING (CLASS) (Cont.)

E. DESCRIPTIONS (Cont.)

8. Last Call Return - Allows a customer to dial a code that causes the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. The customer does not have to know the number of the calling party. If the calling party's number is blocked, by the calling party, the service will not return the call. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available.
9. Priority Call - Allows a customer to assign a maximum of fifteen callers' telephone numbers to a special list. The customer will hear a distinctive ring at his/her location when calls are received from callers' telephone numbers on that list. Calls from telephone numbers not included on the screening list will produce a normal ringing pattern or call waiting tone.
10. Selective Call Forwarding - Allows a customer to specify a special list of a maximum of fifteen telephone numbers. Incoming calls placed to the customer from telephone numbers on that list will automatically be forwarded to a predefined telephone number. All other calls will be handled normally. Any message toll charges applicable to the forwarding are assessed to the Customer with the Call Forwarding Feature.

REMOTE CALL FORWARDING - INTEREXCHANGE

A. Description

Remote Call Forwarding - Interexchange (Premium RCF) is furnished where facilities and operating conditions permit. It is an arrangement to automatically forward all incoming calls placed to the remote call forwarding number, to another telephone number.

B. Terms and Conditions

1. Rates for the Premium RCF feature are in addition to applicable rates and charges for the service and equipment used.
2. Premium RCF is not offered where the terminating station is a pay telephone.
3. The Company will not provide identification of the originating telephone number to the Premium RCF.
4. Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call. Therefore, Premium RCF is not guaranteed for satisfactory transmission of data.
5. A condition of providing Premium RCF is that the customer orders sufficient features and facilities to adequately handle calls to the customer without interfering with or impairing any services offered by the Company. If, in the Company's opinion, additional features and facilities are required at the call forwarding location or if facilities are needed at the terminating station, the customer will be required to subscribe to additional features and facilities. Should the customer refuse to subscribe to additional features and/or facilities, the customer's Premium RCF service will be subject to termination.

MISCELLANEOUS SERVICE ARRANGEMENTS

TELEPHONE ASSISTANCE PROGRAM

The Company participates in the Lifeline program. Subscribers may be eligible for the Lifeline service offering ("Lifeline service") under Subpart E of Part 54 of Title 47, Code of Federal Regulation ("CFR"). Within the service areas for which the Company is designated as an "eligible telecommunications carrier" pursuant to Subpart C of Part 54 of Title 47 CFR, the Company offers Lifeline service to qualifying low-income consumers.

Lifeline service is a non-transferable retail local service offering that is available only to qualifying low-income consumers and for which qualifying low-income consumers pay charges that have been reduced in accordance with Subpart E of Part 54 of Title 47 CFR. In addition, for an "eligible resident of Tribal lands," as defined in § 54.400 of Subpart E of Part 54 of Title 47 CFR, the Company's Lifeline service charges are further reduced in accordance with Subpart E of Part 54 of Title 47 CFR.

The Company's offering of Lifeline service includes "toll limitation" only in the form of "toll blocking" (and not "toll control"), as those terms are defined in Subpart E of Part 54 of Title 47 CFR. "Toll blocking" is available with respect to Company-provided Lifeline service at no Company charge to the Company's subscriber to such Lifeline service.

On the issue date of this tariff sheet, "toll blocking" is defined § 54.400 of Subpart E of Part 54 of Title 47 CFR, as "a service provided by an eligible telecommunications carrier that lets subscribers elect not to allow the completion of outgoing toll calls from their telecommunications channel." "Toll blocking" does not necessarily result in the blocking of collect calls to the subscriber's telephone line or the blocking of calls billed from another location to the subscriber's telephone line.

TELEPHONE ASSISTANCE PROGRAM (Continued)

If the service areas for which the Company is designated as an "eligible telecommunications carrier" pursuant to Subpart C of Part 54 of Title 47 CFR includes any "Tribal lands," as that term is used in § 54.413 of Subpart E of Part 54 of Title 47 CFR, then, with respect to such "Tribal lands," the Company also offers "Tribal Link Up," as defined in § 54.413 of Subpart E of Part 54 of Title 47 CFR to each "eligible resident of Tribal lands," as defined in § 54.400 of Subpart E of Part 54 of Title 47 CFR. Tribal Link Up provides under certain circumstances, (i) a reduction of the customary charge for commencing telecommunications service and (ii) other benefits pertaining to such charge and to interest charges, if any, that may apply thereto, all as specified more fully in Subpart E of Part 54 of Title 47 CFR.

The availability of the telephone assistance programs described in this schedule, or any of them, to any otherwise eligible subscriber or applicant may be subject to such subscriber or applicant granting his or her written consent to disclosure and/or transmission by the Company of certain information pertaining to that subscriber or applicant, including, but not necessarily limited to, his or her name, other subscriber- or applicant-identifying information, the service address to which the relevant telephone assistance program service is being applied for and/or is being furnished, the specific assistance program in which the subscriber or applicant participates or has applied to participate, and the date or dates of such participation or requested participation, all in accordance with Subpart E of Part 54 of Title 47 CFR.

PAYPHONE SERVICE

A. GENERAL

Payphone Service is available to Payphone Service Providers where Company equipment, facilities, and operating conditions permit.

B. DEFINITIONS

- 1. Billed Number Screening - The term "Billed Number Screening" means a service which allows the Customer to identify to the Company that they will not accept any Third-number and/or Collect call's for billing to their telephone number. The Company places information regarding this screening restriction into a database that is normally accessed by operator service providers prior to such calls being completed. When customers have indicated that they do not wish to accept billing for any Third-number or Collect calls, the database will not validate charging for such a call. The operator service provider can then decide whether to complete the call based on this information provided by the database. Billed Number Screening can be ordered to screen third-number billed calls, collect calls, or both.
- 2. Originating Line Screening (OLS) - The term "Originating-Line Screening" means a service which enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted

PAYPHONE SERVICE (Continued)

B. DEFINITIONS (Continued)

- 2. (Continued) calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motel, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available.
- 3. Payphone - The term "Payphone" means a coin or coinless instrument provided in a public place where Payphone Service Provider customers can originate telephonic communications and pay the applicable charges by (1) inserting coins into the equipment, or (2) using a credit card, or (3) third party billing the call, or (4) calling collect.
- 4. Payphone Service Provider - The term "Payphone Service Provider" means an entity that provides telecommunications service by a Payphone connected to the public switched telecommunications network through Payphone Service ordered from this Schedule and is some times referred to in this Schedule as "Customer."
- 5. Selective Class Call Screening - The term "Selective Class Call Screening" means a service which enables the Payphone Service Provider to restrict outgoing operator handled calls, placed over the Company's network, from the service point to only those calls which are charges to a called telephone, a third number or a calling card.

2. (CO) Implemented Payphone Service (Cont.)

b. Features of Coin Supervision Additive Service are additives to the operation of the Payphone Service line. The Company offers those features that are provided by the functionality of the Company's switches. These include coin supervision, coin control (collect and return of coins, if applicable), and answer supervision (collectively provided as Coin Supervision Additive Service). The Company does not offer operator services. Features that are implemented by the functionality of an operator service provider, such as coin rating, coin refund, repair referral, and operator call screening, are the responsibility of the Payphone Service Provider.

1) Answer supervision provided signaling on the line notifying the line that the called party has answered.

2) Coin control provides an electrical signal on a CO Implemented Payphone Service Line indicating to the Payphone to collect or return coin(s) to the calling party.

3) Coin supervision indicates to an operator service provider the number and denomination of coins deposited based on information provided by the Payphone.

DIGITAL CENTREX SERVICE

A. GENERAL

1. Digital Centrex Service is a flat-rate business service with a 2 line minimum requirement. It is a central office based service provided from suitably equipped Telephone Company digital central office facilities.
2. The equipment permits the direct dialing between lines connected to the service and the direct dialing of outgoing calls. Incoming calls are received by direct inward dialing (DID) from the calling party to the station line or through an attendant console.
3. Digital Centrex Service consists of standard features and a number of optional features. The standard features are included in Digital Centrex Service. Optional features are offered subject to availability. Attendant consoles and station equipment are to be provided by the customer, or can optionally be leased from the Telephone Company.
4. Digital Centrex Service will be offered under two basic packages:
 - Multiline Variety Package (MVP) for 2-6 lines;
 - Integrated Business Services (IBS) for 7-1001 lines

DIGITAL CENTREX SERVICE

B. DEFINITIONS

1. Call Forward, All Calls - Allows incoming calls (intragroup and DID) directed to a station line to be routed to a user-defined line inside or outside the customer group or the attendant.
2. Call Forward, Busy - Permits incoming calls (originating from an outside group) attempting to terminate to a busy station line to be re-directed to a predetermine line inside the customer group.
3. Call Forward, No Answer - Provides for forwarding of incoming calls to a predetermined line inside the customer group when the called station line does not answer within a predefined ringing cycle.
4. Call Hold - Allows the user to hold one call for any length of time provided that neither party goes on-hook.
5. Call Pick-Up - Allows a station line to answer incoming calls to another station line within a defined call pick-up group. Call pick-up is provided on individual station lines within a customer group.
6. Call Waiting - Allows an incoming call (within or outside the customer group) to apply a call waiting tone on a busy station line which has been assigned the call waiting feature.
7. Cancel Call Waiting - A line option that allows a user, by dialing a code, to prevent, on a per-call basis, any incoming calls from call waiting on his/her line.
8. Class of Service - Provide the capability to allow or deny individual station line features. The treatments can be arranged to control all calls originating or terminating on station lines.

B. DEFINITIONS (Continued)

9. Common Control Switching Arrangement (CCSA) Access - Enables station line users in the customer group to gain access to the CCSA by using special access codes and dialing reserved number exchanges (RNX) patterns.
10. Touch Calling Station Signaling - Permits station equipment to utilize dual tone multifrequency signaling tones, instead of dial pulse to transmit called numbers, access codes, etc. to the central office entity, including the "#" and "*" digits.
11. Distinctive Call Waiting Tones - Permits a called station line user to determine whether an incoming waiting call is external or internal to the customer group by providing different tone cadences for the two stations.
12. Distinctive Ringing - Provides a unique pattern of ringing to permit the station line user to distinguish between intragroup and DID calls.
13. Intercom Dialing - Allows a MVP line to call other lines within the same customer group by using abbreviated dialing in lieu of one's seven-digit telephone number.

B. DEFINITIONS (Continued)

14. Speed Calling Individual Long List - Permits a station line user to dial selected numbers by using fewer digits than normally required. This is accomplished through the assignment of abbreviated codes to frequently called numbers. The speed calling list is customer-changeable. Allows a station line user to add, change, and/or delete telephone numbers from a list. A list of 30 numbers may be dedicated to the individual station line user.
15. Speed Calling Individual Short List - Permits a station line user to dial selected numbers by using fewer digits than normally required. This is accomplished through the assignment of abbreviated codes to frequently called numbers. The speed calling list is customer-changeable. Allows a station line user to add change, and/or delete telephone numbers from a list. A list of eight numbers may be dedicated to the individual station line user.
16. Station-to-Station Calling - Allows IBS customer group stations to complete calls to other stations within the group by using one to four digits without the assistance of an attendant.
17. Three-Way Conference - Allows a station line user to add a third party to an existing conversation.
18. Three-Way Conference/Call Transfer - Allows a user with or without the three-way calling feature assigned to form a three-way conference during a call transfer.
19. Entity - A central office entity is one central office switching system located within a central office building that provides services to the same geographic service area within a telephone exchange.

Option 1 - Call Handling Package

- (1) Call Forward, Busy Enhancements
- (a) Call Forward, Busy - All - Provides for forwarding of any call (incoming or intragroup) that terminates within the group to be automatically transferred when a busy condition is encountered.
 - (b) Call Forward, Busy - Incoming Only - Allows incoming calls (those which originate outside the group) directed to a station line to be routed to a predetermined line within the same customer group.
 - (c) Call Forward, Busy - Intragroup - Permits calls that originate and terminate within the customer group attempting to terminate to a busy station line, to be redirected to a predetermined line inside the customer group.
- (2) Directed Call Pick-Up (DCPU)
- (a) DCPU Non Barge-In - Permits a station line user to answer a call that is ringing any other line within the same customer group by dialing a code following by the station number of the ringing line. If the called station line has already been answered, the initiating station line will be connected to a reorder tone.
 - (b) DCPU Barge-In - Permits a station line user to answer a call that is ringing any other line within the same customer group by dialing a code following by the station number of the ringing line. If the called station line has already been answered, the initiating station line may barge-in to the answered call and be connected into a three-way call.

B. DEFINITIONS (Continued)

Option 1 - Call Handling Package (Continued)

(T)

(2) Directed Call Pick-Up (DCPU) (Continued)

- (c) DCPU Any Station - This is a terminating line option. A call to a station assigned the DCPUA option can be picked-up by any other member, from any phone withing the defined customer group.
- (d) DCPU Barge-In Exempt - This is a terminating line option that blocks any attempt by another station to barge-in.
- (e) DCPU Exempt - This is a terminating line option that blocks any attempt by another station to pick-up a call by means of DCPU, either barge-in or non barge-in.

(3) Ring Again

- (a) Ring Again - Allows a station line user calling a busy station to be automatically connected to the called line when the line becomes idle.

Option 2 - Call Waiting Enhancements

- (a) Call Waiting Incoming Only - Call Waiting tones will be applied to the busy station only if the call originated from outside the customer group.
- (b) Call Waiting Intragroup - Call Waiting tones will be applied to the busy station only if the call originated from within the customer group.

D. CONDITIONS

1. Digital Centrex Service is provided to customers with two or more lines. This service is furnished subject to availability. In those cases where the Company determines that additional equipment must be provided on the customer's premises, the customer will be required to furnish the suitable space and environmental conditions as determined by the Company.

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

DIGITAL CENTREX SERVICE

D. CONDITIONS (Continued)

- 2. The Digital Centrex Service line rates for customers with 2-99 lines apply as specified. Customers who subscribe to Digital Centrex Service for 100 or more lines may, at the Telephone Company's option, be offered customer specific pricing using incremental costs. This rate will be offered to the customer for acceptance in writing. An individual service application will specify length of service and applicable rate. With the exception of the customer specific line rate, all other rates, charges, rules and regulation, specified herein, continue to apply.
- 3. One directory listing is provided without charge for each Digital Centrex Service.
- 4. The monthly rate for Digital Centrex Service lines and features covered under a monthly service period plan is guaranteed against Company-initiated change and will apply for the selected service period. The minimum service period is 12 months.
- 5. If the service is cancelled in whole or in part by the customer after the installation of the service but prior to the completion of the service period, the customer shall be obligated to pay the remaining payments, as contracted.
- 6. The prepayment of charges in no way constitutes a purchase of the equipment, and the Telephone Company retains full ownership of all equipment covered by the prepayment.

DIGITAL CENTREX SERVICE

D. CONDITIONS (Continued)

7. Digital Centrex Service Station lines may be terminated in a customer-provided PBX system. Such line may be either ground start or loop start and may have any standard treatment. Transmission quality over Digital Centrex Service lines of this type is not guaranteed. Additional transmission improvement requested by the customer will be provided by the Telephone Company at charges based on cost.
8. When using Call Forwarding and Call Transfer, the Digital Centrex Service customer is responsible for the payment of the tariff station-to-station charges for each call connected over the exchange system between the Digital Centrex Service and the telephone at which the call is answered. The charge is applied to each call answered, including the call establishing the Call Forwarding mode, and collect and person-to-person calls which are refused at the answering telephone.
9. Unless specifically exempted, this service is subject to all general regulations applicable to the provision of service by the company as stated in the general tariff.
10. Trunk verification from a station line requires the establishment of a supplemental line treatment.

E. RATES AND CHARGES

The following rates and charges apply for a fixed period of time from 12 months to 60 months. The customer is required to pay the monthly rate for the number of months in the service period selected. This is a guaranteed rate which will remain unchanged until the end of the contract period. If the customer decides to discontinue service before the end of the selected period, a termination charge will apply as specified in paragraph D.5.

DIGITAL CENTREX SERVICE

E. RATES AND CHARGES (Continued)

1. Line Rates

The following rates include standard line features, DTMF signaling, and local transport. When the Digital Centrex Service line extends between different central office serving areas, the foreign exchange line charges will apply as specified in other sections of this tariff. The rates shown in packages MVP and IBS I apply to initial line installation and subsequent line addition. The basic rate structure for Digital Centrex Service customer is:

Number of Digital Centrex Service Lines
 Monthly Rates, Per Line for Flat Rate EAS capability

Service Period	MVP	IBS I
	2-6 Lines	7-12 Lines
Min. of 12 months	\$20.30	\$21.30
13 to 24 Months	20.10	21.10
25 to 36 Months	19.90	20.90
37 to 48 Months	19.70	20.70
49 to 60 Months	19.50	20.50

2. The following rates apply on a per line or per system basis, as specified for optional features.

Monthly Rates	Minimum of 12 Mo.	13 - 24 Months	25 - 36 Months	37 - 48 Months	49 - 60 Months
1. Call Handling Enhancement Per Line	1.25	1.00	0.80	0.60	0.40
1. Call Waiting Enhancement Per Line	0.85	0.70	0.56	0.43	0.30

3. Subsequent Additions

- a. After initially subscribing to Digital Centrex Service with a particular number of lines and set of features and for a selected service period, a customer may add lines or features by placing an order with the Company.
- b. A customer ordering additional lines must specify the number of lines and the features and must select a service period. The service period of the additional lines may be from 12 to 60 months, provided, however, that the service period for the additional lines may not extend beyond the end of the service period for the lines in the initial subscription.
- c. A customer ordering additional features for existing lines must specify the features and must select a service period. The service period for the additional features may be from 12 to 60 months, provided, however, that the service period for the additional features may not exceed beyond the end of the service period for the existing lines. The rate charges for the additional features shall be those in effect at the time the order is place.

4. Change in Length of Service Period

Subsequent to the establishment of service furnished under a selected service period and prior to the completion of that period, the existing service period may be replaced by another service period at the prevailing rates specified in E.(1) preceding, subject to the following conditions.

4. Change in Length of Service Period (Continued)

- a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
- b. The new service period begins with the date requested.
- c. No termination charge applies for a change in the length of the service period provided the customer selects a new service period equal to or longer than the time remaining under the former service period. Otherwise, a termination charge applies for the former service period.

5. Renewal Options

The customer has the following renewal options.

- a. Prior to completion of the current service period, the customer may select any service period offered. The rates in effect for new customers at the time renewal is effective will apply. The customer will be charged the current rate for the newly selected service period, commencing the day following completion of the prior service period.
- b. If the customer does not elect an additional service period and does not request discontinuance of service, service will continue at the monthly rate currently in effect for the twelve month service period and will be subject to all prevailing rules and regulations of the offering.

VIRTUAL CENTREX SERVICE

A. GENERAL

1. Virtual Centrex Service is a flat-rate business service with a two line minimum requirement. It is a service which offers central office switch functionality over dedicated lines to each customer station. Only a certain portion of the customer stations may access the public switched telecommunications network at any one time as specified in the customer's individual service application. Each customer station is assigned a unique telephone number for access on a direct inward dialing basis.
2. This service is available only where sufficient outside plant facilities and other facilities exist, taking into account the Telephone Company's projected demand for those facilities.
3. The definitions in the Company's Digital Centrex Service on Second Revised Sheet No. 251 through Second Revised Sheet No. 256 apply to Virtual Centrex Service.
4. The conditions that apply to Virtual Centrex Service are those that apply to Digital Centrex Service as contained in Second Revised Sheet No. 259 through Second Revised Sheet No. 261, except condition number 7 on Second Revised Sheet No. 261 does not apply.
5. The rates and charges for service, including the rate conditions contained therein, are as set forth in Second Revised Sheet No. 261 through Fourth Revised Sheet No. 265.

SERVICE CONNECTION CHARGES

B. CONDITIONS

- 1. Service charges are in addition to rates and any other charges normally applying under the tariffs, except where such application is specifically excluded. They apply in addition to installation, change, termination or construction charges specifically stated in connection with the various services described in the Company's tariffs. The non-recurring charges in this tariff section also apply for service connection or change of services that have no other non-recurring charge.
- 2. Payment of Service Charges
 - a. Payment of service charges for the initial establishment of service may be required prior to the establishment of service. (See General Rules and Regulations).

C. APPLICATIONS

- 1. Service Order Charge
 - a. The service order activity is classified as either Initial, Subsequent or Record Only Change. The charges are applicable for work done in receiving, recording, and processing information necessary to execute each customer request for initial connect of service per address (Initial Order Charge applies), to each order for a move, change, or addition to existing service on the same premises (Subsequent Order Charge applies), or to each requested change which only involves changing the Company's records (Record Only Order Charge applies).

MASHELL TELECOM, INC. d/b/a Lightcurve

PRIMARY INTEREXCHANGE CARRIER ACCESS

A. PRESUBSCRIPTION

1. InterLATA

a. InterLATA Presubscription is an arrangement whereby an end user may select and designate to the Company an interexchange carrier (IC) to access, without an access code, for intrastate interLATA calls. This IC is referred to as the end user's InterLATA Primary Interexchange Carrier (PIC). The end user may select the company as its PIC, or may select any other IC that orders originating Feature Group D Switched Access Service at the end office that serves the end user. After the end user's initial selection of a predesignated IC, for any additional change in selection, a non-recurring charge, as set forth in Section (1.c.) applies.

b. New end users who are served by end offices equipped with Feature Group D, will be asked to be presubscribed to an IC at the time they place an order with the Company for Exchange Access Service. They may select either of the following options. There will be no additional charge for this initial selection.

- Designate an IC as a PIC and dial 10XXXX to reach other ICs.

- End users who do not choose an IC as a PIC, will be randomly assigned a PIC based on the ratio of customer selected ICs.

MASHELL TELECOM, INC. d/b/a Lightcurve

PRIMARY INTEREXCHANGE CARRIER ACCESS

A. PRESUBSCRIPTION (Continued)

1. InterLATA (Continued)

b. (Continued)

Subsequent to the installation of Exchange Access Service, and after the end user's initial selection of a PIC, for any additional change in selection, a nonrecurring charge as set forth in Section (1.c.) below applies. This charge is billed to the end user which is the subscriber to the Exchange Access Service and applies only for selection of an IC which provides intrastate toll service.

c. PIC Change Charge Non-Recurring

Per line or trunk \$4.50 *

This charge shall be reduced to \$2.25 when a simultaneous change of the IntraLATA (ILP) PIC is made, see A.2. below.

2. IntraLATA

a. IntraLATA Presubscription (ILP) is an arrangement whereby an end user may select or be allocated to an IC to place intraLATA toll calls without the 10XXXX or 101XXXX access codes. The end user may select the Company as its ILP PIC, or may select another qualified carrier to transmit intrastate intraLATA calls that are designated as intraLATA Region to Region calls or intraLATA toll calls.

- Only one ILP PIC may be selected for a single Exchange Access Line, but that carrier need not be the same as the presubscribed interLATA carrier for that line.

*This charge is in addition to the charge contained in the National Exchange Carrier Association Tariff F.C.C. No. 5.

2. IntraLATA (Continued)

b. The following regulations are applicable to Exchange Service customers where ILP is applicable:

- New line customers will be given an opportunity to select an ILP PIC at the time they place an order for Exchange Access Service. If the new line customer fails to select an ILP carrier, the customer will be randomly assigned an ILP carrier based on the ratio of customer selected ILP carriers.
- Customer who select a qualified carrier as their ILP PIC, may select a different carrier to carry particular qualifying calls, either by dialing 10XXX/101XXXX or other necessary carrier access codes to reach the carrier of choice.

c. The Company will follow the interim ILP procedures described below during the ILP transition period following availability in the exchange.

- Customers will be provided a list of participating ILP carriers upon request. Customers desiring additional information on participating ILP carriers, will be provided with the carriers telephone number (if provided by the carrier).

PRIMARY INTEREXCHANGE CARRIER ACCESS

A. PRESUBSCRIPTION (Continued)

2. IntraLATA (Continued)

d. The Company will investigate claims from customers that a carrier submitted an ILP PIC change request without appropriate authorization from the customer.

e. A Customer will be billed a nonrecurring charge for ILP PIC changes, except as set forth below:

- There will be no charge for an initial ILP PIC change made in each exchange for ninety (90) days following the availability of ILP in the exchange.

- Subsequent to the ninety (90) day Transition Period, there will be no charge for an initial ILP PIC change made by new service customers during the first thirty (30) days following the availability of ILP in the exchange.

- The nonrecurring charge for an ILP PIC change is set forth in Section (2.f.) below.

- In instances where the end-user changes both the intraLATA and interLATA PIC to the same IC on the same order, only the interLATA PIC charge will apply.

f. PIC Change Charge Non-Recurring

Per line or trunk \$10.00

This charge will be reduced to \$5.00 when a simultaneous change of the interLATA PIC is made, see A.1. above.

g. The Company will notify potential carriers thirty (30) days prior to the initial availability of presubscription in specific market areas. Carriers will have the option of participating in all market areas or in a specific market area.

3. Unauthorized PIC Change

If an IC requests a PIC and/or ILP PIC change on behalf of an end user, and the end user subsequently denies requesting the change, and the IC is unable to substantiate that the change order was verified as required under WAC 480-120-139 then:

- The billed party will be reassigned to their previously selected IC. No charge will apply to the billed party for this reassignment.
- The Unauthorized Presubscription Change Charge as set forth below will apply to the IC that requested the PIC change. This charge is applied in addition to the PIC change charge set forth in either Section 1.c. or Section 2.f., preceding, whichever is applicable. If both a PIC and an ILP PIC change are the result of a single unauthorized PIC change, only the charge from Section 1.c. will apply in addition to the charge set forth below.

FIRST REVISED SHEET NO. 353
CANCELLING
ORIGINAL SHEET NO. 353

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

A. DESCRIPTION

Integrated Services Digital Network (ISDN) is a digital architecture that provides an integrated voice/data capability to the Customer premises facility, utilizing the public switched network. ISDN distributes voice, data, image and facsimile by two standard methods of access: a Basic Rate Service (BRS) or a Primary Rate Service (PRS). These are serving arrangements which conform to internationally developed, published, and recognized standards generated by the International Telecommunications Union (formerly CCITT).

B. DEFINITIONS

Basic Rate Service (BRS)

BRS consists of up to three distinct channels on one pair of wires: one or two B (Bearer) Channels and one D (Delta) Channel. BRS is compatible with National ISDN 1 and includes circuit switched voice and circuit switched data capability.

B (Bearer) Channel

The B-channel carries circuit-switched voice and/or data communication at speeds up to 64 kbit/s, from the Customers premises, over the loop facility, to the central office.

Issued: October 18, 2024 Effective: November 17, 2024

FIRST REVISED SHEET NO. 354
CANCELLING
ORIGINAL SHEET NO. 354

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

B. DEFINITIONS (Continued)

B-Channel Circuit-Switched Data

Circuit-switched Data provides the capability of making data calls over the public switched network. Information is transmitted the same way as digitized voice. Like a voice call, a circuit-switched data call ties up network/system resources for the duration of the call. Similar to voice, Calling Line Identification functionality is provided.

Circuit-Switched Service

Circuit-switched service provides the capability of voice and originating and receiving voice and data calls over the public switched network. Information is transmitted over a 64 kbps voice and "B" channel. A circuit-switched call ties up network/system resources for the duration of the call.

Call Appearance

A Call Appearance (CA) is the position(s) on a terminal to which numbers are assigned. A Directory Number can be shared by more than one ISDN terminal. The quantity and/or position of Call Appearances for the Primary Directory Number (PDN), Secondary Directory Numbers (SDN), Analog Call Appearances (ACA) and Shared Call Appearances (SCA) are limited by the standard configuration developed for the CPE.

WN U-3

MASHELL TELECOM, INC. d/b/a Lightcurve

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

B. DEFINITIONS (Continued)

D (Delta) Channel

The D-channel carries signaling and/or packet data information, at speeds up to 16 kbit/s on BRS, and signaling only information up to 64 kbit/s for PRS, from the Customer's premises to the central office. The D-channel has both data and signaling functionality; it does not have voice capability.

D Channel Packet-Switched Data

The X.25 Logical Circuit Call allows users to originate and receive X.25 data calls over the D-channel. Multiple data calls can be active simultaneously on a single D-channel.

Digital Subscriber Loop

The ISDN basic rate interface loop from the Central Office to the Customer's premises.

Primary Rate Service (PRS)

PRS has a capacity of 1.544 megabits per second (Mbit/s) and has multiple channels: 23 B-channels, and one D-channel, and is also known as 23 B+D access. The B-channels carry user information such as voice calls, circuit-switched data, or video, while the D-channel handles signaling information.

T1 Facility

This element is the digital facility transmitting at a rate of 1.544 Mbit/s.

C. TERMS AND CONDITIONS

1. General
 - a. The Customer or the Customer's authorized agent will be responsible for the procurement of associated Customer premises equipment (CPE) and will ensure compatibility with the ISDN digital switch serving the Customer.
 - b. Basic Rate Service includes a comprehensive 2B+D package. Contained in the standard package are numerous voice and data features. The standard features and functions support two terminal per BRS. Within the standard package there is limited flexibility for customization and various optional features can be added.
 - c. Toll charges will apply as incurred by the Customer, in addition to the ISDN service rates.
 - d. Company shall terminate ISDN Services at the Company network interface.
 - e. The Customer is responsible for placement, installation, operation, maintenance, repair and replacement of all inside wire not owned by the Company, and CPE that the Customer uses in connection with this service. Premises wiring and CPE must be compatible with the Company's provision of ISDN Service. Should the Customer request the Company to perform work on Customer's inside wiring and/or CPE, the charges outlined in Sheets 306-307, Section C. 4. Applications-Time and Material Charge shall apply.

C. TERMS AND CONDITIONS (Continued)

1. General (Continued)
- f. Should any change in inside wiring (including riser cable) not owned by the Company, or CPE, require the Company to redesign ISDN service, the Customer shall reimburse the Company for all costs incurred by the Company in making such a change. Should ISDN service fail due to inside wiring (including riser cable) not owned by the Company, CPE, or power failure, the responsibility for failure shall be solely that of the Customer and the Company shall have no liability of any kind.
- g. The Company shall not be responsible if change in any of the equipment, operations, or procedures of the Company utilized in the provision of ISDN Service render any facilities provided by the Customer obsolete or require modification or alteration of such Customer's equipment or systems, or otherwise affect its use or performance.
- h. Service is offered where facilities and equipment are available.
- i. Customer requests requiring ISDN features not offered by the Tariff will be considered on an individual case basis.

C. TERMS AND CONDITIONS (Continued)

2. Availability

- a. The rates and charges specified for Single Line ISDN Service are applicable only to Customers whose serving central office has been identified by the Company as having ISDN available. Customers whose serving central office has not been identified as having ISDN available will have rates and charges determined on an individual case-by-case basis.
- b. Single Line ISDN Service may be provided to Customers from a central office other than their normal serving office depending on available facilities.
- c. Service is offered where facilities and equipment are available.
- d. Some services are not available and/or compatible with ISDN.
- e. D-Channel Packet-Switched Data and Primary Rate Service (PRS) will be offered when available.

3. Indemnification

- a. The Customer shall indemnify and hold the Company, its directors, officers, employees and agents harmless from any and all claims, losses, liabilities, damage and lawsuits brought by any person or entity and arising, in whole or in part, out of Customer's breach of this Tariff. Indemnification shall include, but is not limited to, costs and attorney's fees.

MASHELL TELECOM, INC. d/b/a Lightcurve

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

D. SINGLE LINE ISDN SERVICE

Single Line ISDN Service is compatible with National ISDN 1 and includes circuit-switched voice, circuit-switched data and packet functionality.

1. Features and Functions

Two sets of features are being offered: One for "voice" and one for "data." Because of CPE selected by the Customer or the Customer's agent, some of the features offered may function differently, may not be available or may be required to be offered via an access code. The feature sets are as follows:

a. Voice Features

1) Standard Features and Functions

The standard features and functions support two terminals per BRS.

Additional Functional Calls

This feature allows up to five appearances of the Primary Directory Number of Additional Directory Numbers on the same terminal. If this feature is selected, the Primary Directory Number or Additional Directory Numbers cannot appear on any other terminal.

Call Exclusion

This feature has three options:

- Automatic Exclusion

This option allows a user to restrict other users sharing a Directory Number to bridge onto an active call or retrieve a held call. This option is automatically invoked as user goes off-hook to receive or place a call.

- Automatic Exclusion with Privacy Release

This option allows a user to allow other users that share a restricted Directory Number to bridge onto an active call or to retrieve a held call. This is activated by pressing a feature button before dialing or during a call.

- Non Exclusion

This option allows the users of a Shared Directory Number to bridge onto an active call or to retrieve a held call. This option is automatically invoked whenever the user goes off hook to receive or place a call.

Call Forwarding Variable - All Calls

This feature allows all Primary Directory Number calls to be forwarded to another number either within the same central office or a different central office.

Call Hold

This feature allows the user to place a call on hold by depressing a button or dialing an access code.

Caller Identification Blocking - Per Call

This feature enables a Customer to control the disclosure of his/her name and/or directory number to a subscriber of Caller Identification (where technically feasible) by temporarily changing the public/private status indicator from public to private. "Public status" allows delivery of the name and/or directory number. "Private status" prevents delivery of the name and/or directory number. Per Call Blocking is provided at no charge.

Calling Line Identification

Calling Line Identification is provided on an incoming and outgoing basis.

- Incoming Calling Line Identification

This feature displays the call identification information and the calling party's directory number (including nonpublished and nonlisted directory numbers) prior to the call being answered. Calling party's name is currently not available for ISDN services. Callers have the ability to inhibit the display of calling party information to the terminating number. Calling Line Identification is provided to the Primary Directory Number and to additional Directory Numbers. Calling Line Identification cannot just display to the Primary Directory Number when the number is shared.

- Outgoing Calling Line Identification

This feature provides a user who is originating a call with information about the called party and the facility or destination.

Primary Directory Number (PDN)

The main Directory Number assigned to each terminal will be considered the Primary Directory Number of that terminal.

Ringin

Ringin begins immediately for an incoming call and continues until the call is forwarded, answered, or abandoned.

Speed Calling 10

This feature permits the user to dial pre-programmed numbers using fewer digits than normally required. A standard speed call list allows for up to ten preprogrammed numbers per terminal. Speed call lists with 30 members are available at additional charges.

2) Optional Features and Functions

Additional Directory Number

An Additional Directory Number is any directory number that has not been assigned to a terminal.

Analog Call Appearance

The existence of a PDN from a Digital Subscriber Loop terminal appearing on an analog line.

Call Pickup

This feature allows a user to answer a call at another station, even when the user's station does not have a call appearance for the called Directory Number. While the other station is ringing, the user goes off-hook and enters a call pickup code or presses a call pickup feature button to answer the call.

Caller Identification Blocking - All Calls

This feature provides a permanent private indicator on a per-station basis. Once the blocking is established on the station, the private status can be deactivated by the Customer on a per call basis. Rates and charges are provided herein. Stations that share appearances of a restricted station are also restricted to avoid passing caller identification information.

• Selective Call Rejection

This feature allows a Customer to specify a special list of a maximum of 12 telephone numbers. When active, any call attempts to the Customer from these numbers will be prevented from terminating to the Customer and will instead be connected to an announcement informing the caller that the call is not presently being accepted by the called party.

Conference 6

This feature allows a user to establish a six-way conference.

Group Intercom

This feature allows the user to establish a dedicated call to any other station that is a member of the same intercom group within the same central office. This is done by pressing the intercom key and dialing one or more digits. Special alerting, depending on CPE, is provided for incoming intercom calls.

Ringing Options (Cont.)

(T)

• Delayed Ringing

Ringling assigned for an incoming call to be delayed for "N" seconds, however, the call appearance indicator or "status" lamp begins flashing immediately.

• No Ringing

This option can be assigned for a user who desires no ringling for an incoming call that terminates on a shared directory number.

Shared Directory Number

This feature allows several terminals to share one or more Directory Numbers of existing PDNs or Additional Directory Numbers. All Shared Directory Numbers must be provisioned from the same serving central office. If more than five Shared Directory Numbers are assigned to a terminal, additional charges will apply. A Shared PDN or Shared Additional Directory Number can only appear once on a terminal.

b. Alternate Circuit Switched Voice
Service/Circuit Switched Data Service

Alternate Circuit Switched Voice/Circuit
Switched Data Service provides the ability to
originate and receive either Circuit Switched
Voice calls or Circuit Switched Data calls over
a single "B" Channel but not simultaneously.
This arrangement is available where technology
permits.

The features applicable to Circuit Switching
Service are also applicable to this service.

c. B-Channel Circuit-Switched Data Features

1) Standard Features and Functions

Call Forwarding Busy Line for Circuit-
Switched Data

This feature permits all circuit-switched
data calls, attempting to terminate to a
busy PDN, to be redirected to another
Customer-specified directory number. A
busy line condition exists when a circuit-
switched data B-channel is unavailable.
This feature can either be assigned to the
user on an active basis or it can be
assigned an access code that can be
activated or deactivated by the user.

d. D-Channel Packet-Switched Data Features

Packet Switching is a technique in which packets of data are individually addressed and combined on a transmission path with other addressed packets. Packet Switched Data "D" Channel Service provides the ability to originate and receive X.25 packet data calls on an intraswitch basis. This arrangement provides a maximum throughput of 9.6 kbps. Each D Channel packet terminal will provide logical channel up to the technical capabilities of the serving central office. Multiple packet calls can be active simultaneously by a user on a single "D" channel. Up to eight data terminals can be supported per Basic Rates Interface. Service includes one data telephone number.

1) Standard Features and Functions

X.25 Flow Control Parameter Negotiation

This packet feature permits negotiation on a per-call basis of the flow control parameters associated with a given virtual call, such as packet size and window size for each direction of data transfer. The data window size and the maximum packet size is negotiated automatically during an X.25 data call.

1) Standard Features and Functions (Continued)

X.25 Logical Channels

Virtual circuits rather than physical circuits are used to establish packet switch calls. When a virtual circuit is established, a logical channel is assigned at the CPE and the switch for the duration of the call. A virtual circuit does not use any capacity of the facility unless data is actually being transferred. Two logical channels are provided per Digital Subscriber Loop.

X.25 Throughput Class Negotiation

This packet feature permits negotiation on a per-call basis of the throughput class for each direction of data transfer associated with a virtual call. The data terminal can negotiate the throughput class for an X.25 data call.

2) Optional Features and Functions

X.25 Fast Select Acceptance

This packet feature authorizes incoming packets from a sending data terminal equipment (DTE) to be transmitted to the destination DTE with Fast Select. Fast Select is a function of the CPE and is used on a per-call basis allowing the user to send up to 128 octets in the user data field of the call request packet to a terminal with Fast Select Acceptance.

X.25 Reverse Charging

This packet feature allows a user to assign billing to the called data telephone number on a per-call basis.

X.25 Reverse Charging Acceptance

This packet feature authorized transmission of incoming calls identified as Reverse Charge calls.

Incoming Calls Barred

An arrangement that prohibits a data terminal from terminating an incoming call.

3. Rates and Charges

a. Standard Package Description

The standard package includes a total of six call appearances, per terminal. The six call appearances will include one Primary Directory Number and five call appearances made up of the following:

- 1) Maximum of four Additional Functional Call appearances of the Primary Directory Number (same number)
- 2) Maximum of one Analog Call Appearance
- 3) Maximum of five Shared Directory Numbers

Additional Directory Numbers or additional Shared Directory Numbers are available at rates and charges specified in Optional Features and Functions.

b. Standard Charges

Following are the monthly rate and nonrecurring charges for Single Line ISDN Service. These rates and charges apply in addition to applicable rates and charges for other services as provided in this and other Company tariff schedules.

Single Line ISDN Service Basic Rate Access includes a usage allowance of up to 200 hours per month of aggregate usage for circuit-switched voice and circuit-switched data. Usage in excess of the 200 hours in a monthly billing period will incur measured usage charges as specified below.

- [2] Initial installation of Caller ID Blocking is at no charge to the Customer. Subsequent orders for this feature, on the same line, will be at the non-recurring rates from Sheet No. 307.
- [3] Each Analog Call Appearance will be charge the appropriate line rate from the tariff.
- [4] Five Shared Directory Numbers are allowed with the standard package.
- [5] This charge represents the per minute charge billed on originating usage in excess of 200 minutes in a month.
- [6] Example: A customer who used 260,000 calls during the billing period would be billed \$0.0025 for the first 250,000 calls, per call, and \$0.001 for each call over 250,000 (i.e., \$0.001 time 10,000 calls).

c. D-Channel Packet Usage Charges

Packet transport provides for the routing of data through the Public Packet Switching Network (PPSN) in both the originating and terminating directions. Usage charges are billed monthly based on the number of kilosegments transmitted through the PPSN for all types of access, and is rated on a per kilosegment basis. A segment consists of 64 octets of Customer data. For example, a packet of 128 octets will be billed as two segments.

(T)

Packet transport usage will be rounded up to the next whole kilosegment for each rate element within the billing period.

	<u>RATE</u>

Transaction Initiation Charges

- For the first 250,000 calls [6] \$0.0025
- For calls in excess of the 1st 250,000 [6] \$0.0010

E. PRIMARY RATE SERVICE OFFERING

1. Description

The basic Primary Rate Service (PRS) structure consists of 23 B-channels and a D-channel, for a total transmission rate of 1.544 Mbit/s, which is equivalent to a T1 facility. Each 64 kbit/s B-channel carries user information such as voice calls, circuit-switched data, or video. The D-channel is a 64 kbit/s channel that is used to carry the control or signaling information.

2. Definitions

a. Service Configurations

23B+D

This service configuration provides for 23 B-channels and 1 D-channel. The B-channels carry the circuit-switched voice and data, while the D-channel handles signaling information. The D-channel can control a maximum of 479 B-channels. The B-channels may be provisioned on the same facility as the D-channel or on other T1 facilities.

24B

This service configuration provides for 24 B-channels. The B-channels carry the circuit-switched voice and data information. The signaling information is provided by a D-channel on the first T1 facility.

23B+Back-up D

This service configuration provides for 23 B-channels and a backup D-channel. The Back-up D-channel is used if the primary D-channel, which provides signaling for multiple T1 facilities, fails. All active calls are maintained during the switch-over to the back-up D-channel.

b. Service Types

Call-By-Call PRS

Allows the Customer to configure the PRS-B channels to support inward and outward call flexibility determined by the traffic flow.

Dedicated PRS

Each B-channel is dedicated to inward, outward or 2-way traffic.

c. Usage

An ISDN Trunk Connection (TC) is a central office translation that provisions each B-channel in a PRS. The TC allows access to the exchange network. One ISDN Trunk Connection is required for each B-channel used in a PRS.

d. Standard Features

Calling Number Identification (Caller ID)

This feature displays the call identification information and the calling party's directory number (including nonpublished and Nonlisted directory numbers) prior to the call being answered. Callers have the ability to inhibit the display of calling party information to the terminating number.

Special Facilities Routing

Allows the Customer to specify alternate routing of Primary Rate ISDN service. These services are provided over such routes and facilities as the Company may elect. Special Facilities routing is involved when, in order to comply with requirements specified by the customer, the Company provides service which includes one or more of the following conditions:

- Diversity - Two or more services must be provided over not more than two different physical routes.
- Avoidance - A Service must be provided on a route which avoids specified geographical locations.

3. Terms and Conditions

- PRIS is provided subject to the availability of central office facilities.
- Each PRS consists of one T1 facility and one Service Configuration. A Customer may request more than one PRS per premises.
- Terms and Conditions, and Rates and Charges, as described for PRS, are in addition to the regular rates and charges for the service with which PRS is associated.

MASHELL TELECOM, INC. d/b/a Lightcurve

CONSTRUCTION CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

LINE EXTENSIONS

A. APPLICATION

The company will build extensions to plant to serve bona fide subscribers as outlined below.

B. CHARGES

1. In Base Rate Area

The company will build at its own expense all extensions to plant necessary to service subscribers within the base rate area.

(T)

2. In Suburban Area:

The company will build any extensions to plant necessary to serve subscribers within the suburban area; provided that the cost of such construction in excess of three years estimated exchange revenue shall be paid by the prospective subscriber in advance of construction.

In addition to all other extension and connection charges named in this tariff, the company may require the applicant to deposit, in advance of the construction, an amount equivalent to two years' estimated exchange revenue. The subscriber making such deposit will then be credited monthly with 1/24th of this amount. If the subscriber discontinues service before the end of the two year period, he will not be entitled to a refund of the uncredited portion of the deposit.

C. CONDITIONS

- 1. No extension will be considered as coming under this schedule if the ratio of the total cost of the extension to the estimated annual exchange revenue is greater than six to one.

- Extensions costing more than the six to one ratio specified under Charges B.2. may be constructed under terms of a special contract between applicant and Company.
2. When the actual cost of the extension has been determined, the subscriber's payment will be recomputed. If the original payment was greater than the amount computed on the basis of actual cost the Company will refund the difference. If the original payment was less than the amount computed on the basis of actual cost the company will require any additional payment from the subscriber.
3. Subsequent applicants for service on such an extension who apply within three years after establishment of service shall obtain in writing, from each and all of the original applicants, their successors or assigns, who made advance payments on the extension under this rule, either:
- a. A receipt of payment of a pro rata share of the amount paid on the extension by the original applicants, or
- b. A waiver of payment in lieu of receipt under a.
4. When the cost of furnishing service to the applicant referred to in Condition C.3. exceeds the investment required of the utility under Charges B.2., then the connection will be treated as a new extension.

LINE EXTENSIONS - BASIC RESIDENTIAL SERVICE

1. Applicability

This Schedule applies to requests for extension of residential basic local exchange service where the application is completed and the application and any required payments have been received by the Company on or after October 4, 2008. This Schedule does not apply to the following:

- (a) Requests for extension of residential basic local exchange service where the application is completed and the application and any required payments have been received by the Company prior to October 4, 2008;
- (b) Applications for extension of service for business customers;
- (c) Applications for extension of service by residential customers for other than residential basic local exchange service, unless the Company chooses to treat such application as falling under this Schedule; or
- (d) Applications from developers requesting service for developments.

For applications for extension of service that do not fall under this Schedule, the terms and conditions governing such application are found at Line Extensions under Sheets 403 through 405.1

2. Definitions

As used in this Schedule, the following terms shall have the definitions ascribed to them in WAC 480-120-071(1) and as may be clarified in this tariff: applicant, cost of service extension, developer, development, distribution plant, drop wire, extension of service, extraordinary cost, order date, premises, tariffed, temporary occupancy, and temporary service. A copy of WAC 480-120-071(1) is available upon request.

3. General

1. The Company will furnish, install and maintain all facilities necessary to serve applicants or customers in accordance with the Company's lawful rates, terms and conditions, and with its established construction standards.

2. The type of construction (buried or aerial) is the prerogative of the Company, except where designated by law. If the applicant(s) chooses a different type of construction than that specified by the Company, the applicant(s) will be responsible for any additional cost.

3. The route will be determined by the Company. If the applicant(s) chooses a different route than that specified by the Company, the applicant(s) will be responsible for any additional cost.

4. Bills for construction charges are not to be construed as being bills for exchange or interexchange service.

5. The estimated cost of construction for a specific job will be provided to the applicant(s) requesting the construction. The estimated cost of construction will be in writing and will be good for thirty days after the Company provides a bill to the applicant(s).

6. Where the requested service location means that it is necessary or desirable to use private easements or rights-of-way, government rights-of-way, or both, to furnish service, the applicant or applicants may be required to provide or pay the cost of providing such items, including, but not limited to, related permit fees, in addition to any other applicable charges.

4. Order Date

When the applicant (of applicants) completes and delivers the application for extension of service to the Company, the date the application and any required payments are received by the Company shall be considered the order date. The order date will be extended under three circumstances:

(a) Extension of service less than or equal to one thousand feet where the Company determines that extraordinary costs exist for the extension of service and the Company has requested and been granted permission by the Commission to charge the applicant for the extraordinary costs of the extension of service;

(b) Extension of service greater than one thousand feet where the Company determines the first one thousand feet of an extension longer than one thousand feet involves extraordinary costs and the Company has requested and been granted permission by the Commission to charge the applicant for the extraordinary costs of the extension of service; or

(c) The Company conditions construction of the extension of service on completion of support structures, trenches, or both on the applicant's property.

In the case of (a) or (b), unless otherwise agreed by the Company and the applicant (for example, as to the creation of a payment plan), the Company will provide the applicant with a bill for the estimated cost of construction for the extension of service. The date the applicant meets the payment terms set forth with the bill for the estimated cost of the extension of service shall be the order date.

In the case of (c), the order date shall be the date the Company verifies that the applicant has installed the appropriate support structures, trenches, or both on the applicant's property in accordance with Company construction specifications.

5. Allowance

The Company provides a one thousand foot allowance for extensions of service subject to the conditions set forth in this Schedule.

Multiple applications for a single extension of service or multiple applicants on a single application for an extension of service are permitted when the extension of service follows a single construction path. When there are multiple applicants for an extension of service or multiple applications received at the same time for an extension of service that follow a single construction path, the one thousand foot allowance may be aggregated by the number of applicants. For example, if there are two applicants, the allowance becomes two thousand feet; provided, however, that multiple applicants that are on the same parcel or a parcel that has been divided for development purposes within the twelve (12) months preceding the application will be treated as a single application for purposes of calculation of the allowance.

6. Application Process

The applicant must complete the application form provided by the Company and submit it to the Company. The application form will be provided to the applicant within seven business days of the applicant's initial request for service. In the case of multiple applicants, each applicant must either file a separate application form or be separately identified on and sign a single form. Each applicant will be billed an equal portion of the applicable charges. Multiple applicants may agree to divide the bill among themselves in a ratio different from that billed so long as the Company receives full payment. Where there are no applicable charges for an extension of service, the applicant's request for service will serve as the completed application for extension of service.

LINE EXTENSIONS - BASIC RESIDENTIAL SERVICE (continued)

7. Construction Timeline

Under normal circumstances, the Company will construct the extension of service and provide residential basic local exchange service within thirteen months from the order date. There are three exceptions:

(a) When an extension of service includes costs or charges to be paid by the applicant or applicants, the Company will provide the applicant or applicants a bill for the estimated cost or charges within one hundred and twenty days of the date that the Company receives the application;

(b) When there are extraordinary costs for construction that the Company is authorized to receive (see Section 4, above), in which case the Company shall provide the applicant a bill for the estimated cost of construction as soon as practicable after receiving permission to recover the extraordinary costs; and

(c) If the applicant is a subsequent applicant and required to pay any charges associated with a previous extension of service as provided for in Section 10 following, the Company will provide the applicant a bill for the estimated cost of construction within one hundred and twenty days of the order date.

In the case of (a), (b) or (c), the extension of service will be completed within twelve months after the applicant or applicants return the application and meet the payment terms established by the Company at the time the bill for the estimated cost or charges is presented to the applicant or applicants, as applicable.

MASHELL TELECOM, INC. d/b/a Lightcurve

CONSTRUCTION CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

LINE EXTENSIONS - BASIC RESIDENTIAL SERVICE (continued)

7. Construction Timeline (continued)

In addition to the three exceptions set forth above, completion of the extension of service may be delayed or extended due to delays in obtaining permits related to the extension of service or due to other causes beyond the control of the Company, such as, but not limited to: unavailability of equipment or supplies; civil police or military action, including national emergencies, riots, war, civil insurrections or acts of terrorism; fire, flood or other natural disaster; delays caused by an applicant, including failure to provide access to an applicant's premises; delays caused by local, state, federal or tribal governmental authorities; delays caused by third parties; or negligent or willful misconduct of customers, an applicant or third parties, including, but not limited to outages originating from introduction of a virus onto the Company's network. If such an event occurs, the Company shall inform the applicant or applicants of the estimated delay in the completion of the extension of service.

8. True Up of Costs of Extensions of Service

For an extension of service for which charges apply under this Schedule, the Company will determine the difference between the estimated cost that was billed to the applicant or applicants and the actual cost of construction of the extension of service. If the actual cost of construction of the extension of service is less than the estimated cost that was billed to the applicant or applicants, the Company will refund any overpayment. In the case of multiple applicants on an extension of service that follows a single construction path, the refund will be made on a prorata basis among the appropriate applicants. If the applicants have divided the bill among themselves in amounts different from the amounts billed, it is up to the applicants to reconcile any difference in refund. If the cost of construction of the extension of service exceeds the estimated cost that was billed to the applicant or applicants, the Company may bill, and the applicant or applicants shall pay, the reasonable additional costs up to ten percent of the estimate. In the case of multiple applicants on a single extension of service, the amounts shall be billed to the applicants on a prorata basis.

8. True Up of Costs of Extensions of Service (continued)

In every case of a refund or additional charges, the Company shall provide the applicant or applicants detailed construction costs showing any difference (whether in excess of the estimated cost of construction or below the estimated cost of construction).

9. Supporting Structures and Trenches

Construction of an extension of service is expressly conditioned upon the applicant completing construction of support structures, trenches, or both, on the applicant's property as determined by the Company. The applicant's responsibility extends from the applicant's property line to the applicant's premises. In the case of multiple applicants for an extension of service, each applicant is responsible for construction of support structures, trenches, or both, on that applicant's property. All such supporting structures must be placed in accordance with Company construction specifications provided to the applicant by the Company.

The applicant(s) has the option of providing the trench and support structure as determined by the Company, or may choose the Company, or a different company for the construction of the trench and structure. If the applicant(s) chooses the Company to dig the trench and provide the supporting structure, the applicant agrees to pay the Company all costs associated with the trench and supporting structure. Once support structures, trenches, or both have been constructed, the Company will provide drop wire to the applicant(s) at no charge.

Once constructed and in place, all supporting structures and drop wire will be maintained by the Company so long as service is provided by the Company to the applicant. If the Company stops providing service to the applicant, the Company will have no responsibility for maintenance of supporting structures and drop wire. To the extent that the Company provides support structures, such structures shall be owned by the Company.

9. Supporting Structures and Trenches (continued)

In arranging for service under this Schedule, the applicant (or in the case of multiple applicants, each applicant) shall be deemed to have granted the Company and its employees, agents and contractors an easement for ingress and egress to and from the drop wire, supporting structures, trench and protector or NID for purposes of repair, maintenance, operation, replacement of said drop wire, supporting structures and trenches, along with the protector or NID.

Any cost incurred because of sharing an open trench or aerial structure on the applicant (s) private property with another utility, will be the responsibility of the applicant(s).

10. Latecomer's Fees

If, within five years of the order date for an extension of service, a subsequent applicant's or applicants' seek(s) service which would be provided by means of the previous extension of service where the original applicant or applicants paid construction charges under this Schedule, then the subsequent applicant or applicants will pay a proportionate share of the original extension of service charges before the Company will provide service. However, if a subsequent applicant's service falls within the one thousand foot allowance under this Schedule (or if multiple applicants, the aggregate allowance), then no amounts are due for the previous extension of service.

The Company will provide notice of the availability of a refund to the last known address of the original applicant or applicants. The notice will state the amount of refund available. To receive the refund, the prior applicant or applicants must request the refund within sixty days of the date of the notice. If a refund is not requested in a timely manner, then the amounts paid by the subsequent applicant or applicants shall be refunded to the payor(s)

10. Latecomer's Fees (continued) (T)

Where a subsequent application involves an additional extension of service such that the original extension of service must be extended further to serve the subsequent applicant, this is an application for a new extension of service and no refund is to be paid to the prior applicant or applicants.

11. Temporary Service

Where an applicant requests temporary service, the allowance set forth under this Schedule does not apply and the applicant shall be billed for the full cost of the extension of service. The order date for the extension of temporary service shall be considered to be the date upon which the applicant or applicants for temporary service meet the payment conditions as contained in or provided with the bill for the estimated cost of construction. The true up provisions under Section 8, above, apply to the extension of service for a temporary service.

12. Additional Notices

When the application form is provided to the applicant, the Company shall also provide a brief explanation of the extension of service rules. The explanation will include the possibility that the applicant will be required to contribute to the cost of a previously built extension that is less than five years old if a previously built extension is involved in providing service to the applicant.

When a bill for construction costs is delivered to an applicant, the Company shall also provide a notice of the right to be reimbursed for a portion of the cost of the extension of service by a subsequent applicant and the duty to keep the Company apprised of the applicant's current address.

(T)

RULES AND REGULATIONS

A. GENERAL

1. Customer-provided circuitry and terminal equipment may be connected at the customer's premises to facilities furnished by the Company for use with exchange service in compliance with Part 68, Subpart B of the Federal Communication Commission Rules and Regulations.
2. The General Rules and Regulations contained in this tariff apply. In any instance where the tariff of the Company conflicts with the effective order of the FCC, the FCC order will have precedence.

B. RESPONSIBILITY OF THE CUSTOMER

1. A customer must make application to the Company before connecting customer-provided terminal equipment, protective circuitry, data equipment, or communications systems, to the exchange and message toll network. Such application may be made verbally prior to the desired in-service date and shall include the following:
 - a. The type and manufacture of each item of equipment of the FCC registration number and ringer equivalence number of the registered terminal equipment or registered protective circuitry.
 - b. The number of access services desired.

FOREIGN EXCHANGE SERVICE

CONTIGUOUS EXCHANGES

Applicable to exchange service furnished from a contiguous exchange of another utility to a subscriber located in the exchange of this utility. The exchange of the other utility is herein referred to as "foreign exchange" while the exchange of this utility is herein referred to as "local exchange".

Foreign Exchange Service will be limited to existing customers only. No new services will be furnished nor will supersedure of existing services be allowed.

A. RATE PER MONTH

The rate for each primary station in the local exchange shall be the sum of the following, as applicable:

1. Station Rate

One and one-half times the primary station rate of the foreign exchange.

2. Foreign Exchange Service Mileage Rate

For the airline distance from the subscriber's station in the local exchange to the nearest point on the common boundary of the local and foreign exchange,

First 1/4 mile or fraction	\$0.50
Each additional 1/4 mile or fraction	.25 more than the preceding 1/4 mile

3. Suburban Mileage Rate

The rate applicable in the foreign exchange for suburban mileage.

4. The facilities to connect to the utility serving the foreign exchange, if needed, shall be ordered out of and charged according to, the Network Access and Toll Service portion of this tariff. Mileage will be based on distance from the central office to the customer.

MASHELL TELECOM, INC. d/b/a Lightcurve

NETWORK ACCESS AND TOLL SERVICE

ADOPTION OF "WECA TARIFF"

1. By this reference thereto, Mashell Telecom, Inc. d/b/a Lightcurve (the "Company") hereby adopts and concurs in Washington Exchange Carrier Association Tariff WN U-2 (the "WECA Tariff") excepting therefrom those portions thereof set forth below under the heading "Exceptions." The regulations, rate and charges applicable to the provisions of Switched Access Service, Special Access Service and other miscellaneous service provided by the Company to Intrastate Customers ("ICs") are same as those in WECA Tariff. The Company provision of service as set forth in the WECA Tariff is specifically intended to provide exchange network access to ICs for their own use or in furnishing their authorized intrastate service to end users, and for operational purposes directly related to the furnishing of their authorized services and no other. Operational purposes include testing and maintenance of circuits, demonstration and experimental services and spare services. Telephone exchange service required by the ICs for their individual administrative use are furnished under other applicable schedules of this tariff. Based on ICs' use of the facilities involved, the Company will determine whether the access rates and charge specified in WECA Tariff or the rates and charges in other schedules of this tariff apply. (T)

The rates set out below under "SUBSTITUTED RATES AND CHARGES," Section 3b, applicable to terminating Switched Access Service traffic no longer apply. In lieu thereof, please reference Section 1.3, Sheets No. 29, 29.1 and 29.2, of the Washington Exchange Carrier Association Tariff WN U-2.

2. Any reference to "Contel Tariff" herein is inadvertent and shall be deemed to mean "WECA Tariff." All references to "Telephone Company" in the WECA Tariff shall be deemed to mean Mashell Telecom, Inc. d/b/a Lightcurve, and all reference therein to "WN U-2" shall be deemed to read WN U-3. (T)

3. EXCEPTIONS

- a. Any provision of the WECA Tariff which relates to services which the Company cannot provide with its existing facilities and equipment shall not apply.

b. Substituted Rates and Charges:

Notwithstanding any provision of WECA Tariff WN U-2 to the contrary, the rates and charges specified below for Local Transport Facility under Section 5.7.5 ("Minimum Monthly Usage Charge") and/or Section 5.8.1(A) ("Local Transport") shall apply per BHMC, per line or trunk, or per access minute, as indicated below, rather than per BHMC (line, trunk or access minute) per mile, and shall apply without regard to the application of any billing percentage ("BP") or interconnection point factor ("ICP Factor"). The said Local Transport Facility rates and charges apply based upon the company end office location at which the local transport facility originates or terminates.

Any language contained in WECA Tariff WN U-2 pertaining to the calculation and application on a per mile basis or rate elements and/or rate sub-elements set forth in Section 5.7.7 and/or Section 5.8.1 (A) shall not apply' provided, however, that, where appropriate, such language shall be deemed modified to the minimum extent necessary to render it consistent with the matters set forth in this Paragraph 3 b. and with the rates and changes specified below under Section 5.7.5 and/or Section 5.8.1 (A), and such language shall apply as so modified.

The rates and charges set forth herein below shall apply in lieu of the corresponding rates and charges set forth in the sections of the WECA Tariff identified herein below. For any rate element or rate sub-element not listed below the rates and charges set forth in the WECA Tariff shall apply.

1. Each reference in the following sections of WECA Tariff WN U-2 to "Interim 800 Translation" shall be deemed to read "Interim NXX Translation": 4.2.8 (f); 5.7.1 (C) (2).
2. Each reference in the following sections of WECA Tariff WN U-2 to "Interim 800 NXX codes" or "Interim 800 NXX code(s)" shall be deemed to read "Interim NXX code(s)": 4.2.8(A) (f).
3. Section 4.2 of WECA Tariff WN U-2 shall be deemed modified to read as follows:

4.2 Access Order

An Access order is used by the Telephone Company to provide a customer Access Service as follows:

- Switched Access Services as set forth in 5. following,
- Special Access Services as set forth in 6. following, and
- Other Services as set forth in 4.1.2 preceding.

When placing an order for Access Service, the customer shall provide, at a minimum, the following information:

c. 800 Data Base Access Service (Continued):

- For Feature Group A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone office), the Local Transport options and Local Switching options desired. In addition, the customer shall specify whether the off-hook supervisory signaling is provided by the customer's equipment before the called party answers, or is forwarded by the customer's equipment when the called party answers. The customer shall also specify which lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as signal lines.
- For Feature Group B Switched Access Service, the customer shall specify the number of trunks and the end office when direct routing to the end office is desired or the access tandem switch when routing is desired via an access tandem switch and Local Transport options and Local Switching options are desired. The customer shall also specify for terminating only access minutes, whether the trunks are to be arranged in trunk group arrangements or provided as single trunks.
- For Feature Group C and D Switched Access Service, the customer shall specify the number of busy hour minutes of capacity (BHMC) from the customer designated premises to the end office by Feature Group and by type of BHMC. This information is used to determine the number of transmission paths as set forth in 5.5.5 following. The customer then specified the Local Transport, Local Switching and Interim NXX Translation options.

MASHELL TELECOM, INC. d/b/a Lightcurve

NETWORK ACCESS AND TOLL SERVICE

3. EXCEPTIONS (Continued)

c. 800 Data Base Access Service (Continued):

- The BHMC may be determined by the customer in the following manner. For each day (8 a.m. to 11 p.m., Monday through Friday, excluding national holidays), the customer shall determine the highest number of minutes of use for a single hour (e.g., 55 minutes in the 10-11 a.m. hour). The customer shall, for the same hour period (i.e., busy hour) for each of twenty consecutive business days, pick the twenty consecutive business days in a calendar year which add up to the largest number of minutes of use. Both originating and terminating minutes shall be included. The customer shall then determine the average busy hour minutes of capacity (i.e., BHMC) by dividing the largest number of minutes of use figure for the same hour period for the consecutive twenty business day period by 20. This computation shall be performed for each end office the customer wishes to service. These determinations thus establish forecasted BHMC for each end office.

8. 800 Data Base Access Service

- (a) The following new definitions are added to Section 2.6 of WECA Tariff WN U-2:

800 Service Management System

The term "800 Service Management System" (800 SMS) denotes the main operations support system used to create and update 800 service records in the national 800 data base.

c. 800 Data Base Access Service (Continued):

800 Service Provider

The term "800 Service Provider" denotes a telecommunications company, including Exchange and Interexchange Carriers, that offers 800 Service to subscribers.

Query

The term "Query" denotes a request for specific information generated by a computer processor and sent to a data base, with a predefined set of responses expected.

Response

The term "Response" denotes on response from a set of predefined expected responses to a request for information contained in a query from a computer processor.

Responsible Organization (RESPORG)

The term "Responsible Organization" denotes the entity that is responsible for the management and administration of 800 Data Base Access Service records in the 800 Service Management System.

Service Switching Point (SSP)

The term "Service Switching Point" denotes a signal point equipped with the ability to halt call process, formulate and send a SS7 query to a remote location and route the call based on information contained in the response.

MASHELL TELECOM, INC. d/b/a Lightcurve

NETWORK ACCESS AND TOLL SERVICE

3. EXCEPTIONS (Continued)

d. Dialing Parity Service

The Company provides intraLATA dialing parity under a plan approved by the Commission. A copy of the Commission approved plan is available upon request.

e. Dialing Parity Surcharge

The following dialing parity surcharge applies to all access minutes of use (both originating and terminating) and shall expire December 31, 2001.

Per Access Minute of Use \$0.001801

f. General Exception for Measurement and Billing

Notwithstanding anything to the contrary in WECA Tariff WB U-2, the Company, at its option, will use the following measurement parameters where messages are delivered to the Company without sufficient information available for the Company to develop terminating access records in the normal manner: the Company will use Signaling System 7 (SS7) ISDN user part (ISUP) to determine the measurement times for a message for purposes of access billing. Specifically, the call will be deemed to begin for billing purposes with transmission of the Address Complete Message and the message will be deemed to be complete for billing purposes with transmission of the Release Complete Message.
