| Merina, McCoy & Co., CPA's, PC   | 2 years  |
| Waste Connections US, Inc.       | 22 years |

**Prior Work Assignments and Related Experience**

Mr. Wonderlick began public accounting practice with a "Big Eight" accounting firm, where he consulted and conducted audits in the forest products, healthcare, manufacturing, construction, and service industries. He then spent eight years in a controllership role at a division of Waste Management, Inc., a Fortune 500 service company. In this capacity, he was responsible for installing and maintaining internal controls, monitoring performance against benchmarks and productivity goals, timely production of division financial statements, and for general business guidance of the organization. He has extensive experience in developing and preparing cost analyses and performance measures in service industries.

As the manager of the rate consulting practice at Merina, McCoy & Co., CPAs, PC., he was responsible for the performance of solid waste industry rate studies for Washington, Clackamas, and Tillamook counties. He provided similar services for over a dozen municipalities, including Portland, Gresham, Beaverton, Tigard, and Hillsboro. These engagements required collecting massive amounts of data, organizing and distilling the data, and then making decisions concerning complex allocation issues, allowable costs under various agreements, and selection of appropriate allocation bases. In addition, he used his training and experience, along with his skills in managing large-scale projects, to successfully manage larger performance audits and other projects specifically including development of indirect cost rate plans and design of appropriate methodology.

Joe returned to supervising direct accounting operations when he joined Waste Connections in 2001 as their Controller for Portland, the Willamette Valley, and Coastal Operations. He was responsible for monthly closes, projections, and developing annual budgets, and for keeping the locations compliant with GAAP and

Company Accounting Policies. Between 2001 and 2010, revenues grew from about \$20 million to \$90 million through growth and acquisition. Throughout this time, Joe was responsible for integrating the Company's accounting with the myriad of franchises and licensing arrangements that exist among the various cities and counties the Company serves, joining technical and rate committees whenever markets were large enough to have such committees.

In 2010, Waste Connections' Western Region Office formed a "Pricing Group" to assist field locations in the preparation of the increasing complex annual reports and general filings to various government entities, and to manage the database that accumulates information about pricing and revenue. Joe transitioned to become a Pricing Manager for the group. He directs a staff of 3 additional regional pricing analysts. The group supports about 100 business units generating nearly \$2 Billion in revenues from Alaska south to Southern California and east to Idaho and Nevada. The majority of the regulatory work is in the states of Washington, Oregon, and Alaska.

From 2006-2012, Joe served as the treasurer of the Association of Oregon Recyclers, Oregon's trade association of individuals, governments, and industries dedicated to the advancement of recycling and improved materials management. Currently, Joe serves on the board of his church in Beaverton, Oregon and serves on the investment committee of a community based charitable foundation.
