I would like to see this change: Surcharges--passed on automatically

When a utility gets hit with a surcharge from the government, they should be able to automatically pass that on to the customers, without having to make a special request from the WUTC. This will **save lots of time and money on everyone's part** (it will cut overhead costs and governmental time and money costs). And it is fair to the companies being so sur-charged.

Kathy Kaser, Sec/Treas of Oasis Water Corp.
