Note 1: The proposed rates associated with this filing were projected to generate revenues greater than the direct cost of the service and make a positive contribution to the shared and common costs of the Company.

Note 2: The revenue gained from this filing were projected to generate revenues greater than the lost revenues due to the promotion, the cost of the promotion and the cost of the services included in the promotion.

Note 3: The proposed rates associated with this filing were set above the non-recurring cost of the service.

Note 4: The proposed rates associated with this filing were adjusted to cover the additional cost of the service.

Note 5: Imputed toll floor based on the Company's switched access rates plus the incremental cost of non-access.

Cost Methodologies:

1-Direct                   The contracted rates associated with this ICB will generate revenue greater than the service's direct costs, and make a positive contribution to the shared and common costs of the Company.

2-Benton                   During contract negotiations, a variety of rates were presented (costing based on long vs short term periods, high vs low NRCs). The actual contract signed by both parties misrepresented pricing that would have recovered direct costs. This was disclosed to the Commission with our filing (January 1999).

3-King Co                   This filing was to correct customer location/address information and tariff rates. No rates, terms or conditions changed under this filing, thus, no cost support was developed or filed.
