<sup>\*</sup> Industry averages for 97 industries using *Value Line*'s database of 1,704 companies - Updated 7-6-20.

<sup>\*\*</sup> Value Line computes betas using monthly returns regressed against the New York Stock Exchange Index for five years.

These betas are then adjusted as follows: VL Beta = [{(2/3) \* Regressed Beta} + {(1/3) \* (1.0)}] to account to tendency for Betas to regress toward average of 1.0. See M. Blume, "On the Assessment of Risk," Journal of Finance, March 1971.
