Subject: RE: Gasco Sediments Site Field Change Request Form 2

Hunter,

Per your below request, the Gasco Sediments Site ISS laboratory treatability study FCR 2 has

GASCO0049842

been revised to clarify that the material meets the criteria for substantial product defined in the 2009 ASAOC.

Thank you.

Subject: RE: Gasco Sediments Site Field Change Request Form 2

Jen, Bob, Ryan,

Please revise FCR #2 to clarify whether the material meets any of the criteria for substantial product defined in the 2009 ASAOC:

- 1. Bands of product, layers of product, "saturated" sediments, "stained" sediments, and/or seams of product that are greater than 2 inches thick.*
- 2. Any layer or seam of product, regardless of thickness, that is clearly defined as liquid NAPL that is also mobile (i.e., "oozes" or "drips" out of the core during core observations).*

Thank you,

Hunter Young

Subject: Gasco Sediments Site Field Change Request Form 2

Hunter,

Attached for your review and approval please find Field Change Request Form 2 for the Gasco Sediments Site Spring 2023 ISS lab pilot treatability study investigation. This change is associated with a proposed treatability study core acceptance without the presence of PTW-NAPL, which is a deviation from the EPA-approved *Revised In Situ Stabilization and Solidification Bench Scale Treatability Field Sampling Plan*.

If you have any questions during your review, please contact Ryan Barth.
