Subject: Gasco Sediments Site Additional Depth of Contamination Characterization Investigation Daily Progress Report 04/03/2023

Hi Hunter,

The following is the April 3, 2023, daily progress report for the additional depth of contamination study investigation being conducted at the Gasco Sediments Site Project Area in accordance with the U.S. Environmental Protection Agency (EPA) approved *Revised Additional Dept of Contamination Characterization Addendum within the Gasco Sediment Site Project Area* (Addendum) dated March 1, 2023 (Anchor QEA 2023). This was the sixth day of the investigation.

Personnel On Site

- James Melton, Heather Kish and Sasha Norwood (Anchor QEA, LLC); Jeffrey Johnson, Javier Anguiano, and Esteban Marquez (Holt Drilling)
- Oversight: Adam Khalaf and Patrick Faynor, CDM Smith
- Visitors: None

Riverbank Angled Boring Sampling Program

Angled sonic cores were collected from the following location.

- PDI-222 was advanced at an angle of 20 degrees to a total depth of 30.7 vertical ft below grade and soils were logged from 0 to 30.7 vertical ft below grade. Samples were collected in accordance with the Addendum as follows:
 - Observed DOC (based on visual and olfactory indicators) in PDI-222: 21.9 ft vertical ft below grade
 - Samples collected:

GASCO0049851

- 19-20 and 20-21 vertical ft below grade (archived above visual and olfactory DOC interval)
- 21-22, 22-22.5, 23.5-24, and 24-25 vertical ft below grade (selected for analysis, data gaps in intervals selected adjusted to reflect recovery in each 5-ft boring advance)
- 25-26 and 26-27 vertical ft below grade (archived)

Health and Safety

- No reportable incidents

Samples Shipped

- Samples were submitted to the laboratory today

Substantive Discussions with EPA Oversight

- None

Deviations

- None
