

6-13-08

Dear Dennis Shuttler,

Thank you for your letter of 5-29-08 regarding the Rabe Harbor water Co proposals. The letter was well written, easy to understand.

Further comments were hard to make as all the facts are not known by those served. I would like to see the base charge 0-5000 gallons upped to 5-7000 gallons to help those with large families and those with small vegetable gardens.

I now know how the utilities and Transportation commission operates. I am grateful the commission is in place and operating.

Thank you
Sincerely
Gut Griffin

My neighbor and friend at Rabe Harbor was the late John Ruff. He must have been active around your commission. He was a wonderful person, friend, and was a wonder with the use of the English language.
