

Metadata for WA 8 SAB Cloud-Polygon

Keywords

Theme: Telecommunications.

Description

Abstract

This data describes the boundary of the wireless service area for the Washington RSA No. 8 L.P., also known as Washington 8 rural service area.

Purpose

This data was created to meet annual certification requirements for wireless eligible telecommunications companies.

Status of the data

Final.

Data update frequency: This data is updated and filed with the WUTC every three years.

Time period for which the data is relevant

Date and time: 2007.

Description: Year.

Publication Information

Who created the data: 4G Unwired RF Engineering Services, Mark Cole, Engineer, as contracted by and working with Inland Cellular Telephone Company as general partner of Washington RSA No. 8 L.P.

Date and time: July, 2007.

Data storage and access information

File name: WA 8 SAB Cloud-Polygon

Type of data: vector digital data

Location of the data: WUTC Records Center filed as confidential under Docket UT-073015.

Data processing environment: Microsoft Windows XP Version 5.1 (Build 2600) Service Pack 2; ESRI ArcCatalog 9.2.0.1324

Accessing the data

Size of the data: 0.004 MB

Data transfer size: 0.004 MB

Constraints on accessing and using the data

Access constraints: Filed as confidential per WAC 480-07-120.

Use constraints: To be used solely by the WUTC for the purpose of satisfying eligible telecommunications carrier ("ETC") requirements and the ETC filing under Docket UT-073015.
