Prosser	Gap Road			10 Mbps			
Wapato	Branch Road			10 Mbps			
Wapato	Konowac Pass			10 Mbps			
Stevenson	Wauna Lake			1.5 Mbps			
Wishram	Wishram			10 Mbps			
Total		1,589	1,092				

Merger Commitment 8 - Broadband Improvement

CenturyTel and Embarq agree that United will provision broadband to 2,200 residential lines which currently are not broadband capable over (3) years, commencing upon the close of the merger. Annual progress on this conditions will be apparent, as measured by the number of residential access lines that become DSL enabled. An annual report will be provided to the Staff and Public Counsel specifying

- a. The number of lines enabled;
- b. The wire centers where those lines are located;
- c. The data speeds for each upgraded wire center, as measured by the maximum speed the upgraded equipment is capable of providing; and,
- d. The number of lines in the upgraded wire center capable of reaching the following downstream data speeds: Up to 1.5 megabits per second ("Mbps"); above 1.5 Mbps up to 3 Mbps; and, above 3 Mbps to maximum data speed.

These sites are speed limited to 1.5 Mbps due to T1 Transport.
