Major Event – Qualification Summary

IEEE1 Standard 1366

IEEE Standard 1366 was established to present a set of terms and definitions, which can be used to foster uniformity in the development of electric system service reliability indices, to identify factors that affect the indices, and to aid in consistent reporting practices among utilities. Also, it provides guidance for new personnel in the reliability area and tools for internal as well as external comparisons. The Major Event Day definition was created as part of IEEE Standard 1366 to allow for consistent calculation of reliability metrics between utilities and enable more valid comparisons with other utility reliability metrics.

IEEE Major Event Day Calculation (2.5 BETA METHOD) <ol style="list-style-type: none"> 1. A threshold on daily SAIDI² is computed once a year, following year end 2. Assemble the 5 most recent years of historical values of SAIDI/day 3. Discard any days in the data set that has a SAIDI/day of zero 4. Find the natural logarithm of each value in the data set 5. Compute the average (Alpha) and the standard deviation (Beta) of the natural logarithms computed in step 4 6. Compute the threshold T_{MED} where T_{MED} = exp (Alpha + 2.5 * Beta) 7. Any day in the next year with SAIDI > T_{MED} is a major event day
Puget Sound Energy's IEEE Major Event Threshold (T _{MED}) for 2022: 7.80 Minutes

Event Restoration – YTD Cost Summary

Starting from the 2018 calendar year, PSE continues its existing Qualifying Storm Loss Deferral Mechanism for any storm restoration costs incurred on or after January 1, 2018, with the following modifications that were agreed to in settlement and the settlement was approved by the Commission in PSE's 2017 general rate case:

- (i) the cumulative annual cost threshold for deferral of storms under the Qualifying Storm Loss Deferral Mechanism shall be increased from \$8 million to \$10 million,
- (ii) qualifying events that cost less than \$500,000 will not qualify for deferral, and
- (iii) the cumulative annual cost threshold for the Qualifying Storm Loss Deferral Mechanism shall exclude storm events with costs less than \$500,000.

Media & Communication Coverage**Chance for ‘severe storm’ across Western Washington as wind, rain move in Monday**

Apr 4, 2022, 7:55 AM | Updated: 12:55 pm
BY MYNORTHWEST STAFF

The team that brings you MyNorthwest Strong winds and stormy weather are on the way in Western Washington, with the chance for a “severe storm” by Monday evening, the National Weather Service warns. “The incoming storm system will present multiple potential hazards for Western Washington,” the NWS cautions.

That will bring “heavy” snow in the mountains, strong winds across the region, rising river levels, and potential thunderstorms. Wind in particular is expected to cause issues, with coastal areas and the northern interior likely to experience gusts of up to 55 miles an hour.

That will come alongside “moderate to locally heavy” rainfall and pockets of hail between Monday morning and the evening hours. The NWS says that “colder unstable air” could also lead to isolated thunderstorms up and down Western Washington.

Those conditions could lead to downed trees and power poles on roadways, as well as outages across Snohomish, Pierce, and King counties. Already, Puget Sound Energy is reporting power outages affecting over 9,000 customers.

For details on how to ensure you’re prepared should you lose power in your home, head to this link.

In the mountains, one to two feet of snow is expected to fall through the passes. Travel through that area will become difficult as a result, with drivers advised to delay trips planned for Monday and Tuesday if possible.

Thousands lose power in Northwest wind storm

Associated Press Apr 4, 2022

SEATTLE — Nearly 30,000 customers lost power Monday during a storm bringing high winds and rain including some thunderstorms to areas of the Pacific Northwest.

Puget Sound Energy reported more than 260 outages Monday affecting over 21,000 customers in western Washington. Seattle City Light reported more than 7,200 customers without power as of about 5 p.m. Monday.

Pacific Gas and Electric Company said more than 18,500 customers had lost power in southwest Washington, in Portland and surrounding areas.

In Eastern Washington and northern Idaho, Avista reported more than 5,000 customers were without power Monday afternoon.

A winter storm warning was in effect until 8 a.m. Tuesday for areas of the Washington Cascade Mountains above 2,500 feet, according to the National Weather Service. Heavy snow is expected with additional accumulations of up to 2 feet possible and gusty winds.

The winter storm warning includes Stevens and Snoqualmie passes. Travel over the passes could be difficult and was discouraged, especially later in the day.

A winter storm warning was also in effect for the Olympic mountains with up to 20 inches of additional snow accumulation.

The heaviest snow is expected Monday afternoon through Tuesday morning, according to KING 5 Meteorologist Adam Claibon.

The weather systems could bring up to an inch of rain to some areas of the Puget Sound region by Tuesday.
