Puget Sound Energy
Kimberly Harris, CEO

Dear Ms. Harris,

As a Puget Sound Energy customer from Seattle, WA, I was pleased to learn PSE has committed to retiring two out of the four Colstrip, MT coal-burning plants. As a mother and concerned citizen, I was dismayed to hear Colstrip is our country's third largest coal plant.

Please close the remaining coal plants. We need to transfer that production to clean, renewable energy such as wind and solar. As a company that takes pride in their climate-friendly practices, please find your path to true climate leadership and contribute to a cleaner, sustainable future. Your leadership and support is vital to Seattle, King County, and Washington State meeting our emission reduction targets.

Sincerely,

Suica Petersen
