

Dear Kimberly Harris,

6/28/17

I'm writing to thank you for your commitment to retire 2 coal units by July 2022. As someone who has struggled to manage my asthma over decades, it's wonderful to hear that these pollution emitting plants will no longer be delivering the air that keeps me from breathing fresh clean air. Now, with tremendous concerns over changes in our climate, I ask, NO URGE! you to retire the other 2 units of the Colstrip plant by 2025. Besides the 100% reduction of pollution I mentioned previously, its imperative you completely halt the use of this dirty fuel completely. Renewable energies are more affordable, cleaner and don't contribute to climate change. You're going to have to switch sooner than later. Do it now, show leadership so that the State of Washington can lead the Nation in completely transitioning away from fossil fuels. Your constituents and I would thank you for creating a cleaner future.

Sincerely, Trista Scudder
