INSTALLATION APPOINTMENTS MET**

The Installation Appointments Met report measures the percentage of appointments for the connection of service met on the commitment date. Beginning with May, 1993, report each month's results, adding subsequent months' data until 12 months of data are reported. After that point, add the current month data and delete the 13 month old data in order to always report percentage of 12 months.

HELD ORDERS

The Held Orders report lists the number of requests exchange service that are not filled on or before the commitment date. State the number of held orders expressed as a ratio per one hundred new or reestablished lines ordered. Begin reporting with May 1993 ratios. After ratios for 12 months have been reported, subsequent reports should add the current month's data and delete the 13th month's data in order to continue reporting the most current 12 months of results.

REGRADE ORDERS

The Regrade Orders report lists the number of requests for higher grades of service unfilled for more than 30 days. This number shall be expressed as a ratio per one hundred requests for regrades (new requests plus unfilled requests from the previous months). Begin reporting with May 1993 ratios. After ratios for 12 months have been reported, subsequent reports should add the current month's data and delete the 13th month's data in order to continue reporting the most current 12 months of results.

Verizon Northwest is 100% one-party. There are no regrade orders.
