To Steve King and PSE Board:

I am a retired RN and Public Health Nurse of 42 years. I have lived all over the western states, the last 30 years in Thurston County, just up wind of the Centralia coal plant. I have cared for many individuals suffering from lung disease, asthma, emphysema, lung cancer and know the long term impacts of burning coal in our western states. The time is Now to divest any controlling ownership or prolonged investment in COLSTRIP montana. PSE needs to convert ~~as~~ to clean energy, wind, solar, tidal, electric that is NOT fossil fuel driven. Coal trains along the Columbia, and fracked gas are deathtraps for our community, our environment and our children's future. Listen To OUR VOICES Now.

JOSAN Sandwell, RN, PHN
