### 34.12 ACCESS BASED BILLING CARRIER ORIGINATION SERVICE CHARGES

The rates shown on the Schedules in **Attachment C-14** are per minute and will be determined based on the originating location.

The applicable OCN will be determined by the originating ANI or the Local Routing Number.

The applicable "Class" shown on the Schedules will be determined as follows:

- (i) Class 1 = 9000 and 5000 series OCNs that are assigned to entities recognized by Provider as a Regional Bell Operating Company (RBOC)
- (ii) Class 2 = OCNs other than those specified in Class 1 (i.e., 9000 and 5000 series OCNs assigned to non-RBOCs), Class 3 or Class 4
- (iii) Class 3 = Provider and its affiliates' OCNs
- (iv) Class 4 = GTE's OCNs
- (v) Class 5 = Wireless OCNs that are assigned to entities recognized by Provider as Wireless Providers

Note: If calls are originated from an entity in a particular Class that reflects "N/A" as the applicable rate, the applicable rate will be the default rate shown on the Schedule until such time as Provider has loaded the appropriate rate for such Class in the billing system.

The applicable Class designations are set forth in Provider's ACCESS BASED BILLING (ABB) OCN Table (the "ABB OCN Table"), which is available in the public area of Provider's Customer Access System/Bulletin Board (BBS). The ABB OCN Table may be modified from time to time thereby affecting Customer's applicable rates for ACCESS BASED BILLING CARRIER ORIGINATION Service. Any modifications to the ABB OCN Table will be effective as of the first day of the month following its posting at the BBS

(See **Attachment C-14**) As rates are refreshed, the rate schedules are updated by replacing the Attachment.
