

**Attachment A –**

**Dockets UG-210773, UG-210450, UG-210461, and UG-210462**

**Proposed Conditions for Approval of Conservation Potential Assessments**

- 1) **Increase Transparency of Subsequent CPA Filings.** - The Company will file the full CPA model (confidentially where necessary) with the Commission when seeking approval of the CPA. The Company will coordinate one or more structured, technical discussions as the CPA is developed to discuss the CPA model with Commission staff, other interested stakeholders, and the independent third party performing the CPA. The Company will work with Staff to establish a timeline and additional supporting documentation required for Staff review.
- 2) **Assessment of Transportation Customer Conservation Potential** - The Company must evaluate the available and cost-effective savings potential for the benefit of all transportation customers using the following provisions:
  - a. Develop an outreach plan to offer voluntary energy audits, that may be conducted by the utility or third-party contractors, as a customer service.
  - b. Consult with the energy efficiency advisory group in developing the plan and a reporting mechanism.
- 3) **Deferral of Costs** -- Costs for implementing and administering the Assessment of Transportation Customer Conservation potential, as described above, are recoverable from the customer classes benefitting from these services, including through transportation rates, as determined by the Commission. Utilities may request deferral of these costs.
