MS JENNIE CARTON
KING CO. SOLID WASTE DIVISION
YESLER BLDG, 400 YESLER WAY, RM 600
SEATTLE, WA 98104-2637

Dear Jennie:

Enclosed are the reports and disk for the month of August 1993.

The recycling program for Areas 6 and 7 is continuing on the same level as before. Brochures are mailed upon request and to all new customers.

The Multi-Family recycling information is updated monthly and is available to you at any time.

The yardwaste mailer was very effective - in Area 6 for August we signed up 102 customers for yardwaste and in Area 7 there were 30. Fifty yardwaste tags were used for Area 7 and 150 for Area 6 for the month of August.

Sincerely,

Vickie Forbes
Controller

A Waste Management Company

Waste Management - Sno-King had no unusual amounts of phone calls concerning missed collection, service problems or complaints in the month of August. Most of the phone calls concerned the brochure the County sent out concerning yard waste. They were basic questions or reinforcements of what the information stated.

The number of customers that received notification tags on refuse containers because they contained yard waste was approximately 2,975.

The number of yard waste sign up cards received was approximately 300.

Rural Recycling Report

Waste Management - Sno-King

The WUTC approved new services and rates for our rural collection on August 4, 1993. We subsequently delivered 1205 sets of recycling bins during the week of August 9 - 13 and collection services began on August 16, 1993. Approximately 30 homes in this new service area created a problem at the point of collection. In these cases a new collection point was established or the customer declined to participate in the program.

A Waste Management Company

Waste Management - Sno-King had no unusual amounts of phone calls concerning missed collection, service problems or complaints in the month of September. Most of the phone calls concerned a rates which were raised August 5, 1993 in King County. There were also more questions on yard waste and sign ups for the yard waste service.

The number of customers that received notification tags on refuse containers because they contained yard waste was approximately 2,225.

Dear Jennie,

Since passing the King County Ordinance for yardwaste, our drivers have tagged approximately 500 customers in the month of August.

We received 375 yardwaste sign up cards from customers who wanted to sign up or change cart sizes in the month of August.

In the Rural King County area our rates were approved on August 26, 1993. We proceeded to deliver recycle bins the following week (August 30 - September 3) according to what day of service customers had. We delivered 3 14-gallon bins and about 2 weeks later they received 1 lid for their bins. The following week (September 6 - September 10) we picked up the recycling for the first time.

Since implementing recycling in Rural King County we have great success with people signing for both residential garbage service and for recycling only service. If ever people need bins we do have plenty on hand to deliver out to the customer on their next pick up day.

I hope this answers your questions. If you do need any other information please feel free to phone me at 255-8411 ext 855.

Waste Management-Rainier's phone calls were normal misses and questions about billings. Toward the end of the month the customers called about our routing and day changes. The drivers tagged 65 garbage cans that had yardwaste in them.

**KING COUNTY NARRATIVE REPORT
OCTOBER 1993**

Residential garbage drivers say that the can tags are very effective in getting people to stop throwing yard waste out with the regular garbage.

They report that most of the time after a can is tagged the customer usually quits putting yard waste in the garbage and that many of them sign up for yard waste service.

**KING COUNTY NARRATIVE REPORT
AUGUST 1993**

We have received approximately 500 new sign-ups for yard debris service since the "ban in the can" notices went out at the beginning of the month.

Total participation is about 27% of eligible households, approximately 10% more than in August 1992.

DP/cy

Dear Dave:

8-24-93

Many thanks for the July report. For the August report I will need some additional information including:

- the number of customers that received notification tags on refuse containers because they contained yard waste; 100 - 125
- ~~the number of customers whose refuse containers were not collected because they contained yard waste;~~
- the number of yard waste sign up cards received. 248

Please call if you have any questions.

Jennie
