Dear Kimberly Harris, PSE CEO

As a PSE customer, a mother, and a Washington resident I am writing to strongly encourage you to close the Colstrip power plant and stop burning coal. This also requires closing the open faced mine causing immense destruction to our environment in Montana.

By moving to 100% renewable energy, PSE could be on the right side of history, and would lead the way making key life and climate improvements in the Pacific Northwest. Natural gas is not the answer, and is even dangerous in the interim.

Thank you for your efforts thus far! Closing units one and two is tremendous progress but it does not go far enough. We are now collectively at an extremely critical time and courage is required to do what is right. Please close Units three and four as soon as possible. Our children's lives depend on it. Our planet and our community depend on it.

I am hopeful that PSE can become 100% renewable energy supplier. I will be a proud customer when that happens.

Kind regards, Sara Williams
