

Dear PSE CEO Kimberly Harris:

My household has participated in your green energy program since the recent campaign. I totally support this. I want it to be used to develop sustainable energy sources, such as wind & solar. I do not support transition to fracked natural gas. I do not support the Coalstrip mine, its environmental damage, & especially expansion of that energy source.

I fully support your stated philosophy to support innovative technologies to preserve our wonderful Puget Sound ecosystem.

Thank you for considering my input,

Lynne EOPA
