

6/28/17

Dear Ms. Harris:

I'm a fellow mother who is very concerned about the fact that the Colstrip Power Plant is the third largest carbon polluter in our country.

I have joined thousands of local mothers in calling for our energy providers to retire Colstrip and invest in 100 percent renewable energy sources in order to ensure our planet's future. Natural gas is not a sustainable option. Mothers across this country are joining with legislators and forward-thinking energy leaders, to bring clean energy to customers.

I know that you will make the right decision for WA customers, and for our children's health. Close all four units of Colstrip and allow PSE to become a popular climate leader for all families across the U.S. We need you on board to take action to save our planet and our health!

Sincerely,  
Maris Abelson
