

June 28, 2017

Dear Ms. Harris:

Thank you so much for moving to retire two of the boilers at the Coalstrip coal plant in Montana. Hopefully, you will see your way clear to converting the two other plants to an alternative form of energy as well - perhaps to wind power in which PSE also invests (and again thank you for these wind farms)

I am your customer. I live in Olympia, Washington. However, I used to live in Montana and my daughter lives there now. I am very concerned about the current incidences of asthma as caused by the coal plants. I also worry about the pollution of the rivers and streams that run in Southeast Montana and hurt the cattle ranchers there.

Knowing your commitment to innovation in alternative energies, I have every confidence in your vision for a carbon-free future for both Washingtonians and Montanans.

Sincerely,  
Mary Moore
