

June 28<sup>th</sup> 2017

Dear Puget Sound Energy CEO,

My name is Melody and I'm a concerned customer regarding your Colstrip coal plant.

Communities and businesses worldwide are taking action and becoming 100% Committed to renewable electricity. This movement has been particularly powerful with major local corporate customers, such as Microsoft, Starbucks, and REI, have joined the Renewable Energy Buyer's Alliance to guarantee their operations run clean.

PSE's customers overwhelmingly demand renewable energy. Cities and counties that are home to hundreds of thousands of PSE ratepayers have called on PSE to reduce its fossil fuel dependence and transition to carbon-free resources.

The future is renewable: 100% committed.

Join the movement!

You can do so by:

Retiring the Colstrip coal plant no later than 2025 with a replacement that is 100% renewable energy and energy efficient with no new natural gas. This is achievable and economical.

By getting off coal and investing in clean energy, PSE can ensure Washington's continued standing as a leader in sustainability and create thousands of green jobs in the state and throughout the Northwest.

Thanks for taking the time to help our beautiful Pacific Northwest and our global planet earth by taking a stand.

Sincerely,

Climate Reality Leader  
Mel
