**MOST DRIVERS
CAN'T EXPLAIN
WHY THEY DIDN'T
BEAT THE TRAIN
THROUGH THE
CROSSING.**

They must see the warning signals.
But they try to beat the train anyway. Why? We don't know,
because in many cases, they just can't tell us.

**AMERICA'S ROADS CAN BE HIGHWAYS OR DIEWAYS -
THE CHOICE IS YOURS.**

DRIVERS WHO TRY TO BEAT TRAINS ARE USUALLY GOING TO THE SAME PLACE.

People who ignore the signals and try to beat the trains through crossings are usually in a hurry to get somewhere. Unfortunately, they often end up somewhere else.

**AMERICA'S ROADS CAN BE HIGHWAYS OR DIEWAYS –
THE CHOICE IS YOURS.**

*Ever Meet Anybody
Who's Been Hit
By A Train?*

Didn't think so! Those people are rare.

A train hitting your car has the same impact as your car crushing a can of soda. So stay out of harm's way. At railroad crossings, remember to "Look, Listen & Live!"TM And don't walk or play around the railroad tracks; it's illegal and it can be deadly.

"Stay off! Stay Away! Stay Alive!"TM

always  spect a train

**TRY TO BEAT A
TRAIN THROUGH THE
CROSSING,
AND YOU MAY NEED
A NEW SET OF WHEELS.**

If you ignore the crossing signals, your car may not
be the only thing that's beyond repair.
