

June 28, 2017

Dear Miss Kimberly Harris,

As a person who has lived on the West coast of the United States for over 20 years, I am deeply concerned about the impact of burning coal for energy can have on our climate and way of living in the decades to come.

The service

Puget Sound Energy is essential for the state of Washington, and I hope you can support us in our efforts to ~~help~~ move toward increasing the use of renewable energy. I propose that Puget Sound Energy retire its remaining two units that use coal, and switch to renewable energy.

Renewable technology companies, such as NW Wind & Solar and Tesla's SolarCity are leading in innovation to help you ~~achieve~~ lead in climate stewardship. Please consider my proposal and I can also help initiate conversations with companies, such as SolarCity if you are not already in contact.

Thank you for your time.

Sincerely,

Nidia K Trejo, MS
