

Ms. Kimberly Harris
CEO
Puget Sound Energy
Bellevue, WA -

Dear Ms. Harris

As the corporate leader of a major company in a progressive state - WA, I am writing to you to urge a wise and responsible decision at this critical stage for our community, state, the nation and world in your decisions for future investment and growth for your company -

Given the critical imperatives of climate impact, and your in time with your decision and precedent set to shut down two of your coal power plants, we now ask you to continue along that prudent path, and make a similar decision to pursue a strategy of conversion to renewables for PSE's future -

A singular focus on
renewables, will not only be
a prudent business decision
but a future-oriented strategy
that helps the community,
the aspirations of our people
and your customers -

PSE's reputation and
standing in the community
and corporate world will
be enhanced with conversion
of your company to
renewables - in the
interest of your customers,
and our planet -

We are certain that you
will be that exemplary
leader, and reap much
goodwill, business success
and high reputation.

We look forward to
a positive decision
and stand ready to
support you all the
way -

Sincerely,
Nimal Gunawardena
