

To UTC commission,

I was here last year at the hearing, too. I stayed to hear all the testimony last year and what the commission had to say.

Please, please we cannot burn \$ coal anymore - stop earlier than 2025. That is too long.

We have no alternative to PSE electricity; I have no choice. This should be possible to stop this folly. Stupid, foolish behavior on the part of PSE.

Solar energy is cheaper now, ~~we~~ there are alternatives to coal. No gas either!
