Kimberly Harris

Chief Executive Officer

Puget Sound Energy

Dear Ms. Harris:

I am writing to you as a concerned citizen, advocating clean energy production and consumption. Puget Sound Energy (PSE) has made important and significant strides to provide clean and renewable energy to its customers, having retired 2 of its coal plants previously. PSE now has an opportunity to distinguish itself and enhance its reputation as a clean energy company by closing the remaining 2 coal plants ~~at~~ by ~~so~~ no later than 2025 and committing to renewable energy. With the cost of renewables continuing

to drop, the cost of energy will reach grid parity in the near future. This transition to renewables also presents an opportunity to align PSE's values with its customers, who are increasingly desiring or demanding clean energy. Finally, PSE as well as its customers will benefit from the cost savings and benefits to the environment and their health.

Thank you for your kind attention to this matter.

Sincerely yours,
WAC

W. Patrick McPhillamy, III
